Net Tangible Assets & Monthly Investment Report

Gross Dividend Yield (p.a.)

6.21%

Company commentary

- Portfolio holdings resilient despite tough environment
- Strong month for base and precious metal miners

Second quarter earnings season began in earnest during July. Many portfolio holdings reported sales and earnings that - despite the tough environment - held up better than the market's expectations (and in some cases management's own expectations).

The European banking sector was the general exception as considerable uncertainty remains around required credit-loss provisions.

Our mining holdings were July's strongest performers, driven by operational resilience and higher commodity prices. Gold was the standout, to which we have exposure through two avenues. Firstly, through pure-play gold miners such as Newmont, the world's largest gold miner and a relatively low-cost producer.

Newmont has the advantages of a stable ore grade and production profile in an industry with declining ore grades, increasing capital intensity and supply difficulties. The second avenue is through base metal miners such as Freeport-McMoRan, which extracts a significant gold by-product alongside its primary copper product.

Another strong performer was KKR, which rose through July after agreeing to acquire life insurer Atlantic Financial. The transaction gives KKR the ability to manage Atlantic Financial's large asset book (which exists to match Atlantic's long-dated insurance liabilities) and is a low cost way of raising new assets. KKR follows other alternative managers such as Apollo which have already implemented the same strategy.

Net Tangible Asset (NTA) backing per ordinary share (After fees and expenses, all figures are unaudited) ¹	July 2020
NTA before tax accruals	\$ 1.1443
NTA after tax (excluding deferred tax assets)	\$ 1.1567

Company performance (net of fees) ²	1 Month	1 Year	3 Years p.a.	5 Years p.a.	Since inception p.a.	Total Return
PM Capital Global Opportunities Fund	0.3%	-8.6%	3.7%	3.1%	8.0%	66.4%

1. Past performance is not a reliable indicator of future performance. 2. Performance adjusted for capital flows including those associated with the payment of dividends and tax, share issuance as a result of option exercise and the dividend reinvestment plan, and including the value of franking credits.

PM Capital Limited (‘the Manager’), founded in 1998, is a leading Australian based fund manager that has successfully achieved its goal of building long term wealth for its clients by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875), which began trading of the ASX on 12 December 2013, provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company.

Managed by PM Capital (AFSL 230222), the aim is to create long term wealth through a concentrated portfolio of around 40 global companies that it believes are trading at prices different to their intrinsic values.

PM Capital has been operating its global investment strategy via an unlisted fund since October 1998. This unlisted fund's performance adjusted to reflect PGF's fee structure has produced a total pre-tax return of 590% vs the MSCI World Net Total Return Index (AUD) of 187% to 31 July 2020.

Manager's comparable track record

Who manages the Company's portfolio?

The Portfolio Manager for the Fund and CIO is Paul Moore. Paul is supported by a team of experienced investment analysts.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding

and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 34 years.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company's portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. The portfolio only holds those stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: The Manager has a significant investment in the Company - it invests with and for you.
