## PORTFOLIO PERFORMANCE

	3 m	1 Y	3 Y	5 Y	INCEPTION
ECP Portfolio <sup>^</sup>	33.2%	22.7%	20.0%	17.2%	15.2%
ASX All Ordinaries Index	17.4%	-10.4%	1.4%	1.9%	1.1%
<sup>^</sup> Source: ECP Asset Management. Gross performance before impact of fees, taxes and charges. Past performance no predictor of future returns.					

During the quarter, the portfolio performed extremely well (+33.2%) as shown above with the Company's Net Tangible Asset Value (NTA), as at 30 June 2020 (before estimated tax on unrealised gains) closing at 136.9 cents per share, up by 27.8% on the prior quarter. This compares with a 17.4% increase in the ASX All Ordinaries Index over the quarter.

## INVESTMENT ACTIVITY

During the quarter, we added Audinate (ASX: AD8), IDP (ASX: IEL) and Lifestyle Communities (ASX: LIC) to the portfolio. We removed The A2 Milk Company (ASX: A2M) from the portfolio as the company had been included in the ASX50 Index and the ECP portfolio is restricted to investing in companies outside of the ASX50 Index.

## MARKET COMMENTARY

After the fastest 30% decline in history which occurred in the March quarter, global markets were very strong over the June quarter producing the largest 50-day advance. This was driven by a number of key factors;

- Massive Government stimulus aimed at reducing the impact of COVID-19 on households.
- Regulatory relaxation on certain sectors to ensure that the hardship of an economic shutdown was minimised. This has been predominantly aimed at the Financial Sector.
- The gradual relaxation of social distancing rules has assisted in improving overall sentiment in the economy.
- A surge in technology related applications as individuals, households and businesses embraced the accelerated shift to online life.

These factors all saw markets post record returns for the quarter with US labour market and retail data supporting renewed optimism. The technology sector was particularly strong after what had been a substantial fall in the March Quarter. The Nasdaq was up 30.63% during the quarter and the S&P 500 was up 19.95%. Large technology names like Apple (+43.46%), Amazon (+41.50%), Facebook (+36.13%) and Google (+22.04%) really drove the rally as investors acquired not only technology exposures, but exposures to quality stocks that would benefit from an accelerated shift to an online world.

Australia has been one of the lucky countries, with lockdown measures proving to be highly successful in containing the virus with the focus now turning to strategies for economic recovery. It is worth noting that the financial system in Australia is in much better shape and the Government and Regulators are supportive in terms of their attempts to ensure a smooth recovery with the Reserve Bank of Australia holding its interest rate steady at 0.25%.

The Australian market delivered a solid performance with the ASX All Ordinaries Index up 17.4%. Contributions across sectors in Australia were vastly different. The leading contributors included; Information Technology +48.67%, Consumer Discretionary +30.11% and Energy +28.04%. The largest detractors included; Health Care +2.30%, Utilities +4.09% and Consumer Staples +7.17% - all sectors that performed strongly over the June quarter. The Midcap 50 performed strongly with the index up 30.14%, evenly spread between Industrials and Resources while the Small Ordinaries was also strong, up 23.47%.

## PORTFOLIO CHARACTERISTICS (as at 30 June 2020)

### ECP QUARTERLY REPORT - UPDATE:

During the June quarter the Investment Manager presented an update to Investors in a short video hosted by Copia, and now available on Youtube. Given the market uncertainty related to COVID-19 the video format provides another channel for the Investment Manager to keep Investors up to date. More similar activity is planned for the next quarter.
