## **APPOINTMENT OF MR. JASON LAROCCA AS SENIOR GEOLOGIST**

**AuStar Gold Limited (ASX: AUL, or the Company)** is pleased to advise the recent appointment of Mr. Jason Larocca as Senior Geologist.

Based at the Morning Star Gold Mine in Woods Point, and reporting to the Group General Manager, Jason, alongside longstanding AUL geologist Juan Cipriano, will lead regional exploration, in-mine drilling and associated activities for the Company.

Mr. Larocca holds a Masters Degree in Ore Deposit Geology from the University of Western Australia (Dissertation: Fold-Nappe Kinematics of Plutonic Gold Mine), a BSc (Earth and Geological Sciences) from La Trobe University, Melbourne and is a member of the Australian Institute of Geoscientists.

Mr. Larocca has a strong, highly relevant career background with a particular focus on narrow vein gold geology, resource definition and exploration project generation, including roles with Catalyst Metals, Fortescue Metals Group and Barrick Gold.

Mr. Peter de Vries, who consulted for an extended period to AuStar Gold, remains available to the Company through his consultancy, however has stepped away from the project to focus on other opportunities. The Board is very appreciative of Peter's contribution to the business, particularly his service as Acting CEO for several months in 2019.

Released on behalf of the board of AuStar Gold Limited.

AuStar Gold welcomes shareholder communication and invites all interested shareholders to make contact at any time.
