

ASX RELEASE

Volpara Health's Breast Health Platform selected by US Radiology Specialists

Wellington, NZ, 18 December: Volpara Health Technologies ("Volpara," "the Group," or "the Company"; ASX: VHT), a health technology software company whose integrated breast care platform assists in the delivery of personalised patient care, today advises that the major customer contract it renewed and extended in Q2 FY21 is with the US Radiology Group (refer to Q2 Business Update [here](#)).

The contract is for a five year term for delivery and ongoing use of the Volpara Breast Health Platform.

"We are now pleased to be able to announce publicly that the major customer that moved to our integrated breast care platform is US Radiology, a very ambitious and acquisitive group in the US. Our partnership will see Volpara's Breast Health Platform driving the delivery of high-quality breast imaging outcomes and supporting patient-first healthcare. This an important customer win and we expect our relationship to grow, in line with US Radiology's rapid expansion," said Volpara Group CEO Dr Ralph Highnam.

US Radiology is a fast-growing partnership of physician-led sub-specialised radiology groups dedicated to providing exceptional patient care. US Radiology brings together high-quality sub-specialised radiologists with leading outpatient operational expertise, infrastructure, and state-of-the-art technology support.

US Radiology comprises more than 280 radiologists, 3100 team members, and 145 outpatient imaging centres across 14 states in the United States.

Volpara has issued a press release, 'US Radiology Selects Volpara Health to Drive Quality Breast Imaging Across the Network'. Please [view the release here](#) for more information.

About Volpara Health Technologies Limited (ASX: VHT)

VHT is a health technology software company founded in 2009 on research originally conducted at Oxford University. VHT's clinical functions for screening clinics provide feedback on breast density, compression, dose, and quality, while its enterprise-wide practice-management software helps with productivity, compliance, reimbursement, and patient tracking.

VHT's technology and services have been used by customers and/or research projects in 39 countries and are supported by numerous patents, trademarks, and regulatory clearances, including FDA clearance and CE marking. Since its listing on the ASX in April 2016, VHT has raised A\$132 million, including A\$37 million in April/May 2020. VHT is based in Wellington, New Zealand.
