Company commentary

Company performance for the month was 5.6%, outperforming the benchmark which returned 4.4% for the month. The key contributors and detractors are detailed under the Portfolio Commentary section below.

As approved at the Company's AGM on 30 November 2020, the Company will implement an off-market share buy-back for up to 25% of its shares in issue if the average daily NTA discount is wider than 7.5% for the 12 month period from 19 October 2020 (Discount Condition). As at 29 March 2021, the average daily NTA discount since the start of the Discount Condition assessment period was 12.2%.

Shareholders who were on the register on 10th March 2021 would have received the interim dividend on 31st March of 2 cents per share (franked as to 50%).

The Company is undertaking a phone-based shareholder outreach campaign to get a sense for how shareholders view the Company and to understand your experience as a shareholder. Should you receive a call, please take the time to share your views with us.

The Manager, Antipodes Partners, has commenced a regular "[insights from the Manager](#)" email newsletter which captures how the team is thinking about the latest news and market events impacting the APL portfolio – [Subscribe](#) to receive upcoming newsletter.

Market commentary

Global equity strength continued in March on continued optimism of a sustainable re-opening of the global economy (+4.4%). Defensive sectors such as Utilities and Consumer Staples led, but cyclical sectors exposed to the re-opening theme, such as Industrials and Financials, also outperformed. Information Technology and Communication Services lagged as investors exhibited a preference for low multiple - or value - stocks over momentum and growth.

US equities (+5.4%) outperformed as President Biden set out plans for a \$2tn infrastructure stimulus. The US yield curve steepening continued as yields rose on improving growth expectations (US 10 year rose to 1.74% from 1.40%), weighing on large-cap tech. Europe (+4.8%) outperformed its sensitivity to the cyclical rebound and despite an increase in COVID cases and fresh lockdowns.

Asia (+0.4%) lagged due to weakness in China (-4.8%) on concerns around policy tightening and the US regulator implementing measures to delist foreign companies that do not comply with US auditing standards. News of the collapse of a large Asia based family office also dampened sentiment.

Elsewhere, Brent Crude halted four months of gains (-2.6% in USD) and Gold (-3.4% in USD) retreated as the USD advanced (DXY +2.6%) on the move higher in yields.

Portfolio commentary

The key contributors included:

- Industrials cluster including VW, Siemens and Norsk Hydro. VW reported better than expected full year results after strong Q4 sales, improving EV profitability and a focus on fixed cost reductions. Siemens' Digital Industries segment continues to benefit from the global economic recovery. Norsk Hydro benefited from ongoing strength in base metal prices and normalising demand for aluminium.
- Consumer Cyclical, notably KB Financial and ING Groep supported by loan growth and improving net interest margins. Home improvement retailer Lowe's continued strong sales amidst the rollout of US government stimulus.
- Healthcare, notably Walgreen's as earnings were boosted by an increase to the Medicare reimbursement rate for administering COVID-19 vaccines.
- Facebook as appreciation for the company's growth prospects outweighed dwindling concerns over Apple's upcoming iOS privacy setting changes.
- EDF which was boosted by positive news flow regarding progress of pricing reform approval from the European Commission.

Key detractors included:

- Online Services - Asia/EM, notably Chinese internet names JD.com, Tencent and Meituan as market sentiment waned amidst ongoing regulatory scrutiny of Chinese technology platforms. With growth prospects remaining positive we have taken the opportunity to increase position sizes in Tencent and Meituan.
