- ▶ COVID-19 precautions maintained to protect staff while ensuring minimal impact on projects and preserving of cash.

### Corporate

- ▶ A\$2.1 Million cash reserves as at 30<sup>th</sup> June 2020
- ▶ Centrex continues to reduce operational costs and ongoing expenditure.

This quarterly activities report and Appendix 5B has been approved for release to the ASX by the Board of Centrex.

## 1. ARDMORE PHOSPHATE ROCK PROJECT, QLD

Work continues on the Company's high grade low impurity Ardmore Phosphate Project. With recently-received information regarding projected commodity prices and delays associated with the Covid 19 pandemic, Centrex is revising the Ardmore Phosphate Project DFS to include updated financial parameters. The Covid 19 pandemic continues to generate uncertainty regarding future phosphate prices, exchange rates and state and country lock-downs and therefore project construction timelines, making forecasting outcomes difficult.

Recent CRU report on phosphate pricing indicates a CFR India price for 71-75% BPL trending towards US\$140-/t by the end of 2022, still broadly in line with the price assumed in the earlier Ardmore DFS. Centrex is currently proposing to commence production of concentrates from the trial mine project at Ardmore in mid to late 2021.

## 2. OXLEY POTASSIUM NITRATE FERTILIZER PROJECT, WA

The Company is working with external consultants to review processing and product alternatives, with the aim of refinement of current processes (or the development of the Oxley Project).

During the quarter, further rationalization of the Oxley tenements was effected with the Full Surrender of E70/4318 and E70/4319.

## 3. GOULBURN GOLD-BASE METAL PROJECT, NSW

Centrex's two exploration licences EL 7388 Goulburn and EL 7503 Archer located in the east Lachlan Fold Belt are proving of interest for gold. Previous exploration within these tenements has mainly focussed on base metal mineralisation. Two priority gold targets have now been identified.

The first gold target is located approximately 10 kilometres to the south of the Cullarín Gold Project, identified as proximate to the interpreted Cullarín Fault Zone, a major regional structural corridor that strikes in an approximate NS orientation down the western side of EL 7388. This structure and the nearby Mountain Ash Gold Mine (mined in 1908), also located within the western portion of EL 7388, makes it a potentially favourable gold exploration target.

The second gold target is along strike of the Collector North copper and gold prospect discovered by Centrex in 2015. This structurally complex area trends NNE of Collector North and contains both Silurian-aged volcanics and Ordovician-aged sediments thought to be prospective for both epithermal and orogenic styles of gold mineralisation.

#### 4. CORPORATE

The Company maintained a cash balance of A\$2.1 million as at 30<sup>th</sup> June 2020, a reduction of \$0.22 million from the prior quarter reflecting ongoing administration running costs and Ardmore project costs.

#### 5. TENEMENTS

The Company and its wholly owned subsidiaries hold the following tenements and leases as at 30 June 2020;
