Company commentary

Company performance for the month was -0.3%, underperforming the benchmark which returned -0.1% for the month. The key contributors and detractors are detailed under the Portfolio Commentary section below.

The NTA discount at which the Company's shares trade remained steady at approximately 10% during the month. The combination of improved investment performance of the portfolio and the Conditional Tender Offer (CTO) that if triggered in October 2021, would result in an off market buy-back of up to 25% of the Company's shares at post-tax NTA less 2%, are both expected to continue to drive an improvement in the NTA discount during 2021.

The Company wishes shareholders a Happy New Year and thanks shareholders for their support in 2020, a strange year which saw the Company's share price start and end the year at the same level of \$1.04 per share. This 'stability' in the share price masks the volatile global equity market experienced during the year which saw the Company's share price touch a low of \$0.805 on 23rd March 2020 as global markets reacted to the onset of COVID-19. The Company is pleased to report that the Company performance was up 3.5% for the year. Shareholders received a combined interim and final dividend for FY2020, paid during the year of 4.5c per share.

Market commentary

Global equity strength continued in December (+4.6% in USD, -0.1% in AUD following US dollar weakness) as COVID-19 vaccine optimism continued to boost sentiment. Global cyclical stocks outperformed, however investors still exhibited stylistic preference for growth and momentum over low multiple - or value - stocks. Materials, Information Technology and Financials outperformed, whilst Utilities and Industrials lagged.

Emerging Markets (+2.5%) broadly outperformed, led by Korea (+11.3%), supported by continued weakness in the US dollar (DXY -2.1%) and optimism over the global economic rebound. China lagged (-0.5%) as the Chinese regulator announced anti-competitive policies and the US added more Chinese companies to a trade blacklist, prohibiting US persons from investing in companies with links to China military.

US equities (-0.6%) marginally underperformed, but were supported by the passage of another \$900bn stimulus package in response to the pandemic and the Fed's commitment to easy policy. Europe (0.0%) performed in line as the UK and EU finalised a Brexit deal, offsetting concerns over further lockdowns as virus cases escalated.

Elsewhere, Brent Crude rose strongly (+8.2% in USD) on demand optimism and Gold (+7.1% in USD) rebounded on higher inflation expectations.

Portfolio commentary

Key contributors to performance included:

- Industrials cluster including Siemens and Norsk Hydro, following the outperformance of global cyclicals. Norsk, in particular, has rallied with the ongoing recovery in aluminium prices.
- Connectivity/Compute, notably Samsung Electronics on further evidence of improving supply-demand dynamics in DRAM memory due to limited supply growth, which bodes well for DRAM memory prices in 2021.

- Capital One Financial, Consumer Cyclical Developed Markets (DM), continued its strong performance in a month where US Financials outperformed on the back of rising yields, a successful stimulus package and greater clarity on distributions from the Federal Reserve.

Key detractors to performance included:

- Online Services EM, notably Alibaba and Tencent on continued regulatory pressure to prevent anti-competitive behaviour. We remain constructive on Chinese internet given the growth opportunity for e-commerce in lower tier cities and in new categories, and low penetration of digital ads.
- Healthcare cluster notably Sanofi, which indicated a six-month delay to their (second generation) COVID-19 vaccine to improve the immune response in the elderly.
- ING Groep, Consumer Cyclical DM, fell along with other European banks following the ECB's decision to limit capital distributions, including a recommendation to delay distributions until September 2021.
