

White Energy Company Limited

Mining Exploration Entity Quarterly Activity Report

and

Appendix 5B

March 2020

SUMMARY OF ACTIVITY

A summary of the major items of activity for White Energy Company Limited ("White Energy", "WEC" or the "Company") during the quarter ended **31 March 2020** is outlined below.

HIGHLIGHTS

- **Entitlement Offer raises \$15.5 million**
- **Negotiations to sell 51% interest in Mountainside Coal Company (USA) continuing**
- **Yankuang Group is investigating the use of BCB technology in China**
- **River Energy is pursuing opportunities for BCB projects in South Africa**

1. AFRICA – RIVER ENERGY JOINT VENTURE - WEC 51%

White Energy's 51%-owned subsidiary, River Energy JV Limited, through Proterra Investment Partners (Proterra, 49%), is in discussion with a number of South African coal miners interested in the Group's Binderless Coal Briquetting (BCB) technology.

Extensive testing by River Energy, including successful briquetting and combustion trials, has previously demonstrated that a saleable export grade coal product can be produced from South African reject tailings. Proterra is pursuing opportunities on mine sites in South Africa to secure access to fine coal to support BCB projects.

The BCB process provides an attractive solution for coal producers seeking to maximise mine yield and facing the environmental challenges posed by reject coal fines. In South Africa alone, it is estimated that there are over 1 billion tonnes of discarded coal in tailings facilities, much of which may eventually need to be reclaimed.

2. NORTH AMERICA – MOUNTAINSIDE COAL COMPANY ("MCC") – WEC 51%

MCC had no coal sales revenue during the March 2020 quarter, with coal production suspended since April 2018.

MCC's management are currently planning for future mining activities.

Reclamation activity continues, with applications being made for bond releases as rehabilitation work in each area is completed. Expenditure related to production and development activities of \$183,000 was incurred during the quarter.

MCC currently has additional permits in various stages of approval and many acres containing low ash Blue Gem coal resources in Kentucky that are in the initial permitting phase. MCC continues to advance the permitting process and additional leases are being sought as mine plans for new areas are progressed.

White Energy has previously announced that it would sell its 51% interest in MCC. Negotiations to purchase the Group's interest are continuing and being advanced to a finalisation.

3. AUSTRALIA

South Australia – EL5719 and PELA674

During the quarter, work continued on examining coal gasification and emerging hydrogen opportunities from coal, planning for future exploration activities, and preparing the EL5719 licence renewal application due later this year. Capital expenditure related to exploration activities of \$9,000 was incurred during the quarter.

BCB

WEC is investigating the implementation of its BCB technology for use in Yankuang Group's coal briquetting business in China. Testing of coals from Shandong and Shanxi Provinces has been successfully conducted at WEC's test facility in Cessnock and two of the Company's briquetting machines were despatched for larger scale tests in China.

Yankuang Group are in the final stages of building a pilot plant in Shandong Province using WEC's BCB technology, and this is the first step in commercialisation of the technology in China by the end of May. Design of a BCB plant for a mine site in Shanxi Province is well advanced, and a contract for construction of the plant being finalised that will allow construction to commence that is funded by the customer under White Energy's design and engineering supervision. The travel restrictions imposed by the Australian Government due to COVID-19 has slowed the contractual discussions.

Management continues investigations into opportunities to briquette discarded coal fines which currently represent an environmental liability to miners. Application of the BCB technology could provide an opportunity for miners to convert waste coal fines into a saleable product.

COVID-19 Update

White Energy has introduced appropriate measures to ensure the health and safety of its employees, contractors and the public, in compliance with government directives on COVID-19. Operations are continuing normally, with no material adverse impact on financial performance. The measures put in place by governments during the quarter to control the spread of the virus are causing worldwide economic activity to contract. Such effects are creating risks for WEC and its customers, and the outlook for general economic conditions is uncertain in the short to medium term.

4. GENERAL CORPORATE

The Company has no significant secured corporate debt. Non-recourse shareholder loans provided to the Group's 51% owned operations in the USA and South Africa by both White Energy and the minority shareholders in proportion to their ownership interests are repayable in January 2021.

Proceeds from the Entitlement Offer undertaken in March 2020 raised \$15.5 million. The proceeds are intended to be used to fund the Company's ongoing legal proceedings against PT Bayan Resources Tbk and Bayan International Pte Ltd, to make payments to the CSIRO of approximately \$3.2 million in relation to BCB technology, and for general corporate purposes, including working capital.

Directors' fees and salaries including superannuation paid during the quarter to Directors and their associates totaled \$83,000.

PT Kaltim Supacoal ("KSC") – WEC 51%

White Energy is engaged in legal proceedings in the Singapore International Commercial Court ("SICC") initiated by subsidiaries of White Energy, BCBC Singapore Pte Ltd ("BCBCS") and Binderless Coal Briquetting Company Pty Limited, against PT Bayan Resources Tbk and Bayan International Pte Ltd (collectively, "Bayan") in connection with the KSC joint venture.

The claim for damages can be broadly summarised as follows:

- (i) BCBCS claims approximately USD99 million in wasted expenditure, being expenses incurred by BCBCS which were rendered futile by reason of Bayan's breach and repudiation of the joint venture;
- (ii) Further, BCBCS claims for loss of the chance of expanding the capacity of the joint venture to at least 3 million tonnes per annum which profits are estimated to amount to approximately USD54 million; and
- (iii) Interest on any damages award and costs.

As such, the total value of BCBCS' claim may be estimated to amount to USD153 million plus interest and costs. The quantum of damages payable to BCBCS will be determined by the SICC in the third tranche of the proceedings which has been set for 21 September to 30 September 2020.

The only issues remaining to be determined by the SICC in the third tranche relate to the damages which may be payable to BCBCS. The SICC has, in the earlier tranche of the proceedings, already made a conclusive determination that Bayan has both breached and repudiated the joint venture deed.

5. INTERESTS IN MINING TENEMENTS

Below is a listing of the Company's interest in mining tenements, where they are situated and the percentage interest the Company holds in each. There were no changes during the quarter.

The Company and its subsidiaries hold an interest in the following mining tenements:
