(ASX: WOR)

Syrah awards services contract for battery facility in USA

Syrah Resources Limited, through its wholly owned subsidiary Syrah Technologies LLC, has awarded Worley a services contract for its active anode material facility in Louisiana, USA. The facility produces value-added natural graphite material used in lithium-ion batteries that power electric vehicles.

Under the contract, Worley will provide detailed engineering and procurement services for the expansion of production capacity at Syrah's active anode material facility. The services will be executed by Worley's US Gulf Coast team with support from Worley's Global Integrated Delivery Team in India.

"We are delighted to expand our relationship with Syrah and further support Syrah's production of materials that play an important role in the energy transition. We are helping our customers adapt to the world's changing energy needs and achieve their renewable energy goals, so this is a strategically significant project for Worley," said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O'Leary, Group Company Secretary.
