

Net Tangible Assets & Monthly Investment Report

Company commentary

- Markets continue upward momentum as economies gradually re-open
- Carve out of Siemens Energy completed and listing for the end of September is on track

Among May's best performers were our alternative investment manager portfolio holdings, particularly Apollo and KKR. Both businesses have strong management fee growth and have used the market dislocation to raise and deploy new capital. KKR, for instance, expects management fees to grow over 50% between 2019 and 2022. In another positive sign, both companies now meet the corporate governance requirements to be eligible for the Russell family of indices, which is subject to reconstitution in June. This should lead to continued passive buying.

Industrial holding Siemens AG was also among the portfolio's best performers. Various elements of our

long-term investment thesis remain intact, with recent months' events highlighting the strength and stability of Siemens' healthcare and software-related businesses. The September energy spin-off, a potential catalyst for the stock, is on the near horizon as well.

Siemens is also well positioned to play its part in the proposed European Recovery Fund, should it proceed, with investment focused on decarbonisation and digitalisation initiatives. Almost all Siemens' businesses - renewable energy, smart infrastructure, digital industries, mobility - provide products and services related to these initiatives.

PM Capital Limited (‘the Manager’), founded in 1998, is a leading Australian based fund manager that has successfully achieved its goal of building long term wealth for its clients by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875), which began trading of the ASX on 12 December 2013, provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company.

Managed by PM Capital (AFSL 230222), the aim is to create long term wealth through a concentrated portfolio of around 40 global companies that it believes are trading at prices different to their intrinsic values.

PM Capital has been operating its global investment strategy via an unlisted fund since October 1998. This unlisted fund's performance adjusted to reflect PGF's fee structure has produced a total pre-tax return of 581% vs the MSCI World Net Total Return Index (AUD) of 188% to 31 May 2020.

Who manages the Company's portfolio?

The Portfolio Manager for the Fund and CIO is Paul Moore. Paul is supported by a team of experienced investment analysts.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding

and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 34 years.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company's portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. The portfolio only holds those stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: The Manager has a significant investment in the Company - it invests with and for you.
