Company commentary

Company performance for the month was -1.6%, underperforming the benchmark which returned -0.5% for the month. The key contributors and detractors are detailed under the Portfolio Commentary section below.

The Company continues its accelerated on-market buy-back and as at the end of June had bought back \$61.0m of shares at an average price of \$0.96 per share, equivalent to a volume weighted average NTA discount of 13.9%.

The APL discount to NTA as at 3rd July 2020 was 13.8%. NTA discounts continue to be a challenge for ASX listed global equity LICs with the average NTA discount for those LICs with assets greater than \$200m of 14.6% (per Taylor Collison estimates) as at 3rd July 2020.

Market commentary

Global equities continued to rebound in June (+3.2% in USD, -0.5% in AUD following strength in AUD) as global economic data improved as COVID-19 restrictions eased. Cyclical sectors such as Consumer Discretionary, Materials and Financials performed well in response to re-opening. Persistent growth in US infections from mid-June, however, saw investors rotate back into growth over low multiple – or value – stocks. Consequently, Technology remained the strongest sector, whilst Utilities, Healthcare and Energy lagged.

Regional government response to the virus spread was the key driver of equity performance. Asian equities (+1.2%) outperformed with EM Asia (+4.4%), supported by the weaker US dollar. Chinese equities (+5.4%) led as activity normalised with a backdrop of ongoing policy support. European equities rose (+0.3%) as the region successfully contained the virus spread and the European Central Bank delivered further easing.

US equities underperformed (-1.4%) despite improving economic data, as the relaxed lockdown measures and nationwide protests led to a pickup in infections. Joe Biden took the lead over Donald Trump in the polls ahead of the November 2020 elections.

Elsewhere, Oil rose 9% on better demand prospects. Gold reached levels not seen since 2012 given central bank policy.

Portfolio commentary

Key contributors to performance included:

- Infrastructure/Property Developed Markets (DM) cluster notably Simon Property Group on malls reopening, strong retail sales and traffic approaching pre-COVID levels. SPG guided a full year cash dividend equivalent to ~8% yield versus peers paying stock dividends.
- Online Services Emerging Markets (EM) cluster, notably Tencent on strong mobile gaming revenue, a deep pipeline of games for release, e-commerce initiatives and a potential deal with an online video platform which could see Tencent dominate long form video.
- Connectivity/Compute cluster including Samsung Electronics and Qualcomm as the market takes a constructive view on 2021 handset demand which is positive for memory and semiconductor demand/prices.

Key detractors to performance included:

- Shorts, which can act as a headwind in upward moving markets.

- Healthcare cluster, including Merck and Medtronic. Concerns over Keytruda concentration should be offset by progress in Merck's vaccine business, expanding drug pipeline and animal health optionality. While accelerating infections may impact elective procedures, Medtronic's pipeline growth and critical procedures exposure are offsets.
- Uber (Online Services DM) as the merger with Grubhub did not proceed. Despite this, Uber Eats remains a leading food delivery business and ride hailing alone justifies Uber's valuation.
