

Soon Mining Limited
ABN 45 603 637 083

**Unaudited Annual Accounts
and Notification Regarding Amended ASIC Relief**

31 March 2021

Soon Mining Limited (ASX: SMG) ("SMG" or the "Company") advises that it is relying on the relief granted by ASIC in ASIC Corporations (Amendment) Instrument 2020/1080 dated 25 November 2020 (the "Amended ASIC Relief") to extend the lodgment date for its audited annual accounts and the other documents required to be lodged with ASIC under section 319 of the Corporations Act.

The Company advises that the audit of SMG's annual accounts is well progressed, however remains incomplete as at the date of this announcement. The Company's unaudited annual accounts for 31 December 2020 are enclosed with this ASX announcement.

In accordance with the Amended ASIC Relief and ASX's "Class Waiver Decision – Extended Reporting and Lodgment Deadlines" under listing rule 18.1, the Company's audited annual accounts will be lodged on the earlier of the date of finalisation and 30 April 2021 (being within 4 months after year-end) and will immediately make a further announcement to the market if there is a material difference between its unaudited annual accounts and its audited annual accounts.

Soon Mining Limited
Chairman's report
31 December 2020

Soon Mining Limited ("the Company" or "SMG") is pleased to present the Company's Annual Report for the financial year ended 31st December 2020.

As we all know, 2020 was a year of severe epidemic situation. So far, the whole world has suffered from COVID-19, and all countries are affected by different levels, including Ghana. Even so, within the difficult environment, the Company has made significant progress during this period.

After the public hearing was successfully held on 5 February 2020, the Company completed the follow-up EIS report and submitted it to EPA in June 2020. The Company also continued to keep close and good communication with the village chiefs, community representatives and local youth leaders and reports the relevant results to the EPA. On 10 November 2020, the Company received the letter from EPA regarding the review results of EIS report and invoices for Processing Fee and Permit Fee. According to the results of the technical review, the EIS report has been revised and re-submitted to EPA. At the same time, the Company has paid the fees required by the EPA in January 2021. On 17 February 2021, the Company was awarded its EPA permit for its wholly-owned Kwahu Praso Project. This permit allows the Company to commence with the construction and operation of the proposed mining area.

In addition, the Company has also prepared Mining Operating Plan and Emergency Response Plan in advance and submitted them to the Minerals Commission. Soon after paying the permit fee, the Company also obtained the Mining Operating Permit from the Minerals Commission. Together with the Operating Permit of Kwahu South District Assembly and Ashanti Akim South Municipal Assembly, the Company has so far obtained all necessary permits for mining activities.

At this stage, the Company has started its necessary preparation for its mining activities, including purchasing land for the use of mineral processing plant, recruiting new employees and management personnel, and negotiating contracts with the equipment companies to lease excavators and payloaders, etc. It is expected that after 3-6 months of preparation period, the Company is expected to commence mining activities and gold production before July 2021.

Going forward, we are optimistic that the Company can begin its mining activities and gold production in 2021.

In regard to the potential oil activities, the Company is still seeking possible partners. We are hopeful that in 2021 the Company can launch both its gold and oil businesses simultaneously, and therefore start generating revenues for its shareholders, who have support the company during the early stages.

On behalf of the Board, I would like to thank all staff and express our gratitude to our shareholders for your continuing support of SMG.

Ching-Tiem Huang
Chairman

Soon Mining Limited
Directors' report
31 December 2020

The directors present their report on the consolidated entity (referred to hereafter as the Group), consisting of Soon Mining Limited ("the Company") and the entities it controlled at the end of, or during, the year ended 31 December 2020.

Directors

The following persons were directors of Soon Limited during the whole of the financial year and up to the date of this report, unless otherwise stated:

Ching-Tiem Huang
Frederic Ferges
Kevin Kay Ban Gan (appointed on 19 October 2020)
Ching-Ling Chi (resigned on 31 October 2020)

Particulars of each Director's experience and qualifications are set out later in this report.

Principal activities

During the financial year, the principal continuing activities of the Group consisted of mining and related activities, including exploration, and preparation of mine site.

Review of operations

The loss of the Group after providing for income tax amounted to \$773,254 (2019:930,609).

The net (liabilities)/assets of the Group as at 31 December 2020 amount to (\$453,539) (2019: \$433,004). These net (liabilities)/assets are predominately made up of cash and cash equivalents, deposits, fixed assets and capitalised exploration costs.

Dividends

There were no dividends paid, recommended or declared during the current financial year.

Options

No options over issued shares or interest in the Company were granted during or since the end of financial year and there no operations outstanding at the date of this report.

Indemnity and insurance of Auditor

The Company has not, during or since the year end of the financial year, indemnified or agreed to indemnify the auditor of the Company or any related entity against a liability incurred by the auditor.

During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the Company or any related entity.

Proceedings on Behalf of the Company

No person has applied for leave of Court to bring proceedings on behalf of the Company or intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or any part of those proceedings.

The Company was not a party to any such proceedings during the year.

Non audit services

Details of the amounts paid or payable to the auditor for non-audit services provided during the financial year by the auditor are outlined in note 23 to the financial statements.

Officers of the Company who are former partners of RSM Australia Partners

There are no officers of the Company who are former partners of RSM Australia Partners.

Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 will be set out on the final annual report.

Significant changes in the state of affairs

On 5 February 2020, the public hearing held in KwahuPraso had successfully concluded. The public hearing was attended by dozens of chiefs from Kwaku and Asanti, whom were headed by Kwahu Obohene, along with community representatives from 13 major villages in the mining concession and over 1,000 local residents. The EPA promoted the government's policies and position and SMG explained its mining policies and future social responsibility plans for the villages and communities in the mining concession area.

On 8 June 2020, SMG submitted the EIS report to the EPA and made a 21-day announcement was launched in Ghana newspapers and relevant government departments.

On 30 October 2020, the securities of SMG was suspended from quotation under Listing Rule 17.3, due to insufficient JORC Code and Chapter 5 of the ASX Listing Rules Chapter 5 disclosure.

On 10 November 2020, SMG received the letter from EPA regarding the review results of EIS report and invoices for Processing Fee and Permit Fee.

On 17 February 2021, SMG was awarded its EPA permit for its wholly-owned Kwahu Praso Project. This permit allows SMG to commence with the construction and operation of the proposed mining area.

Matters subsequent to the end of the financial year

In January 2021, the EIS report has been revised and re-submitted to EPA according to the results of the technical review and SGM has paid the fees required by the EPA.

On 17 February 2021, SMG was awarded its EPA permit for its wholly-owned Kwahu Praso Project. This permit allows SMG to commence with the construction and operation of the proposed mining area.

On 24 February 2021, SMG obtained the Mining Operating Permit from the Minerals Commission. Together with the Operating Permit of Kwahu South District Assembly and Ashanti Akim South Municipal Assembly, SMG has so far obtained all necessary permits for mining activities.

At this stage, SMG has started its necessary construction for the preparation of its mining activities.

The consolidated entity is aware of the impact that COVID-19 (Coronavirus) is having on the Australian and World economy.

The Directors have considered the impact of the Coronavirus on the consolidated entity's recorded asset values and the Directors are of the view that there has been no material impact on the consolidated entity's recorded asset values as at or subsequent to the reporting date.

As at the date of these financial statements, the consolidated entity is not aware of any impact that has occurred in relation to any of its staff, contractors or key suppliers.

Given the negative impact that has occurred and is continuing to occur on world financial markets as a result of the Coronavirus, the Directors are of the view that there is the potential that the Coronavirus will have a significant negative impact on the consolidated entity's ability to secure the required debt and equity financing for its proposed current and future projects, including but not limited to, the consolidated entity's proposed Kwahu Praso Gold Project. At the date of these financial statements, this impact is not able to be fully assessed or measured.

There are no other matter or circumstance has arisen since 31 December 2020 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

Likely developments and expected results of operations

The Group will continue to pursue its gold mining project in Ghana, West Africa.

Environmental regulation

The Group is subjected to significant environmental regulation with respect to its exploration and mining activities in Ghana, West Africa.

The Group is not aware of any breach of environmental regulations during or since the end of the financial year.

On behalf of the directors

Ching-Tiem Huang

Director

Date: 31 March 2021

Remuneration report

The Directors are please to present the Soon Mining Limited Remuneration Report which sets out remuneration information for the Group's Non-Executive Directors, Executive Directors and other Key Management Personnel ("KMP").

The report contains the following sections:

- a) Remuneration policy
- b) Use of remuneration consultants
- c) Executive pay and benefits
- d) Relationship between remuneration and Group performance
- e) Employment Details of Members of Key Management Personnel
- f) Remuneration Expense Details for the Year Ended 31 December 2020
- g) Non-Executive Director Remuneration policy
- h) Securities received that are not performance-related
- i) Service agreements
- j) Options and Rights granted as remuneration
- k) KMP Shareholdings
- l) Other Equity-related KMP Transactions
- m) Loans from key management personnel
- n) Other transactions with KMP and/or their related parties

a) Remuneration Policy

The Board's policy for determining the nature and amount of remuneration for KMP of the entity is designed to:

- Attract and retain senior executives and Directors;
- Avoid paying excessive remuneration;
- Remunerate fairly having regard to market conditions and individual contribution; and
- Align the interests of employees and Directors with that of the Group.

All remuneration paid to KMP is valued at the cost to the Group and expensed.

The Board's policy is to remunerate Non-Executive Directors at market rates for time, commitment and responsibilities. The Board determines payments to the Non-Executive Directors and reviews their remuneration annually, based on market practice, duties and accountability. Independent external advice is sought when required. The maximum aggregate amount of fees that can be paid to Non-Executive Directors is subject to approval by shareholders at the annual general meeting. Non-executive Directors do not receive performance-based pay. There are no retirement allowances for Non-Executive Directors.

b) Use of remuneration consultants

The group has not engaged the services of any remuneration consultants during the current or prior financial years.

c) Executive pay and benefits

Executive payments currently consist of consultancy payments to the Directors only. Executive Directors do not receive performance-based pay.

Throughout the year, all remuneration for key management personnel was fixed and not linked to performance.

There were no cash bonus, performance-related bonus, non-monetary benefits or share-based elements of remuneration in the year ended 31 December 2020.

d) Relationship between remuneration and Group performance

The link between remuneration, Company performance and shareholder wealth generation is tenuous, particularly in the exploration and development stage of a mining company.

Share prices are subject to the influence of international economic factors and market sentiment toward the sector; increases and decreases may occur quite independent of executive performance or remuneration.

e) Employment Details of Members of Key Management Personnel

The following table provides employment details of persons who were, during the financial year, members of KMP of the Company. The table also illustrates the proportion of remuneration that was performance and non-performance based.

	Position Held as at 31 December 2020 and any change during the year	Proportions of elements of remuneration related to performance (other than options issued)		Proportions of elements of remuneration not related to performance
		Non-salary cash-based incentives	Shares/Units	Fixed Salary/Fee
Key Management Personnel		%	%	%
Ching-Tiem Huang	Chairman and Managing Director	-	-	100
Frederic Ferges	Non-executive Director	-	-	100
Kevin Kay Ban Gan	Non-executive Director and Company Secretary	-	-	100
Ching-Ling Chi	Executive Director and Chief Financial Officer	-	-	100

f) Remuneration Expense Details for the Year Ended 31 December 2020

The following table of benefits and payments represents the components of the current year remuneration expenses for each member of KMP of the Company. Such amounts have been calculated in accordance with Australian Accounting Standards:

	Short term benefits		Post-employment benefits		
	Salary & Fees	Other	Pension and Superannuation	Other	Total
2020					
Key Management Personnel	\$	\$	\$	\$	\$
Executive Directors					
Ching-Tiem Huang	156,000	-	-	-	156,000
Ching-Ling Chi	124,000	-	-	-	124,000
Non-Executive Directors					
Frederic Ferges	29,700	-	-	-	29,700
Kevin Kay Ban Gan	-	-	-	-	-
Total	309,700	-	-	-	309,700

	Short term benefits		Post-employment benefits		
	Salary & Fees	Other	Pension and Superannuation	Other	Total
2019					
Key Management Personnel	\$	\$	\$	\$	\$
Executive Directors					
Ching-Tiem Huang	165,715	-	-	-	165,715
Ching-Ling Chi	149,200	-	-	-	149,200
Non-Executive Directors					
Jiahui Jeremiah Thum	29,700	-	-	-	29,700
Frederic Ferges	7,300	-	-	-	7,300
Total	351,915	-	-	-	351,915

g) Non-Executive Director Remuneration Policy

On appointment to the board, all non-executive Directors enter into an appointment agreement with the Company. The agreement sets out remuneration, terms of appointment and binds the Director to the Board policies and code of conduct.

Non-executive Directors receive a board fee which includes remuneration for chairing or participating on Board committees.

Non- Executive Directors do not receive performance-based pay. The Chair does not receive additional fees for participating in or chairing committee.

h) Securities received that are not performance related

No members of KMP are entitled to receive securities that are not performance-based as part of their remuneration package.

i) Service agreements

Remuneration and other terms of employment for the Managing Director, Chief Executives Officer, Chief Financial Officer and Executive Officers are formalised in agreements. Contracts with Executives may be terminated by either party with up to one months' notice.

Ching-Tiem Huang, Chairman and Managing Director

Term of agreement - ongoing, commenced 12/1/2015, with a one-month notice period. Base salary, exclusive of superannuation, of \$156,000 per annum, to be reviewed annually by the Board. Agreement is signed with Titanoboa Group Limited, in which Ching-Tiem Huang holds the position of CEO.

Ching-Ling Chi, Executive Director and Chief Financial Officer

Term of agreement - ongoing, commenced 12/1/2015, with a one-month notice period. Base salary, exclusive of superannuation, of \$124,000 per annum, to be reviewed annually by the Board. Agreement is signed with Kirin International Limited, in which Ching-Ling Chi holds the position of Managing Director.

j) Options and Rights granted as remuneration

During the year ended 31 December 2020, no options or rights were granted as remuneration.

k) KMP Shareholdings

The number of ordinary shares in Soon Mining Limited held by each KMP of the Group during the financial year is as follows:

	Balance at start of the year	Grants and remuneration during the year	Issue on Exercise of Options during the year	Additions during the year	Balance at end of year
Ching-Tiem Huang	62,676,865	-	-	-	62,676,865
Ching-Ling Chi	5,000,000	-	-	-	5,000,000
Total	67,686,865	-	-	-	67,676,865

l) Other Equity-related KMP Transactions

There have been no other transactions involving equity instruments other than those described in the tables above relating to options, rights and shareholdings.

m) Loans from key management personnel

During the year, the Directors have provided unsecured loans to the Company as detailed below.

Interest fee loan	\$
Ching-Tiem Huang	111,838
Ching-Ling Chi	54,998
Balance at end of year	166,836

The loans are unsecured and without a set maturity date. Please refer to Note 24 for the movement during the year.

n) Other transactions with KMP and/or their related parties

There were no transactions conducted between the Company and KMP or their related parties, other than those disclosed above and in Note 24 relating to equity, compensation and loans, that were conducted other than in accordance with normal employee, customer or supplier relationships on terms no more favourable than those reasonably expected under arm's length dealings with unrelated persons.

This concludes the remuneration report, which has been audited.

A. Basic Information

Note 1. General Information

The financial report covers the Consolidated Entity of Soon Mining Limited (the “Company”) and its controlled entities (together referred to as the “Consolidated Entity” or “Group”). Soon Mining Limited is a listed public company, incorporated and domiciled in Australia. The Consolidated Entity is a for-profit entity for the purpose of preparing the financial statements.

The following is a summary of the material accounting policies adopted by the Consolidated Entity in the preparation of the financial report. The accounting policies have been consistently applied, unless otherwise stated.

a) Basis of preparation

These general-purpose financial statements have been prepared in accordance with the *Corporations Act 2001*, Australian Accounting Standards and Interpretations of the Australian Accounting Standards Board and International Financial Reporting Standards as issued by the International Accounting Standards Board. The Group is a for-profit entity for financial reporting purposes under Australian Accounting Standards. Material accounting policies adopted in the preparation of these consolidated financial statements are presented below and have been consistently applied unless stated otherwise.

Except for cash flow information, the consolidated financial statements have been prepared on an accruals basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

The financial statements were authorised for issue, in accordance with a resolution of directors, on the 30 April 2021. The directors have the power to amend and reissue the financial statements.

b) Going concern

The financial report has been prepared on a going concern basis. This basis presumes that funds will be available to finance future operations and that the realisation of assets and liabilities will occur in the normal course of business.

As disclosed in the financial statements, the group recorded a loss of \$773,254 and cash outflows from operations of \$144,365 for the year ended 31 December 2020 (2019: loss of \$773,254, cash outflow from operations of \$144,365). The group expects further losses due to the ongoing exploration costs until alluvial gold mining operations are fully established.

The Group's ability to adopt the going concern assumption will depend on the Group being able to manage its liquidity requirement.

The Group is in the process of taking the following actions:

Raising additional capital: The Group is currently in discussions with various parties to provide additional capital or loans;

Successful exploration and subsequent exploitation of the Group's tenements: The Group has obtained EPA permit and related operating permits to start its mining activities. Whether it is self-mining or cooperating with other parties, there will be potentially generating revenue from alluvial gold mining.

Reducing working capital expenditure: The Group is actively managing its working capital expenditure and also and working with its creditors to extend repayment terms.

In the event that the group is unable to secure future funding requirements either through equity raising, shareholders' loan or revenue generated from mining of alluvial gold, there exists a material uncertainty that may cast a significant doubt on the group's ability to continue as a going concern and therefore, the Group may be unable to realise its assets and discharge its liabilities in the normal course of business. Nevertheless, after taking into account the current financial position of the Group, and its ability to raise further capital, the Group has a reasonable expectation that it will have adequate resources to fund its future operational requirements and for these reasons it continues to adopt the going concern basis in preparing the financial report.

The economic impacts of the COVID-19 coronavirus outbreak, which occurred subsequently to the reporting date, remain uncertain. It is possible that there will be subdued economic wide activity during the year ended 31 December 2021. To date, COVID-19 has had minimal impact on the business, however in this environment the directors acknowledge it does have the potential to affect parts of the business, particularly its ability to raise Capital and its ability to start proposed current and future projects, including but not limited to, the consolidated entity's proposed Kwahu Praso Gold Project.

c) Current and non-current classification

Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

Pinnacle Listed Exploration and Mining Limited
Notes to the financial statements
31 December 2020

Note 2. Revenue from contracts with customers

The Group enters into short-term contracts with customers or the mining and sale of gold. The performance obligation is the delivery of the specified quantity of gold to the customer. The Group is not entitled to payment until the delivery of said product has occurred, which is when the customer obtains control of it. Therefore, revenue is recognised at a point in time upon delivery of the gold. No rebates or volume discounts are provided to customers. The product are subject to a statutory warranty and the Group does not offer extended warranties.

Interest income is recognised using the effective interest method.

Good and Services Tax

Revenue, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO).

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the ATO included with other receivables or payables in the statement of financial position.

Cash flows are presented on gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to, the ATO are presented as operating cash flows included in receipts from customers or payments to suppliers.

Note 3. Loss for the year

Foreign Currency Translation and Balances

Functional and presentation currency

The functional currency of the Group is measured using the currency of the primary economic environment in which that entity operates. The consolidated financial statement is presented in Australian dollars, which is the Group's functional currency.

Transaction and balances

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the year-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Exchange difference arising on the translation of monetary items are recognised in profit or loss, except where deferred in equity as a qualifying cash flow or net investment hedge.

	Consolidated 2020 \$	2019 \$
Loss before income tax includes the following specific expenses:		
Legal fees	-	3,353
	=	=
	Consolidated 2020 \$	2019 \$
Timing of revenue recognition		
Goods transferred at a point in time	-	-
	=	=

Exchange differences arising on the translation of non-monetary items are recognised directly in other comprehensive income to the extent that the underlying gain or loss is recognised in other comprehensive income, otherwise the exchange difference is recognised in the profit or loss.

Group companies

The financial results and position of foreign operations whose functional currency is different from the entity's presentation currency are translated as follows:

- Assets and liabilities are translated at exchange rates prevailing at the end of reporting period;
- Income and expenses are translated at average rates for the period; and
- Retained earnings are translated at the exchange rates prevailing at the date of the transaction.

Exchange differences arising on translation of foreign operations with functional currencies other than Australian dollars are recognised in other comprehensive income and included in the foreign currency translation reserve in the statement of financial position. The cumulative amount of these differences is reclassified into profit or loss in the period in which the operation is disposed of.

Note 4. Income Tax

The income tax expense for the year comprises current income tax expense and deferred tax expense.

Current income tax expense charged to profit or loss is the tax payable on taxable income. Current tax liabilities (assets) are measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the year as well as unused tax losses.

	Consolidated	
	2020	2019
	\$	\$
(a) The components of tax expense comprise:		
Current tax	-	-
Deferred tax	-	-
	<hr/>	<hr/>

	Consolidated	
	2020	2019
	\$	\$
(b) Numerical reconciliation of income tax expense to prima facies tax payable		
Loss before tax – continuing operation	(773,254)	(930,609)
- Prima facie tax benefit on loss from ordinary activities before income tax at 30%	(231,976)	(279,183)
Increase/(decrease) in income tax expense due to:		
- Tax adjustment for accounting losses	-	-
- Non-deductible expenses	-	-
- Net temporary and tax losses not recognised	231,976	279,183
	<hr/>	<hr/>
Income tax expense attributable to entity	-	-
	<hr/> <hr/>	<hr/> <hr/>

Current and deferred income tax expense is charged or credited outside profit or loss when the tax relates to items that are recognised outside profit or loss. A deferred tax liability shall be recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from:

- The initial recognition of goodwill; or
- The initial recognition of an asset or liability in a transaction which is not a business combination and, at the time of the transaction, affects neither accounting profit nor taxable profit/(loss)

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled and their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability. With respect to non-depreciable items of property, plant and equipment measured at fair value and items of investment property measured at fair value, the related deferred tax liability or deferred tax asset is measured on the basis that the carrying amount of the asset will be recovered entirely through sale.

Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

Where temporary differences exist in relation to investments in subsidiaries, branches, associates, and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled and it is not probable that the reversal will occur in the foreseeable future.

Soon Mining Limited
Notes to the financial statements
31 December 2020

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are offset where: (a) a legally enforceable right of set-off exists; and (b) the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

The Group is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Group recognises liabilities for anticipated tax audit issues based on the Group's current understanding of the tax law. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

Note 5. Earnings per Share

a) Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the owners of the Company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

b) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

Note 6. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker has been identified as the Board which makes strategic decisions

Identification of reportable segments

The Group has identified its operating segments based on the internal reports that are reviewed and used by the board of Directors (chief operating decision makers) in assessing performance and in determining the allocation of resources. Accordingly, management currently identifies the Group as having only one reportable segment, as at 31 December 2019. There have been no changes in the operating segment during the year. All significant operating decisions are based upon analysis of the Group as one segment. The financial results from this segment are equivalent to the consolidated financial statement of the entity as a whole.

Note 7. Trade and other receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses. Trade receivables are generally due for settlement within 30 days.

The consolidated entity has applied the simplified approach to measuring expected credit losses, which uses a lifetime expected loss allowance. To measure the expected credit losses, trade receivables have been grouped based on days overdue.

Other receivables are recognised at amortised cost, less any allowance for expected credit losses.

Impairment of financial assets at amortised cost

The consolidated entity recognises a loss allowance for expected credit losses on financial assets which are either measured at amortised cost or fair value through other comprehensive income. The measurement of the loss allowance depends upon the consolidated entity's assessment at the end of each reporting period as to whether the financial instrument's credit risk has Increased significantly since Initial recognition, based on reasonable and supportable information that is available, without undue cost or effort to obtain.

Where there has not been a significant increase in exposure to credit risk since initial recognition, a 12 month expected credit loss allowance is estimated. This represents a portion of the asset's lifetime expected credit losses that is attributable to a default event that is possible within the next 12 months. Where a financial asset has become credit impaired or where it is determined that credit risk has increased significantly, the loss allowance is based on the asset's lifetime expected credit losses. The amount of expected credit loss recognised is measured on the basis of the probability weighted present value of anticipated cash shortfalls over the life of the instrument discounted at the original effective interest rate.

For financial assets mandatorily measured at fair value through other comprehensive income, the loss allowance recognised in other comprehensive income with a corresponding expense through profit or loss. In all other cases, the loss allowance reduces the asset's carrying value with a corresponding expense through profit or loss.

	<hr/>	<hr/>
	<u>32,158</u>	<u>37,100</u>

Note 9. Property, plant and equipment

Plant and equipment

Plant and equipment are measured on the cost basis and therefore carried at cost less accumulated depreciation and any accumulated impairment. In the event the carrying amount of plant and equipment is greater than the estimated recoverable amount, the carrying amount is written down immediately to the estimated recoverable amount and impairment losses are recognised either in profit or loss or as a revaluation decrease if the impairment losses relate to a revalued asset. A formal assessment of recoverable amount is made when impairment indicators are present.

The carrying amount of plant and equipment is reviewed annually by Directors to ensure it is not in excess of the recoverable amount from these assets. The recoverable amount is assessed on the basis of the expected net cash flows that will be received from the asset's employment and subsequent disposal. The expected net cash flows have been discounted to their present values in determining recoverable amounts.

The cost of fixed assets constructed within the consolidated Group includes the cost of materials, direct labour, borrowing costs and an appropriate proportion of fixed and variable overheads.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are recognised as expenses in profit or loss during the financial period in which they are incurred.

Depreciation

The depreciable amount of all fixed assets including capitalised leased assets is depreciated on a straight-line basis over the asset's useful life to the consolidated Group commencing from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

Soon Mining Limited
Notes to the financial statements
31 December 2020

The depreciation rates used for each class of depreciable assets are:

Class of Fixed Asset	Depreciation Rate
Motor vehicles	20%
Plant and equipment	20%-33%

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are recognised in profit or loss in the period in which they arise. When revalued assets are sold, amounts included in the revaluation surplus relating to that asset are transferred to retained earnings.

Note 10. Exploration and Evaluation

a) Exploration, evaluation and development expenditure

Exploration, evaluation and development expenditure incurred is capitalised in respect of each identifiable area of interest. These costs are only capitalised to the extent that they are expected to be recovered through the successful development of the area or where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves.

Accumulated costs in relation to an abandoned area are written off in full against profit or loss in the year in which the decision to abandon the area is made. When production commences, the accumulated costs for the relevant area of interest are amortised over the life of the area according to the rate of depletion of the economically recoverable reserves.

A regular review is undertaken of each area of interest to determine the appropriateness of continuing to capitalise costs in relation to that area.

b) Key judgements

Exploration, evaluation and development expenditure

The Group has capitalised exploration expenditure of \$899,198 (2019: \$951,627). This amount includes costs directly associated with exploration. These costs are capitalised until assessment and/or drilling of the permit is complete and the results have been evaluated. These costs include employee remuneration, materials, rig costs, delay rentals and payments to contractors. The expenditure is carried forward until such a time as the area of interest moves into the development phase, is abandoned, sold or sub-blocks relinquished.

Given exploration activities have not yet reached a stage which permits a reasonable assessment of the existence or expenditure there is uncertainty as to carrying value of exploration expenditure. The ultimate recovery of the carrying value of exploration expenditure is dependent upon the successful development and commercial exploitation or, alternatively, sale of interest in the tenements. These are no factors or circumstances which suggest that the carrying amount of remaining exploration and evaluation of assets may exceed recoverable amount.

	Consolidated	
	2020	2019
	\$	\$

Expenditure incurred during the year - additions	33,566	88,803
Foreign exchange on conversion	<u>(85,995)</u>	<u>6,357</u>
Balance at the end of the year	<u>899,198</u>	<u>951,627</u>

Note 11. Deferred Tax Assets and Liabilities

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled and their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability. With respect to non-depreciable items of property, plant and equipment measured at fair value and items of investment property measured at fair value, the related deferred tax liability or deferred tax asset is measured on the basis that the carrying amount of the asset will be recovered entirely through sale. When an investment property that is depreciable is held by the entity in a business model whose objective is to consume substantially all of the economic benefits embodied in the property through use over time (rather than through sale), the related deferred tax liability or deferred tax asset is measured on the basis that the carrying amount of such property will be recovered entirely through use.

Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

Where temporary differences exist in relation to investments in subsidiaries, branches, associates and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled deferred tax assets and liabilities are not recognised where the timing.

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are offset where: (i) a legally enforceable right of set-off exists; and (ii) the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

Deferred tax asset of \$1,369,309 (2019: \$1,194,495) in respect of tax losses and temporary differences have not been brought to account as at balance date. These will be brought to account only if the Group derives future assessable income of a nature and of an amount sufficient to enable the benefit to be realised, the Group continues to comply with deductibility conditions imposed by tax legislation and no changes in tax legislation adversely affects the Group in realising the benefit.

Note 13. Financial Risk Management

Financial Instruments

Initial recognition and measurement

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions to the instrument. For financial assets, this is the date that the Group commits itself to either the purchase or sale of the asset (i.e. trade date accounting is adopted).

Financial instruments (except for trade receivables) are initially measured at fair value plus transaction costs, except where the instrument is classified "at fair value through profit or loss", in which case transaction costs are expensed to profit or loss immediately. Where available, quoted prices in an active market are used to determine fair value. In other circumstances, valuation techniques are adopted.

Trade receivables are initially measured at the transaction price if the trade receivables do not contain a significant financing component or if the practical expedient was applied as specified in AASB 15.

Classification and subsequent measurement

Financial liabilities

Financial instruments are subsequently measure at:

- Amortised cost; or
- Fair value through profit or loss

A financial liability is measured at fair value through profit and loss if the financial liability is:

- A contingent consideration of an acquirer in a business combination to which AASB 3: Business Combinations applies;
- Held for trading; or
- Initially designated as at fair value through profit or loss.

All other financial liabilities are subsequently measure at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest expense in profit or loss over the relevant period. The effective interest rate is the internal rate of return of the financial asset or liability. That is, it is the rate that exactly discounts the estimated future cash flows through the expected life of the instrument to the net carrying amount at initial recognition.

Financial assets

Financial assets are subsequently measured at:

- Amortised cost;
- Fair value through other comprehensive income; or
- Fair value through profit or loss.

Measurement is on the basis of two primary criteria:

- The contractual cash flow characteristics of the financial asset; and
- The business model for managing the financial assets.

A financial asset that meets the following conditions is subsequently measured at amortised cost:

- The following conditions is subsequently measured at amortised cost:
- The contractual terms within the financial asset give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding on specified dates.

A financial asset that meets the following conditions is subsequently measured at fair value through other comprehensive income:

- The contractual terms within the financial asset give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding on specified dates;
- The business model for managing the financial assets comprises both contractual cash flows collection and the selling of the financial asset.

By default, all other financial assets that do not meet the measurement conditions of amortised cost and fair value through other comprehensive income are subsequently measured at fair value through profit or loss.

The initial designation of the financial instruments to measure at fair value through profit or loss is a one-time option on initial classification and is irrevocable until the financial asset is derecognised.

Derecognition

Derecognition refers to the removal of a previously recognised financial asset or financial liability from the statement of financial position.

Derecognition of financial liabilities

A liability is derecognised when it is extinguished (i.e. when the obligation in the contract is discharged, cancelled or expires). An exchange of an existing financial liability for a new one with substantially modified terms, or a substantial modification to the terms of a financial liability is treated as an extinguishment of the existing liability and recognition of a new financial liability.

The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

Derecognition of financial assets

A financial asset is derecognised when the holder's contractual rights to its cash flows expires, or the asset is transferred in such a way that all the risks and rewards of ownership are substantially transferred.

All of the following criteria need to be satisfied for the derecognition of financial asset:

- The right to receive cash flows from the asset has expired or been transferred;
- All risk and rewards of ownership of the asset have been substantially transferred; and
- The Group no longer controls the asset (i.e. the Group has no practical ability to make a unilateral decision to sell the asset to a third party).

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

Impairment

The Group recognises a loss allowance for expected credit losses on:

- financial assets that are measured at amortised cost

Expected credit losses are the probability-weighted estimate of credit losses over the expected life of a financial instrument. A credit loss is the difference between all contractual cash flows that are due and all cash flows expected to be received, all discounted at the original effective interest rate of the financial instrument

The Group uses the following approaches to impairment, as applicable under AASB 9: *Financial Instruments*:

- The simplified approach

Simplified approach

The simplified approach does not require tracking of changes in credit risk at every reporting period, but instead requires the recognition of lifetime expected credit loss at all times. This approach is applicable to:

- trade receivables or contract assets that result from transactions within the scope of AASB 15: Revenue from Contracts with Customers and contain a significant financing component; and
- lease receivables.

In measuring the expected credit loss, a provision matrix for trade receivables was used taking into consideration various data to get to an expected credit loss (i.e. diversity of customer base, appropriate groupings of historical loss experience, etc).

General Objectives, Policies and Processes

Risk management has focused on limiting debt to a level which could be extinguished by sale of assets or issue of securities if necessary.

The Group's activities expose it to a variety of financial risks; market risk (including interest rate risk and foreign exchange risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group.

a) Credit risk

Exposure to credit risk relating to financial assets arises from the potential non-performance by counterparties of contract obligations that could lead to a financial loss to the entity.

Credit risk is managed through the maintenance of procedures (such as the utilisation of systems for the approval, granting and renewal of credit limits, regular monitoring of exposures against such limits and monitoring of the financial stability of significant customers and counterparties), ensuring to the extent possible that customers and counterparties to transactions are of sound credit worthiness. Such monitoring is used in assessing receivables for impairment.

Risk is also minimised through investing surplus funds in financial institutions that maintain a high credit rating or in entities that the Board has otherwise assessed as being financially sound. Where the Group is unable to ascertain a satisfactory credit risk profile in relation to a customer or counterparty, the risk may be further managed through title retention clauses over goods or obtaining security by way of personal or commercial guarantees over assets of sufficient value which can be claimed against in the event of any default.

b) Liquidity risk

Liquidity risk arises from the possibility that the entity might encounter difficulty in settling its debts or otherwise meeting its obligations related to financial liabilities. The entity manages this risk through the following mechanisms:

- Preparing forward-looking cash flow analyses in relation to its operating, investing and financing activities
- Obtaining funding from a variety of sources
- Maintaining a reputable credit profile
- Managing credit risk related to financial assets
- Only investing surplus cash with major financial institutions
- Comparing the maturity profile of financial liabilities with the realisation profile of financial assets

The table below reflect an undiscounted contractual maturity analysis for financial liabilities.

Cash flows realised from financial assets reflect management's expectation as to the timing of realisation. Actual timing may therefore defer from that disclosed. The timing of cash flows presented in the table to settle financial liabilities reflect the earliest contractual settlement dates.

Market risk

i) Interest rate risk

Exposure to interest rate risk arises on financial assets and financial liabilities recognised at reporting date whereby a future change in interest rates will affect future cash flows or the fair value of fixed rate financial instruments. The entity is also exposed to earnings volatility on floating rate instruments. The financial instruments which primarily expose the Group to interest rate risk are borrowings and cash and cash equivalents.

ii) Foreign exchange risk

Exposure to foreign exchange risk may result in the fair value or future cash flows of a financial instrument fluctuating due to movement in foreign exchange rates of currencies in which the entity holds financial instruments which are other than the AUD functional currency of the entity.

Due to instruments held by overseas operations, fluctuation in US Dollar may impact on the entity's financial results unless those exposures are appropriately hedged.

No foreign currency hedge is currently in place as at the date of this Financial Report. The Board is constantly reviewing the fluctuation in the relevant foreign currency rates and is prepared to put in place a foreign currency hedge should the need arise.

Note 14. Cash and cash equivalents

Cash and cash equivalents include cash on hand and deposits available on demand with banks.

Capital Management

Management controls the capital of the Group in order to maintain a sustainable debt to equity ratio, generate long-term shareholder value and ensure that the Group can fund its operations and continue as a going concern.

The Group's debt and capital includes ordinary share capital and financial liabilities, supported by financial assets.

The Group is not subject to any externally imposed capital requirements.

Management effectively manages the Group's capital by assessing the Group's financial risks and adjusting its capital structure in response to changes in these risks and in the market. These responses include the management of debt levels, distributions to shareholders and share issues.

Note 17. Reserves

Foreign Currency Translation Reserve

The foreign currency translation reserve records exchange differences arising on translation of a foreign controlled subsidiary.

Soon Mining Limited	Australia	Ordinary	100%	100%
Soon Mining Co Ltd	Republic of Ghana	Ordinary	100%	100%

Note 20. Events after the Reporting Period

The consolidated entity is aware of the impact that COVID-19 (Coronavirus) is having on the Australian and World economy.

The Directors have considered the impact of the Coronavirus on the consolidated entity's recorded asset values and the Directors are of the view that there has been no material impact on the consolidated entity's recorded asset values as at or subsequent to the reporting date.

As at the date of these financial statements, the consolidated entity is not aware of any impact that has occurred in relation to any of its staff, contractors or key suppliers.

Given the negative impact that has occurred and is continuing to occur on world financial markets as a result of the Coronavirus, the Directors are of the view that there is the potential that the Coronavirus will have a significant negative impact on the consolidated entity's ability to secure the required debt and equity financing for its proposed current and future projects, including but not limited to, the consolidated entity's proposed KwahuPraso Gold Project. At the date of these financial statements, this impact is not able to be fully assessed or measured.

There are no other matter or circumstance has arisen since 31 December 2020 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

Note 21. Contingencies and Commitments

There are no material contingent liabilities as of the end of the reporting period (2019: Nil).

Note 22. Key Management Personnel

Refer to Remuneration Report contained in the Directors' Report for details of the remuneration paid or payable to each member of the Company's key management personnel (KMP) for the year ended 31 December 2020.

The totals of remuneration paid to KMP of the Company during the year are as follows:

	Consolidated 2020 \$	2019 \$
Short-term employee benefits	309,700	351,915
Post-employment benefits	-	-
Total KMP compensation	<u>309,700</u>	<u>315,915</u>

Soon Mining Limited
Notes to the financial statements
31 December 2020

Short-term employee benefits

These amounts include fees and benefits paid to non- executive Directors as well as all salary, paid leave benefits, fringe benefits and cash bonuses awarded to executive Directors and other key management personnel.

Further information in relation to KMP remuneration can be found in the Director's Remuneration Report.

Note 23. Auditor's Remuneration

During the financial year the following fees were paid or payable for services provided by RSM Australia Partners, the auditor of the company, its network firms and unrelated firms:

	Consolidated	
	2020	2019
	\$	\$

Terms and conditions

All transactions were made on normal commercial terms and conditions and at market rates.

Note 25. Critical Accounting Estimates and Judgements

The Directors evaluate estimates and judgements incorporated into the financial statements based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the Group.

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

Note 26. New Accounting Standards and Interpretations not yet mandatory or early adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the consolidated entity for the annual reporting period ended 31 December 2020. The consolidated entity has not yet assessed the impact of these new or amended Accounting Standards and Interpretations.

Note 27. Company Details

The registered office of the Company is:
Level 1 Suite 1a, 33 Queen Street, Brisbane Qld 4000

The principal place of business is:
