

25 June 2020

**TPG Singapore Allocated mmWave Spectrum**

TPG Telecom Limited (ASX: TPM) (**TPG**) advises the market that TPG Telecom Pte Ltd (**TPG Singapore**) has today been allocated 800 MHz of mmWave spectrum by the Singapore Infocomm Media Development Authority (**IMDA**).

As was reported to TPG shareholders in the Information Memorandum relating to the demerger of the Tuas Group issued on 19 May 2020 (the **IM**), TPG Singapore was not allocated spectrum in the 3.6 GHz band. The possibility of allocation of mmWave spectrum was also foreshadowed in the IM.

The allocation of 800 MHz spectrum across the 26 and 28 GHz bands will allow TPG Singapore to roll out next generation 5G services in support of new consumer and enterprise use cases.

The terms of allocation do not require TPG Singapore to incur any material upfront payment for the mmWave Spectrum.
