Haldor Topsoe and Worley enter alliance to provide sulphur technology and specialist services

Haldor Topsoe A/S (Haldor Topsoe) and Worley have entered a strategic global alliance to provide technology and specialist services for the removal and recovery of sulphur using acid recycle streams. Under the alliance, Haldor Topsoe and Worley Comprimo® will license TopClaus® technology together.

TopClaus® combines the industry-standard Claus process with Haldor Topsoe's Wet gas Sulfuric Acid (WSA) technology to create an enhanced service offering which optimizes operating costs and reduces sulphur emissions.

Worley Comprimo® provides specialist gas treating and sulphur technology services including technology selection, engineering, design, integration and operations expertise.

Worley Comprimo® was formed following Worley's acquisition of the Jacobs Energy, Chemicals and Resources division in April 2019.

The services will be executed by Worley's teams from The Hague, London, Monrovia and Calgary with support from Worley's Global Integrated Delivery team in India.

"As a global professional services company headquartered in Australia, and consistent with Worley's purpose of delivering a more sustainable world and our increasing focus on sustainability, we are pleased Haldor Topsoe has engaged Worley in this strategic global alliance. Our combined sulphur capabilities support our customers to meet their sustainability goals and this alliance is an example of how we can work in partnership to support reducing our customers' emissions", said Chris Ashton, Chief Executive Officer of Worley.

Authorised for release by Nuala O'Leary, Group Company Secretary.
