

ASX RELEASE

Appendix 4C – Q1 FY21 Quarterly Cash Flow Report

Highlights:

- **Cash receipts from customers for the quarter totalled NZ\$5.0M, up 112% compared to Q1 FY20**
- **Successful completion of Share Purchase Plan raised A\$9M in addition to the A\$28M placement**
- **NZ\$67.5M cash on hand at end Q1 FY21**
- **Annual Recurring Revenue (ARR) at end Q1 FY21 up NZ\$1.1M to NZ\$19.1M**
- **Volpara's software products contracted to ~27% of US women who undergo screening and have at least one Group product applied on their images or data**
- **Churn remained negligible**

Wellington, NZ, 28th July 2020: [Volpara Health Technologies](#) ("Volpara," "the Group," or "the Company"; ASX: VHT), a medical technology company whose cancer screening software platform assists in the delivery of personalised patient care, has released its Appendix 4C Quarterly Cash Flow report for the quarter ending 30th June 2020.

Cash receipts from customers have remained strong, with almost NZ\$5.0M received in Q1, up 112% on Q1 FY20. This represents Volpara's fourth straight quarter with receipts greater than NZ\$4.5M and the highest cash receipts collected in any given quarter since listing in 2016. However, we continue to monitor the pandemic closely, noting the resurgence of COVID-19 across large parts of the United States, our primary market.

Net operating cash outflow in Q1 was NZ\$3.7M, less than projected and the lowest since Volpara's acquisition of MRS Systems, Inc., in June 2019. The Company had NZ\$67.5M in the bank at the end of Q1.

Separately, in May, the Company received approximately US\$1.7M as part of the US government's Paycheck Protection Program (PPP) loan scheme established in response to COVID-19. Applications for loan forgiveness will open in August 2020, at which point VHT will apply; therefore, the loan is classified as debt until a decision is received regarding the application for forgiveness. Should the loan not be forgiven, Volpara would be required to repay the loan over an extended period at an interest rate of 1% per annum.

In relation to orders, Volpara had a reasonable quarter coming off the back of a very strong Q4 and into our traditionally slower Q1 amidst the COVID-19 crisis. ARR increased from NZ\$18.0M (US\$11.7M) to NZ\$19.1M¹ (US\$12.1M) through a combination of new customers and upsells (adding NZ\$450K), customers commencing maintenance contracts for the first time, and foreign exchange movements.

After Q1, Volpara continues to cover approximately 27% of US women who undergo screening and have had at least one Group product applied to their images and data. Churn has remained negligible but the new sale gains were offset by some maintenance contracts for legacy capital sale systems which were not renewed.

¹ Twelve month trailing exchange rate used of US\$0.637:NZ\$1 vs US\$0.648:NZ\$1 at end Q4 FY20.

The annual revenue per user (ARPU) generated by women under contract across the Group within US breast cancer operations is currently approximately NZ\$1.70 (US\$1.09), up from NZ\$1.61 (US\$1.04) at the end of Q4 FY20. ARPU per US woman for contracts signed in Q1 ranged from US\$1.87 to US\$4.40 depending upon deal size and structure.

The payments to related parties of the entity and their associates identified in item 6.1 of the Appendix 4C relate to payments made to a director, Karin Lindgren, for legal services she provided to the Company.

Dr Ralph Highnam, the CEO of Volpara, said: "Q1 saw the emergence of COVID-19, but we're very heartened by the strong cash receipts, negligible churn, and the fact that we got a significant number of new deals over the line. However, we remain fully cognizant of the challenges ahead and are carefully plotting out new strategies so we can emerge from this crisis strong—COVID-19 will go away, cancer will not."

About Volpara Health Technologies Limited (ASX: VHT)

VHT is a MedTech SaaS company founded in 2009 on research originally conducted at Oxford University. VHT's clinical functions for screening clinics provide feedback on breast density, compression, dose, and quality, while its enterprise-wide practice software management helps with productivity, compliance, reimbursement, and patient tracking.

VHT's technology and services have been used by customers and/or research projects in 38 countries and are supported by numerous patents, trademarks, and regulatory clearances, including FDA clearance and CE marking. Since its listing on the ASX in April 2016, VHT

has raised A\$132 million, including A\$37 million in April/May 2020. VHT is based in Wellington, New Zealand.

At the end of June 2019, VHT acquired MRS Systems, Inc., a company based in Seattle, WA. MRS provides mammography reporting systems to over 1,600 breast clinics and hospitals, and to VHT a much stronger US presence, experienced local headquarters, and accelerated sales through cross-selling opportunities.

For more information, visit www.volparasolutions.com

VHT uses the following definitions:

Annual Recurring Revenue (ARR): The snormalised amount of cash reasonably expected to be booked for the next 12 months based on the contracts signed previously, and assuming installation upon order.

Percentage of US women: Approximately 39M a year are imaged in the United States, most of them screening. The percentage we give is an estimate of the number of women who are imaged using at least one of Volpara's suite of products. This should be considered indicative and not definitive.
