### 3 CHAIRMAN'S LETTER

Dear Shareholders

On behalf of Antilles Gold Limited (Company), I am pleased to invite you to participate in a renounceable pro rata offer available to Eligible Shareholders on the basis of one new Share for every four Shares held at an issue price of \$0.065 per new Share, to raise approximately \$3.2 million (Offer).

The Offer represents a discount of 32% to the 30 day volume weighted average price of \$0.093 prior to its announcement to the ASX on 3 May 2021. Mahe Capital Pty Limited has underwritten the Offer for \$1,000,000.

For every two new Shares subscribed, investors will also receive one New Option exercisable at \$0.13 each on or before 30 April, 2023. The Company intends to list the New Options on the ASX.

Shareholders have the opportunity to apply for additional Shares, in excess of their Entitlement.

The funds raised will be applied to advancing the Company's projects and prospects in Cuba through:

- Completing the current 15,000 m drilling program and establishment of JORC Resources for the 49% owned La Demajagua gold/silver deposit in Cuba.
- Progressing the Bankable Feasibility Study ("BFS") for the development of the La Demajagua gold mine.
- Compilation and review of extensive geological data for the highly prospective Golden Hills and Florencia sulphide gold deposits in Cuba.

General overheads and other expenses are expected to be met for the next twelve months from current cash resources.

Funds required to complete an additional 10,000 m of drilling, the BFS, and predevelopment costs associated with the La Demajagua gold mine may potentially be met in full or part through:

- the sale of fully depreciated equipment from the completed Las Lagunas refractory gold tailings retreatment project in the Dominican Republic; and
- negotiating an early settlement of US\$20 million of contractual claims against the Dominican Government arising from the Las Lagunas project, and currently being arbitrated at the World Bank's International Centre for Settlement of Investment Disputes.

The exercise date of 30 April, 2023 for the New Options attaching to the New Shares to be issued under this Prospectus has been set so Optionholders can make a conversion decision, after completion of the BFS and the anticipated development decision for the La Demajagua mine, at the end of 2022.

The risks associated with this offer are detailed in section 6 and include risks ordinarily associated with future funding, exploration risks, mine development and plant construction risks, and commitment and share market risks.

I will support the Offer by taking up my Entitlement for 6 million New Shares.

On behalf of your Directors, I invite you to consider this investment opportunity as the Company embarks on its growth strategy in Cuba.

Yours sincerely

Mr Brian Johnson  
Executive Chairman

## 5 PURPOSE AND EFFECT OF THE OFFER

### 5.1 Introduction

The Company is seeking to raise up to approximately \$3,200,000 before issue costs under the Offer at a price of \$0.065 per Share, on the basis of one New Share for every four Existing Shares held as at the Record Date, with one attaching New Option (exercisable at \$0.13 and expiring 30 April, 2023) issued for every two New Shares issued.

Shareholders may, in addition to their Entitlement, apply for Shortfall Shares.

The Offer is lead managed and underwritten for \$1,000,000 by Mahe Capital Pty Limited.

### 5.2 Purpose of the Offer

The Directors intend to apply the proceeds from the Offer as follows:

Use of funds (\$'000) (approx.) <sup>1, 2</sup>	Underwritten Amount	Full Subscription
Completion of current 15,000m drilling program of La Demajagua gold/silver deposit, Cuba	901	1,950
Progressing the Bankable Feasibility Study for development of the La Demajagua gold mine	-	950
Compilation and review of geological data for Golden Hills sulphide gold deposits, Cuba	-	166
Cash costs of the Offer <sup>3</sup>	99	105
Total use of funds	1,000	3,171

#### Notes:

- 1 This table is a statement of the proposed application of the funds raised as at the date of this Prospectus. As with any budget, intervening events and new circumstances have the potential to affect the Company's decisions, and the Company reserves the right to vary the way funds are applied.
- 2 Funds raised will, in the event less than Full Subscription is received, be allocated firstly towards the costs of the Offer and the La Demajagua drilling program, then progressing the Bankable Feasibility Study for development of the La Demajagua gold mine and then compilation and review of geological data for Golden Hills sulphide gold deposits.
- 3 This assumes that the Lead Manager does not place any Shortfall Shares in excess of the Underwritten Amount. The Lead Manager will also be issued New Options and paid its lead management fee and management fee through the issue of Shares on the same terms as the Offer. See section 8.4 for details. See section 10.5 for further details relating to the estimated expenses of the Offer.

### 5.3 Statement of financial position

Set out in section 13 is the audited Statement of Financial Position of the Company as at 31 December 2020 and the Pro-Forma Statement of Financial Position as at 31 December 2020, on the basis of the following assumptions:

- (a) the Offer was effective on 31 December 2020;
- (b) no further Shares are issued other than all Shares offered under this Prospectus or as set out in this section;
- (c) take up of the Offer assuming the Underwritten Amount and Full Subscription are received;
- (d) an exchange rate of US\$0.77 per Australian dollar; and
- (e) cash costs of the Offer are between \$99,000 and \$105,000.

The Pro-Forma Statement of Financial Position has been prepared to provide investors with information on the assets and liabilities of the Company and pro-forma assets and liabilities of the Company set out in section 13. The pro-forma financial information is unaudited and presented in an abbreviated form, insofar as it does not include all of the disclosures required by Australian Accounting Standards applicable to annual financial statements.

### 5.4 Effect of the Offer on the Company's securities

Assuming that no further Shares are issued prior to the Record Date, at the close of the Offer, the capital structure of the Company will be:

Shares	Underwritten Amount		Full Subscription	
	Number	%	Number	%
Shares	195,141,649	92.7	195,141,649	80.0
New Shares offered under this Prospectus	15,384,615	7.3	48,785,413	20.0
<b>Total Shares</b>	<b>210,526,264</b>	<b>100</b>	<b>243,927,062</b>	<b>100</b>
New Options offered under this Prospectus	7,692,308	100	24,398,706	100
<b>Total Options</b>	<b>7,692,308</b>	<b>100</b>	<b>24,398,706</b>	<b>100</b>

The Company reserves the right to issue further securities in conjunction with the Offer using its existing 25% capacity.

### 5.5 Effect on control

There will be no effect on control of the Company if all Shareholders take up their Entitlement.

As the Offer is renounceable and for the purposes of Listing Rule 7.7.1(c), the Company has appointed Mahe Capital as nominee to arrange for the sale of the entitlements that would have been given to Ineligible Shareholders and to account to them for the net proceeds of the sale.

So that Eligible Shareholders can rely upon item 10 in section 611 of the Corporations Act (the rights issue exception to the 20% rule), the Company has applied to ASIC to appoint a nominee under section 615 of the Corporations Act.

Given the structure of the Offer and underwriting, the Directors do not believe that there will be any material effect on control of the Company as a result of the Offer.

## 5.6 Dilution

Shareholders who do not participate in the Offer will have their holdings diluted. Following is a table which sets out the dilutionary effect, assuming the full amount is raised and no further Shares are issued or Options exercised:

Holder	Holding at Record Date		Entitlement	Holding following the Offer if no Entitlement taken up	
	Number	%		Number	%
1	97,570.82	0.05	24,393	97,571	0.05
2	1,463,562.37	0.75	365,891	1,463,562	0.70

## 6 RISK FACTORS

The New Securities offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below and together with information contained elsewhere in this Prospectus and to consult with your professional advisers before deciding whether to apply for the New Securities pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the New Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

### 6.1 Company specific risks

The business, assets and operations of the Company are subject to certain risk factors that have the potential to influence the future operating and financial performance of the Company. These risks can impact on the value of an investment in the securities of the Company. The Board aims to manage these risks by carefully planning its activities and implementing risk control measures. Some of the risks are, however, highly unpredictable and the extent to which they can be effectively managed is limited.

#### (a) Exploration Risks

Funds raised from the Offer will be first used for exploration to confirm previous exploration results for the La Demajagua gold mine in Cuba. There is a significant risk that the Company may not, in the event the Offer raises less than full subscription, have sufficient funds to complete its proposed exploration program, in which case it will need to reduce its proposed exploration program or consider alternative funding. This is particularly the case if only the underwritten amount of \$1,000,000 (or thereabouts) is raised. This will have an adverse effect on the Company.

Furthermore, there is a risk that results from the exploration program may not validate earlier exploration results.

#### (b) Going Concern Risk

The Company's 2020 financial statements have been prepared on a going concern basis, which contemplates continuity of normal business activities and the realisation of assets and discharge of liabilities in the normal course of business. For the year ended 31 December 2020, the Group incurred net cash outflows of US\$3,028,967 (2019: net cash outflows of US\$873,126).

Whilst the Directors believe that it is reasonably foreseeable that the Company and Group will continue as a going concern and that it is appropriate to adopt the going concern basis in the preparation of the financial report after consideration of applicable factors, there is a risk that the factors may not eventuate.

#### (c) General Funding Risk

Since mid-2012 the Company's principal activity has been the processing of refractory gold tailings at Las Lagunas in the Dominican Republic. This project was completed in December 2019 with subsequent activities restricted to dismantling the process plant and storing equipment on site for either sale, or incorporation into a new processing plant in the future. In August 2020, the Company entered into a 49:51 joint venture agreement with Cuban Government owned mining company, GeoMinera SA, to develop their La Demajagua gold/silver deposit subject to acceptable results from a Bankable Feasibility Study. As a consequence, the Company does not as yet generate revenue from the proposed development. Accordingly, the Company will require equity or debt funding to meet existing and future expenditure requirements.

Some of the Company's funding requirements could be met from equipment sales or settlement of US\$20 million of contractual claims against the Dominican Republic Government, currently being arbitrated by the World Bank's International Centre for Settlement of Investment Disputes ("ICSID"). However, there is no guarantee the Company will receive funds from these sources, or other sufficient funding to implement its exploration or project development intentions as outlined in the Prospectus. There can be no assurance that additional funding will be available on acceptable terms, or at all. Any inability to obtain additional funding would have a material adverse effect on the Company's business, financial condition and performance, and potentially on the Company's ability to continue as a going concern.

(d) Regulation Risk

The Company's main development project is located in Cuba.

There is a risk that applicable foreign investment law, or mining law, other laws, or other regulations of the governing authorities could change, and that such changes could result in additional material expenditures or time delays.

There is also a risk that the necessary land acquisitions, permits, certificates, consents, authorisations and agreements required to implement future exploration and project development may not be obtained under conditions or within time frames that make such plans economic.

(e) Operating Risk

The operations of the Company may be affected by various factors outside its control. Funds raised under the Offer are intended to be used to conduct exploration programs at La Demajagua and Golden Hills in Cuba, and advance the Bankable Feasibility Study for the development of the La Demajagua mine. The operations of the Company may be affected by failure to establish sufficient quantity or grade of Resources to justify the proposed development of a mine at either La Demajagua or Golden Hills. Operations may also be impacted by unanticipated metallurgical problems which may affect eventual extraction costs, possible seismic activity, operational and technical difficulties encountered in drilling and exploration, operating and maintaining plant and equipment, mechanical failure, industrial and environmental accidents, labour shortages, industrial and environmental disputes, obtaining government approvals, extreme weather events such as flooding, heatwaves, bushfires, droughts and unexpected

shortages or increases in the costs of consumables, spare parts, plant, equipment or labour.

These risks and hazards could also result in damage to or destruction of property, plant and equipment, personal injury, environmental damage, business interruption, monetary losses and possible legal liability. The Company may become subject to liability for accidents, pollution or other hazards against which it cannot insure or against which it may elect not to insure because of premium costs or for other reasons, or in amounts which exceed policy limits.

No assurances can be given that the Company will achieve commercial viability through exploration success and exploitation of its projects and, until the Company is able to realise value from its projects, it is likely to incur ongoing operational losses.

(f) Sovereign Risk

The Company cannot guarantee that the Government in Cuba will remain stable or supportive of the mining and resources sector and existing ownership structures. Accordingly, the Company cannot guarantee ongoing access, surety of title and tenure of its Cuban assets. Outcomes in Courts in Cuba may be less predictable than in Australia, which could affect the enforceability of contracts entered into by the Company or its subsidiary in Cuba. In addition, Cuba is currently subject to sanctions imposed by the United States and while they remain in place, scope for traditional project financing will be restricted.

(g) Government Policies and Legislation Risk

Any material adverse changes in government policies, legislation or shifts in political attitude in Cuba that affect mineral exploration activities, tax laws, royalty regulations, government subsidies and environmental issues may affect the viability of a project, projects or the Company.

No assurance can be given that amendments to current laws and regulations or new rules and regulations will not be enacted, or that existing rules and regulations will not be applied in a manner which could substantially limit or affect the Company's exploration, development, and operating activities.

(h) Commodity Price and Exchange Rate Risk

The Company's Cuban projects are prospective for, inter alia, gold and silver. The market price of these commodities fluctuate and are affected by numerous factors beyond the control of the Company. These factors include current and expected future supply and demand, forward selling by producers, production cost levels in major metal producing centres as well as macroeconomic conditions such as inflation and interest rates. Fluctuations in commodity prices may impact on the commercial attractiveness or viability of the Company's projects.

Furthermore, the international prices of most commodities are denominated in United States dollars and the Company's cost base will be in a combination of United States dollars, Australian dollars, and Cuban pesos. Consequently, changes in these exchange rates may impact on the expenditure of the Company and the Company's purchasing capacity. The exchange rate is affected by numerous factors

beyond the control of the Company, including interest rates, inflation and the general economic outlook.

(i) Environmental Risk

The Company's projects are subject to Cuban laws and regulations concerning the environment. The Company's activities are expected to have some impact on the environment, particularly if mine development occurs in the future. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

The Company will, in future, require additional approval from authorities before it can undertake mining activities that will impact the environment. Failure to obtain such approvals may prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations that may be adopted in the future, including whether any such laws and regulations would materially increase the Company's costs of doing business or affect its operations in any area.

## 6.2 Industry Risk

(a) Mining and Exploration Risk

The business of mineral exploration, development and production is subject to risk by its nature. The success of the business depends, inter alia, on successful exploration and/or acquisition of reserves, securing and maintaining title to concessions and tenements, successful design, construction, commissioning and operating of mining and processing facilities, successful development and production in accordance with forecasts and successful management of the operations. Exploration and mining are speculative undertakings which may be hampered by force majeure circumstances, land claims and unforeseen mining problems. Increased costs, lower output or high operating costs may all contribute to make a project less profitable than expected at the time of the development decision. There is no assurance that the Company's attempts to exploit its exploration activities will be successful.

The Company's exploration activities to date are not advanced to a stage where reliable reserve or resource estimates can be made. Reserve and resource estimates, if made in the future, are judgments based on drilling results, past experience with mining properties, knowledge, experience, industry practice and many other factors. Estimates which are valid when made may change substantially when new information becomes available. Ore estimation is an interpretive process based on available data and interpretations and, thus, estimations may prove inaccurate.

The actual quality and characteristics of ore deposits cannot be known until mining takes place, and will almost always differ from the assumptions used to develop reserves. Further, reserves are valued based on future costs and future prices and, consequently, the actual reserves and resources may differ from those estimated, which may result in either a positive or negative effect.

No assurance can be given that commercial tonnages, grades or recovery will be achieved or realised. Commodity price fluctuations, increased production costs, or

reduced recovery rates, may render possible reserves containing relatively lower grades uneconomic and may result in a restatement of such reserves. Moreover, short-term operating factors relating to possible reserves, such as sequential development of ore bodies and processing of new or different ore types or grades, may cause mining operations to be unprofitable in any particular accounting period.

There is a risk that unforeseen geological and geotechnical difficulties may be encountered if and when developing and mining reserves. In this event, a loss of revenue may be caused by lower than expected production and/or higher than anticipated operation and maintenance costs, and/or on-going unplanned capital expenditure in order to meet production targets.

(b) Title

The Company's mining exploration activities are dependent on the grant, or as the case may be, the maintenance of appropriate licenses, which may be withdrawn or made subject to limitations. The granting of license, maintaining of license or obtaining renewals, often depends on the Company being successful in obtaining required statutory approvals for its proposed activities and that the licenses, concessions, tenements, leases, permits or consents it holds will be renewed as and when required. There is no assurance that such renewals will be given as a matter of course and there is no assurance that new conditions will not be imposed in connection therewith.

(c) Results of Studies

Subject to the results of future exploration and testing programs, the Company may progressively undertake a number of studies in respect to the Company's current or new projects. These studies may include scoping, pre-feasibility and bankable feasibility studies.

These studies will be completed within certain parameters designed to determine the economic feasibility of the Company's current or new projects within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Company's current or new projects or the results of other studies undertaken by the Company (e.g. the results of a feasibility study may materially differ to the results of a scoping study).

Further, even if a study determines the economics of the Company's current or new projects, there can be no guarantee that the current or new projects will be successfully brought into production as assumed or within the estimated parameters in the feasibility study once production commences including but not limited to operation costs, mineral recoveries and commodity prices. In addition, the ability of the Company to complete a study may be dependent on the Company's ability to raise further funds to complete the study if required.

(d) Metallurgy

Metal or mineral recoveries are dependent upon the metallurgical process, and by its nature processing contains elements of significant risk such as:

- (i) identifying a metallurgical process through test work to produce a saleable metal or concentrate;

- (ii) developing an economic process route to produce a metal or concentrate; and
- (iii) changes in mineralogy in the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the project.

No assurance can be given that any particular level of recovery from mineral resources or reserves will in fact be realised or that a mineral resource will ever qualify as commercially viable which can be legally and economically exploited.

(e) Economic and Government Risks

Economic and legislative changes in Cuba may affect the future viability of the Company. The future viability of the Company is also dependent on a number of other factors affecting the performance of all industries, not just the exploration and mining industries. These factors include, but are not limited to:

- (i) General economic conditions in Cuba and their respective major trading partners.
- (ii) Changes in government policies, taxation and other laws.
- (iii) The strength of the equity and share markets in Australia and throughout the world, and in particular investor sentiment towards Cuba and the commodities (resources) sector.
- (iv) Movement in, or outlook on, interest rates and inflation rates.
- (v) Natural disasters, social upheaval or war in Cuba and other countries.

Industry profitability can be affected by changes in government within Cuba and other jurisdictions, which are outside the control of the Company. The Company's activities are subject to extensive laws and regulations controlling not only the exploration for and mining of minerals, but also the possible effects of such activities upon the environment. Permits from regulatory authorities are required for many aspects of mine operation and reclamation. There is no assurance that permits will be obtained when sought or that unfavourable conditions will not be imposed. Future legislation and regulations could cause additional expense, capital expenditures, restrictions and delays in development of the Company's tenements, the extent of which cannot be predicted.

(f) Reliance on Key Personnel

The responsibility of overseeing the day to day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their involvement with the Company.

(g) Insurance

Insurance of all risks associated with exploration or project development is not always available and, where it is available, the cost may be high. The Company will have insurance in place considered appropriate for the Company's needs.

The business of the Company is subject to a number of risks and hazards generally, including adverse environmental conditions, industrial accidents, labour disputes,

unusual or unexpected geological conditions, ground or slope failures, cave-ins, changes in the regulatory environment and natural phenomena such as extreme weather conditions, floods and earthquakes. Such occurrences could result in damage to mineral properties, buildings, personal injury or death, environmental damage to properties of the Company or others, delays in mining, monetary losses and possible legal liability.

Although the Company seeks to maintain insurance to protect against certain risks in such amounts as it considers to be reasonable, insurance will not always be available or cover all the potential risks associated with its operations and insurance coverage may not continue to be available or may not be adequate to cover any resulting liability.

It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks because of high premiums or other reasons. Moreover, insurance against risks such as environmental pollution or other hazards as a result of exploration, development or production is not generally available to the Company or to other companies in the mining industry on acceptable terms. Losses from these events may cause the Company to incur significant costs that could have a material adverse effect upon its financial performance and results of operations.

### **6.3 General Risk**

(a) Securities investments

There are risks associated with any securities investment. The prices at which the Company's securities trade may fluctuate in response to a number of factors. Furthermore, the stock market, and in particular the market for mining and exploration companies, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of such companies. There can be no guarantee that trading prices will be sustained. These factors may materially affect the market price of the Company's securities regardless of the Company's operational performance.

(b) Share Market Conditions

Share market conditions may affect the price of the Company's securities regardless of the Company's operating performance. Share market conditions are affected by many factors including but not limited to the following:

- (i) General economic outlook.
- (ii) Interest rates and inflation rates.
- (iii) Currency fluctuations.
- (iv) Mineral price fluctuations.
- (v) Changes in investor sentiment toward particular market sectors and the domicile of projects.
- (vi) The demand for, and supply of, capital.
- (vii) Terrorism or other hostilities.

(viii) Other factors beyond the control of the Company.

The market price of the Company's securities may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company, or any return on an investment in the Company.

(c) Economic Risk

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that general economic climate include the level of direct and indirect competition against the Company, industrial disruption, the rate of growth of gross domestic product in Cuba or any other country in which the Company operates, interest rates, exchange rates and the rate of inflation.

(d) Competition Risk

The Company will compete with other companies, including other mineral exploration and mining companies. Some of these companies have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. Many of the Company's competitors not only explore for and produce minerals, but also carry out refining operations and produce other products on a worldwide basis. There can be no assurance that the Company can compete effectively with these companies.

#### **6.4 Investment Speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors and others not specifically referred to above, may, in the future, materially affect the financial performance of the Company and the value of the Securities offered under the Prospectus.

The Securities offered pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Securities.

By completing and returning your Entitlement and Acceptance Form with the requisite application monies, or by making a payment in respect of an Application by BPAY, you will be deemed to have represented that you are an Eligible Shareholder. In addition, you will also be deemed to have represented and warranted on behalf of yourself or each person on whose account you are acting that the law in your place of residence and/or where you have been given the Prospectus, does not prohibit you from being given the Prospectus and that you:

- (a) agree to be bound by the terms of the Offer;

  - (ii) your circumstances are such that the Offer cannot lawfully be made to you;
- (f) acknowledge that the information contained in, or accompanying, the Prospectus is not investment or financial product advice or a recommendation that New Shares are suitable for you given your investment objectives, financial situation or particular needs; and
- (g) acknowledge that the New Shares have not, and will not be, registered under the securities laws in any other jurisdictions outside Australia and New Zealand and accordingly, the New Shares may not be offered, sold or otherwise transferred except in accordance with an available exemption from, or in a transaction not subject to, the registration requirements of applicable securities laws in particular the US Securities Act.

The Entitlement and Acceptance Form does not need to be signed to be a valid application. An Application will be deemed to have been accepted by the Company upon the issue of the New Shares.

If the Entitlement and Acceptance Form is not completed correctly or if the accompanying payment of the application monies is for the wrong amount, it may still be treated as a valid application for New Shares. The Directors' decision whether to treat an acceptance as valid and how to construe, amend or complete the Entitlement and Acceptance Form is final. However, an Applicant will not be treated as having applied for more Shares than is indicated by the amount of the application monies received by the Company.

The Shortfall Offer is, to the extent it is made in Australia, made under this Prospectus. Subject to the above, the Directors reserve the right at their absolute discretion and subject to the Corporations Act and Listing Rules, issue Shortfall Shares at their discretion, and to reject any application for Shortfall Shares or to issue a lesser number of Shortfall Shares than that applied for. It is an express term of the Shortfall Offer that applicants for Shortfall Shares will be bound to accept a lesser number of Shortfall Shares allocated to them than applied for. If a lesser number is allocated, excess application money will be refunded without interest as soon as practicable after the Closing Date.

#### **8.7 New Zealand Shareholders**

The Offer contained in this Prospectus to Eligible Shareholders with registered addresses in New Zealand is made in reliance on the Securities Act (Overseas Companies) Exemption Notice 2013 (New Zealand). This Prospectus has not been registered, filed or approved by any New Zealand regulatory authority. This Prospectus is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

#### **8.8 Treatment of Ineligible Shareholders and sale for Ineligible Shareholders' Entitlement**

Given the cost of complying with applicable regulations outside Australia and New Zealand, the Company has decided that it would be unreasonable to extend the Offer to Ineligible Shareholders. The Prospectus will not be sent to those Shareholders.

This Prospectus does not constitute an offer of securities in any jurisdiction where, or to any person to whom, it would not be lawful to issue the Prospectus or make the Offer. No action has been taken to register or qualify the New Shares or the Offer or otherwise to permit an offering of the New Shares in any jurisdiction other than as set out in this section.

This document is not for publication or distribution, directly or indirectly, in or into the United States of America (including its territories and possessions, any state of the US and the District of Columbia). This document is not an offer of securities for sale into the United States or to, or for the account or benefit of, US Persons. The securities referred to herein have not been and will not be registered under the US Securities Act, and may not be offered or sold in the United States or to, or for the account or benefit of, US Persons. No public offering of securities is being made in the United States or elsewhere where it would be unlawful to do so.

Recipients may not send or otherwise distribute this Prospectus or the Entitlement and Acceptance Form to any person outside Australia or New Zealand (other than to Eligible Shareholders).

For the purposes of Listing Rule 7.7.1(c), the Company has appointed the Lead Manager as nominee to arrange for the sale of the Ineligible Shareholders' Entitlements and to account to them for the net proceeds of the sale (if any). The net proceeds of sale (in Australian dollars) will be distributed to the Ineligible Shareholder for whose benefits the Rights have

been sold in proportion to their shareholdings as at the Record Date (after deducting the costs of the sale).

#### **8.9 Beneficial holders, nominees, trustees and custodians**

Nominees and custodians that hold Shares should note that the Offer is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of securities. The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other Securities in respect of which there is any liability.

- (g) **Variation of rights**

Under Section 2468 of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

## 10 ADDITIONAL INFORMATION

### 10.1 Continuous disclosure obligations

The Company is a 'disclosing entity' (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company's securities. The New Shares which will be issued pursuant to this Prospectus are in the same class of Shares that have been quoted on the Official List during the 12 months prior to the issue of this Prospectus.

This Prospectus is a "transaction specific prospectus" to which the special content rules under section 713 of the Corporations Act apply. That provision allows the issue of a more concise prospectus in relation to an offer of securities in a class which has been continuously quoted by ASX in the three months prior to the date of the prospectus. In general terms "transaction specific prospectuses" are only required to contain information

in relation to the effect of the issue of New Shares on the Company and the rights attaching to the New Shares. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to the ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of the ASX as applicable from time to time throughout the period from lodgement of the Company's annual financial statements of the Company for the financial year ended 31 December 2020 to the issue of this Prospectus which required the Company to notify the ASX of information about specified events or matters as they arise for the purpose of the ASX making that information available to the stock market conducted by the ASX.

The Company confirms that, to the extent to which it is reasonable for investors and their professional advisers to expect to find the information in this Prospectus, there is no information

- (a) that has been excluded from a continuous disclosure notice in accordance with ASX Listing Rules; and
- (b) is information that investors and their professional advisers would reasonably require for the purpose of making an informed assessment of:
  - (i) the assets and liabilities, financial position and performance, profits and losses and prospects of the Company; and
  - (ii) the rights and liabilities attaching to New Shares.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with the ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of the ASIC; and
- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:
  - (i) the annual financial statements of the Company for the financial year ended 31 December 2021 being the last financial statements for a financial year, of the Company lodged with the ASIC before the issue of this Prospectus; and

- (ii) any continuous disclosure notices given by the Company after the lodgement of the financial statements referred to in paragraph (i) and before the lodgement of this Prospectus with ASIC.

Copies of all documents lodged with the ASIC in relation to the Company can be obtained free of charge from the Company's registered office during normal office hours or from [asx.com.au](http://asx.com.au).
