Significant changes in the state of affairs

At a General Meeting on 1 August 2019, Shareholders resolved to approve the sale of the Company's assets and the distribution of capital to Shareholders. An initial distribution of \$0.52 per share was paid to Shareholders on 21 August 2019 and a second distribution of \$0.22 per share was paid to Shareholders on 3 October 2019.

On 16 March 2020, the Company announced that it had entered into an agreement with Lanyon Asset Management Pty Limited ("Lanyon") in relation to the future of 8EC. The Board determined that the agreement with Lanyon was superior to completing the existing Sale and Distribution Proposal which was planned to conclude with the wind-up of the Company.

Significant changes in the state of affairs (continued)

The securities of the Company were suspended from quotation, following the announcement that it had entered into an agreement ("Lanyon Proposal") with Lanyon with respect to a proposed recapitalisation. The suspension was lifted on 21 September 2020. From 15 October 2020 to date, the Company has been suspended from official quotation. The Company is working to meet the ASX's re-compliance requirements for admission and quotation.

Further to the agreement announced on 16 March 2020 and in accordance with the resolutions passed at the General Meeting on 1 August 2019, a third distribution of capital of \$0.05 per share was paid to Shareholders on 28 April 2020.

The Company's remaining listed investment (Novonix) was sold in July 2020.

On 29 July 2020, the Company announced that in accordance with the resolutions passed at the General Meeting on 1 August 2019, and following the sale of the Company's remaining listed investment in early July 2020, a fourth distribution of capital of \$0.02 per share was paid to Shareholders on 11 August 2020.

On 15 September 2020, a Notice of Meeting (NOM) was issued to be held on 16 October 2020. The meeting was postponed until 6 November 2020, and then subsequently until 13 November 2020 due to a delay in Net Tangible Asset (NTA) calculation pending receipt of FY2020 financial statements for Fremantle Octopus Group (FOG), which constitutes the Company's remaining share investment.

On 5 November 2020, the Company announced it had reduced the carrying value of the FOG investment from \$999,999 to \$842,423 following receipt of a report from Hall Chadwick. The revised valuation was reflected in the 31 October 2020 NTA.

On 11 November 2020, a revised indicative timetable attached to the Notice of Meeting was announced. On 13 November 2020, the following resolutions were all passed:

- (1) Change to nature and scale of activities
- (2) 15% placement of Company's shares to Lanyon
- (3) Consolidation of capital
- (4) Buy-back
- (5) Capital raising
- (6) Approval to issue Capital Raising Shares to Jonathan Sweeney if he subscribes for the shares under offer
- (7) Approval to issue Capital Raising Shares to Tony McDonald if he subscribes for the shares under offer
- (8) Approval to issue Capital Raising Shares to Robin Burns if he subscribes for the shares under offer

On 18 November 2020, the Company issued 6,152,716 placement shares at \$0.02289 per share to Lanyon (pre-consolidation).

On 30 November 2020, the Company announced the equal access share buy-back included in the resolutions passed above. The buy back was a continuation of the Company's commitment to implement the Sale and Distribution Proposal by providing shareholders who did not wish to fully participate in the new investment strategy with a way to partially exit their investment in the Company at NTA. The total number of shares proposed to be bought back was 150,088 at \$0.9573 per share (post-consolidation). The offer period was from 10 December 2020 to 29 December 2020.

On 1 December 2020, the Company announced it had 1,150,656 fully paid ordinary shares on issue following the implementation of the 41 for 1 share consolidation during November.

On 24 December 2020, the Company announced that the 8EC Board considered the market conditions for capital raising by listed investment companies had worsened in the past few months and were not currently favourable. In light of this, the Board resolved to delay the capital raising until such time as market conditions improve.

The Board will continue to monitor market conditions and will provide an update to shareholders, considering all options for the Company's future, by 30 June 2021. The Company also announced that over the first quarter of 2021, it would look to refresh the composition of the Board. This is likely to include the resignation of some of the long standing incumbent directors and the appointment of new directors who will take the Company forward as it begins its next stage.

Significant changes in the state of affairs (continued)

There were no significant changes in the state of affairs of the Company during the half-year ended 31 December 2020, other than already disclosed above.

The Company also announced that over the first quarter of 2021, it would look to refresh the composition of the Board. 2 Significant accounting policies

The principal accounting policies adopted in the preparation of these interim financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated. The interim financial statements are for the entity 8IP Emerging Companies Limited.

(a) Basis of preparation

These interim financial statements for the half-year reporting period ended 31 December 2020 have been prepared in accordance with Australian Accounting Standards AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*. Compliance with AASB 134 ensures compliance with International Financial Reporting Standards IAS 34 *Interim Financial Reporting*.

The Company is a for-profit entity for the purpose of preparing the interim financial statements.

These interim financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, these interim financial statements are to be read in conjunction with the annual report for the year ended 30 June 2020 and any public announcements made by 8EC during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

2 Significant accounting policies (continued)

(a) Basis of preparation (continued)

As at the date of preparing these interim financial statements, and in the context of a potential recapitalisation of the Company or a realisation of assets, these financial statements have been prepared on a going concern basis of accounting.

(i) Adoption of new and revised accounting standards

The Company has adopted all of the new and revised Standards and Interpretations issued by the Australian Accounting Standards Board that are relevant to its operations and effective for the current reporting half-year period.

(b) Rounding of amounts

The Company is of a kind referred to *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* issued by the Australian Securities and Investments Commission, relating to the 'rounding off' of amounts in the interim financial statements. Amounts in the interim financial statements have been rounded off to the nearest dollar in accordance with that *ASIC Corporations Instrument*, unless otherwise indicated.

3 Fair value measurements

This note provides an update on the judgements and estimates made by the Company in determining the fair values of the financial instruments since the last annual financial report.

The Company measures and recognises the following financial assets at fair value on a recurring basis:

- Financial assets at fair value through profit or loss (FVTPL)

The Company has no assets or liabilities measured at fair value on a non-recurring basis in the current reporting period.

(a) Fair value hierarchy

AASB 13 requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- (a) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1),
- (b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly (level 2), and
- (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

(i) Fair value in an active market (level 1)

The fair value of financial assets and liabilities traded in active markets is based on their quoted market prices at the end of the reporting period without any deduction for estimated future selling costs.

The Company values its investments in accordance with the accounting policies set out in Note 2 to the financial statements. For the majority of its investments, the Company relies on information provided by independent pricing services for the valuation of its investments.

The quoted market price used for financial instruments held by the Company is the last sale price.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

3 Fair value measurements (continued)

(a) Fair value hierarchy (continued)

(ii) Fair value in an inactive or unquoted market (level 2 and 3)

The fair value of financial assets and liabilities that are not traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, reference to the current fair value of a substantially similar other instrument, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the end of the reporting period applicable for an instrument with similar terms and conditions.

For other pricing models, inputs are based on market data at the end of the reporting period. Fair values for unquoted equity investments are estimated, if possible, using applicable price/earnings ratios for similar listed companies adjusted to reflect the specific circumstances of the issuer.

Some of the inputs to these models may not be market observable and are therefore estimated based on assumptions. The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Company holds.

(iii) Recognised fair value measurements
