## Dispatch of Entitlement Offer Booklet and Entitlement Application Forms

Australian semiconductor developer BluGlass Limited (ASX: BLG) advises that the Non-renounceable Rights Issue Offer Booklet and personalised Entitlement Offer Application Forms have been dispatched to shareholders today by mail and where so elected by email.

This announcement has been approved for release by the directors of the Company.

## **About BluGlass**

BluGlass Limited (ASX: BLG) is a global leader commercialising a breakthrough technology using Remote Plasma Chemical Vapour Deposition (RPCVD) for the manufacture of high-performance LEDs and other devices. BluGlass has invented a new process using RPCVD to grow advanced materials such as gallium nitride (GaN) and indium gallium nitride (InGaN). These materials are crucial to the production of high-efficiency devices such as power electronics and high-brightness (LEDs) used in next-generation vehicle lighting, virtual reality systems and device backlighting.

The RPCVD technology, because of its low temperature and flexible nature, offers many potential benefits over existing technologies including higher efficiency, lower cost, substrate flexibility (including GaN on silicon), and scalability.
