**Shell awards Worley contracts for a new sulfuric acid plant in Indonesia**

Shell Global Solutions International BV (Shell) has awarded Worley two contracts for PT Pertamina EP Cepu's (PEPC) new sulfuric acid plant in Indonesia. The plant is part of the Jambaran-Tiung Biru unitized gas field project for PEPC, a subsidiary of PT Pertamina (Persero), Indonesia's state-owned energy company.

Under the contracts, Worley will supply Chemetics® proprietary Cooled Oxidation Reactor (CORE™) technology. This is the first time Chemetics proprietary CORE™ sulfuric acid technology will be applied in combination with Shell's proven Cansolv® SO<sub>2</sub> capture technology, which will provide a new type of sulfuric acid plant that is specifically optimized for high SO<sub>2</sub> concentrations.

Chemetics® joined Worley as part of the acquisition of the Jacobs Energy, Chemicals and Resources division.

Cansolv® is a registered trademark of Shell Global Solutions International B.V.

"As Australia's leading energy services company, Worley is capable of offering a wide range of integrated solutions and this project demonstrates our commitment to providing the best technology and high value for our customers. We are excited to apply our Chemetics® CORE™ sulfuric acid technology in the natural gas sector and look forward to supporting both PEPC and Shell on this significant project," said Chris Ashton, Chief Executive Officer of Worley.

Authorised for release by Nuala O'Leary, Group Company Secretary.
