2 Effect of the Rights Issue on the Company

2.1 Purpose of the Rights Issue

The intended use of funds raised under the Rights Issue is detailed in section 1.155.

2.2 Effect of the Rights Issue

The principal effect of the Rights Issue will be to:

- (a) increase cash reserves by \$27,446,575.65 immediately after completion of the Rights Issue, before deducting the estimated expenses of the Rights Issue; and
- (b) increase the total number of Shares on issue from 475,740,645 as at the date of this Prospectus by an additional 182,977,171 Shares.

2.3 Effect on the Company's capital structure

(a) Share capital

The principal effect of the Rights Issue on Carpentaria's capital structure will be to increase the total number of issued Shares. The capital structure of Carpentaria following the issue of the New Shares under the Rights Issue will be as follows:

Event	Approximate number of Shares issued	Resulting in approximate total number of Shares in the Company
Shares on issue as at 1 July 2021	475,740,645	
Shares agreed to be issued under the Placement	13,333,333	489,073,978
New Shares to be issued under the Rights Issue	182,977,171	672,051,149*
Shares agreed to be issued under the Conditional Placement (subject to approval of Shareholders)	41,000,000	713,051,149

These numbers are approximate and may vary slightly based upon a variety of factors. The final number of Shares in the Company is subject to reconciliation after Rights Issue. The number of shares issued under the Rights Issue is approximate and is subject to directors' discretions and the underwriting agreement.

* Includes the Placement, assuming that it is completed after the Record Date.

2.4 Effect on control and dilutionary impact of the Rights Issue

(a) General

It is not expected that the Rights Issue will have any material consequences on the control of the Company as at the date of this document.

The potential effect that the issue of New Shares under the Rights Issue will have on the control of the Company, and the consequences of that effect, will depend on a number of factors, including investor demand.

The level of control of all Eligible Shareholders that do not subscribe for their full Entitlement will decrease and their percentage interests in the issued Share capital of the Company will be diluted.

(b) Underwriter and sub-underwriter

The Rights Issue is fully underwritten by the Underwriter. The Underwriter is not presently a shareholder of the Company and is not a related party of the Company for the purposes of the Corporations Act. Due to the Underwriter's sub-underwriting arrangements and disbursement

strategy, the Underwriter's underwriting commitment is not expected to have any effect on the control of the Company, however, the extent to which New Shares are issued to the Underwriter pursuant to the Underwriting Agreement will increase the Underwriter's voting power in the Company.

Following completion of the Rights Issue, the Underwriter may acquire up to 27.227% of Shares of the Company if no other Shareholder takes up their Entitlement (on an undiluted basis). In the event of a shortfall under the Rights Issue, the Company and the Underwriter will employ a dispersion strategy so it is expected that the Underwriter's interest will actually be a lower proportion upon completion of the Rights Issue.

This section provides relevant financial information for Shareholders to consider when assessing whether to participate in the Rights Issue, including details of the potential impact of the Rights Issue on the Company's financial position.

The pro-forma financial information should be read in conjunction with the limitations set out in the 'Important Information' section of this Prospectus.

Pro-forma Statement of Financial Position

The pro-forma statement of financial position comprises the audited Statement of Financial Position for the Company as at 31 December 2020, adjusted for the net proceeds of the Rights Issue.

The pro-forma Statement of Financial Position has been prepared on the basis of accounting policies normally adopted by the Company. It is not intended to represent the actual financial position of the Company upon completion of the Rights Issue and is provided only as an illustration of the effect of the Rights Issue and the other pro-forma adjustments. The actual impact on the Company is dependent on a range of factors, many of which are outside the control of the Company.

Before taking any action you should carefully read this Prospectus and the other publicly available information about the Company on our website (<https://carpentariares.com.au>) and consider the risk factors set out in section 4.

The number of New Shares to which Eligible Shareholders are entitled is shown on the Entitlement and Acceptance Form. If you are an Eligible Shareholder you may:

Alternatives	See section
• Take up your Entitlement in full or in part	3.2
• Allow your Entitlement to lapse	3.6

3.2 If you wish to accept your Entitlement in full or in part

Either:

Payment by cheque or bank draft

If you are paying for your New Shares by cheque, bank cheque or bank draft, complete and return the Entitlement and Acceptance form with your payment. The Share Registry must receive your completed Entitlement and Acceptance Form together with full payment for the number of New Shares for which you are applying by no later than **5pm (Brisbane time) on Friday, 23 July 2021**.

Your cheque, bank cheque or bank draft must be paid in Australian currency and be drawn on an Australian branch of an Australian financial institution. Your payment must be for the full amount required to pay for the New Shares applied for. Payments in cash will not be accepted.

Cheques must be made payable to 'Carpentaria Resources Limited' and crossed 'Not Negotiable'.

You must ensure that your cheque account has sufficient funds to cover your payment, as your cheque will be presented for payment on receipt. If your bank dishonours your cheque your application will be rejected. We will not re-present any dishonoured cheques.

Or:

Pay by BPAY®

If you are paying for your New Shares by BPAY®, please refer to your personalised instructions on your Entitlement and Acceptance Form. Please note that should you choose to pay by BPAY®:

- you do not need to complete or return the Entitlement and Acceptance Form but are taken to have made the declarations on that personalised Entitlement and Acceptance Form;
- amounts received by the Company in excess of the Issue Price multiplied by your Entitlement (**Excess Amount**) will be refunded by the Company;
- if you do not pay for your full Entitlement, you are deemed to have taken up your Entitlement in respect of such whole number of New Shares as is covered in full by your Application Money.

When completing your BPAY[®] payment, please make sure to use the specific Biller Code and unique reference number provided on your personalised Entitlement and Acceptance Form. If you receive more than one personalised Entitlement and Acceptance Form (i.e. where you have multiple holdings), please only use the reference number specific to the Entitlement on that form. If you inadvertently use the same reference number for more than one of your Entitlements, you will be deemed to have applied only for New Shares on the Entitlement to which the reference number applies.

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. It is your responsibility to ensure that funds submitted through BPAY[®] are received by **5pm (Brisbane time) on Friday, 23 July 2021**.

Excess Application Money that is not sufficient to subscribe for a number of New Shares multiplied by the Issue Price will be refunded to you except where that amount is less than \$2.00, in which case it will be retained by the Company. The method by which you receive the refund will be at the discretion of the Company. No interest will be paid to Eligible Shareholders on any Application Money received or refunded.

4 Risk factors

4.1 General

An investment in the Company is subject to risk. The existence of risk means that the performance of the Company could be adversely affected.

The Directors have identified what they believe to be the major risks that may affect the Company. While the Company has endeavoured to disclose all material risks, you should be aware that the risks contained in this Section are not exhaustive. This Section should be treated as a general guide only.

Due to the existence of risk, it is recommended that before deciding whether or not to invest you:

- read the Prospectus in its entirety;
- consider the nature, probability and materiality of the risks described in this Section; and
- seek independent advice from an Australian financial services licensee, in light of your particular needs, objectives, financial circumstances and investment preferences.

While the Company may be able to minimise the impact of some risks through various risk management techniques, many of the risks we have identified in this section are beyond our control and as such cannot be eliminated or their impact minimised.

You may personally be able to manage the impact of risk by obtaining independent professional advice tailored to your own investment objectives, financial situation and particular needs. You should:

- consider carefully whether an investment in the New Shares is an appropriate investment for you;
- appreciate that the price of shares listed on ASX can fall as well as rise; and
- regard an investment in the New Shares as a speculative investment.

4.2 Key Risks specific to the Company

Feasibility Studies, Construction and Commissioning Risk

The Bankable Feasibility Study (“**BFS**”) into the future development of a mining operation at the Hawsons Iron Project is dependent upon, and may be affected by, a number of factors including, but not limited to, failure to determine feasibility to economically recover ore bodies, determination of unfavourable geological conditions, unanticipated technical and operational factors encountered when examining extraction and production methods, complexities determined with respect to operating plant and equipment, unexpected shortages or increases in the price of consumables, spare parts or plant and equipment, cost overruns, risk of access to the required level of funding and contracting risks from third parties providing essential services.

There is a risk that the BFS for the Hawsons Iron Project will not reflect the results of the Hawsons Iron Project Prefeasibility Study, which may adversely affect the prospects and economics of the project. Alternatively, even if the feasibility of production is confirmed, there is an inherent risk that the Hawsons Iron Project construction may not be completed on schedule, or that the construction cost may exceed budget, or that significant problems in the commissioning or metallurgical processes of the plant may arise.

In the event that the Company commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, weather conditions, fires, explosions and other accidents.

The Company cannot guarantee that the tenements will be renewed beyond their current expiry date and there is a material risk that, in the event the holder of those tenements is unable to renew any of them beyond their current expiry date, all or part of the Company's interests in the corresponding projects may be relinquished.

Further, there is no guarantee that any applications for mining or environmental tenements or other approvals or authorisations will be granted or granted on conditions satisfactory to the Company.

Additional Requirements for Capital

Failure to obtain sufficient financing for the Company's activities and future projects may result in delay and indefinite postponement of its activities and potential development programmes. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing might not be favourable to the Company and might involve substantial dilution to Shareholders. The Company is exposed to risks associated with its financial instruments, cash, receivables, accounts payable and accrued liabilities due to third parties from time to time. This includes the risk that a third party to a financial instrument fails to meet its contractual obligations, the risk that the Company will not be able to meet its financial obligations as they fall due and the risk that market prices may vary which will affect the Company's financial position and prospects.

Additional funding will be required in the event costs exceed the Company's estimates and also to effectively implement business and operations plans in the future, to take advantage of opportunities for acquisitions, joint ventures or other business opportunities, and to meet any unanticipated liabilities or expenses which the Company may incur. If such events occur, additional financing will be required. The Company may seek to raise further funds through equity or debt financing, joint ventures, licensing arrangements or other means. Failure to obtain sufficient financing for the Company's activities and future projects may result in delay and indefinite postponement of activities and potential development programmes. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing might not be favourable to the Company and might involve substantial dilution to Shareholders.

Access to Infrastructure

Iron ore produced from the Company's Hawsons Iron Project is intended to be transported to customers by a combination of pipeline, rail and sea.

A number of factors could disrupt these transport services, including any failure of rail or port infrastructure providers to increase capacity in order to meet future export requirements, key equipment and infrastructure failures, weather-related problems and industrial action, thereby impairing the Company's ability to supply iron ore to customers.

The Company would need to secure additional capacity at the Port of Whyalla or Port Pirie from existing owners, in order for the Company to be able to maximise its production capacity at the Hawsons Iron Project. There is a possibility that the Company may not secure this additional capacity from existing users at the Port of Whyalla or Port Pirie.

The Company has commenced discussions with existing users and potential providers of both rail and port capacity. To date, no definitive agreements have been entered into, and there is a possibility that the Company will not enter into arrangements with existing users, rail providers and port owners for use of services or will not be able to enter into arrangements on terms acceptable to the Company.

Resource and Reserve Estimates

The Company has previously announced resource and reserve estimates. Resource and reserve estimates are based on relevant reporting codes, where required (refer to the JORC Code for further information on resource estimation), and judgements based on knowledge, skills and industry experience. Estimates that were valid when originally made may alter significantly when new information or techniques become available.

In addition, by their very nature, resource and reserve estimates are imprecise and depend upon interpretations which may prove to be inaccurate, and whilst the Company will employ industry-standard techniques, including compliance with the JORC Code to reduce the resource and reserve estimation risk, there is no assurance that this approach will alter the risk. As further information becomes available through additional fieldwork and analysis, resource and reserve estimates may change. Actual mining results may materially differ from those estimates due to further findings and results not previously known or fluctuations in operating costs, exchange rates and metal prices. This may result in alterations to mining and development plans which may in turn adversely affect the Company. The consequences for project economics may be either positive or negative.

Failure to Enter into Sales or Offtake Agreements

The Company has entered into, and continues to enter into and engage in negotiations in respect of, various non-legally binding Letters of Intent with respect to sales or off-take agreements. To date, no other definitive sales or off-take agreements have been entered into in respect of any of the Company's planned production of iron ore from the Hawsons Iron Project.

Assuming the Company is able to secure sales or off-take agreements in the future, the Company may depend upon a small number of large customers, the loss of any of which, or inability to collect payment from, could adversely affect the Company's results of operations and financial condition. Furthermore, the Company's ability to receive payment for iron ore sold and delivered under any future sales or off-take agreements will depend on the continued creditworthiness of its customers. If the Company is unable to collect payments from any of its customers, the Company's financial condition and results of operations could be materially adversely affected.

Should the Company be unable to find customers to purchase its produced volume, its financial results may be adversely affected.

Limited Operating History

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenements or any other tenements acquired by the Company. Until the Company is able to realise value from the Hawsons Iron Project or any project it may in the future acquire an interest in, it is likely to incur ongoing operating losses.

Exploration Costs

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's operating and financial performance and the value of the Shares.

Liquidity Risk

There is no guarantee that there will be an ongoing liquid market for Shares. If illiquidity arises, there is a real risk that Shareholders will be unable to realise their investment in the Company.

Personnel

The Company is reliant on a limited number of key personnel that possess a strong knowledge of the operations and history of Carpentaria. Should any of these key personnel become unavailable, the Company may be adversely impacted.

4.3 Industry Risks

Operating Risks

The current and future operations of the Company, including exploration, project appraisal and possible production activities may be affected by various factors which can limit or prevent such activities. Such factors may include failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in surveying, drilling, other exploration activities and/or production activities, difficulties in commissioning and operating plant and equipment, electrical or mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of skilled labour, consumables, spare parts, plant and equipment.

Commercial Risk

The mining industry is competitive and there is no assurance that, even if commercial quantities of minerals are discovered by the Company on the Hawsons Iron Project or future projects it may acquire an interest in, a profitable market will exist for sales of such minerals. There can be no assurance that the quality of any such minerals will be such that they can be mined economically.

Commodity Price Volatility and Exchange Rate Risks

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of iron ore or any other minerals it may discover exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for steel and base metals, technological advancements, forward selling activities and other macro-economic factors such as inflation expectations, interest rates and general global economic conditions.

Furthermore, international prices of various commodities are denominated in United States dollars whereas the income and expenditure of the Company are and will be taken into account in Australian currency. This exposes the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

If the price of commodities declines this could have an adverse effect on the Company's exploration, development and possible production activities, and its ability to fund these activities, which may no longer be profitable.

Insurance Risks

Exploration for and development of minerals involves hazards and risks that could result in the Company incurring losses or liabilities that could arise from its operations. If the Company incurs losses or liabilities which are not covered by its insurance policies, the funds available for exploration and development will be reduced and the value and/or title to the Company's assets may be at risk.

The Company endeavours to insure its operations in accordance with industry practice. However, in certain circumstances the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance against all risks associated with mining exploration and production is not always available and, where available, the costs can be prohibitive or not adequate to cover all claims.

Environmental Risks

The operations and proposed activities of the Company are currently subject to New South Wales, South Australian and Commonwealth of Australia laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. Future legislation and regulations governing exploration, development and possible production may impose significant environmental obligations on the Company.

The cost and complexity of complying with the applicable environmental laws and regulations may prevent the Company from being able to develop potential economically viable mineral deposits. The Company may require approval from the relevant authorities before it can undertake activities that are likely to impact the environment. Failure to obtain such approvals or to obtain them on terms acceptable to the Company may prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations, which may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations in any area.

There can be no assurances that new environmental laws, regulations or stricter enforcement policies, once implemented, will not oblige the Company to incur significant expenses and undertake significant investments in such respect which could have a material adverse effect on the Company's business, financial condition and results of operations.

4.4 General Risks

General Economic Conditions

General economic conditions, introduction of tax reform, new legislation, the general level of activity within the resources industry, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and possible production activities, as well as on its ability to fund those activities both in Australia and overseas.

Share Market Conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (a) general economic outlook;
- (b) the introduction of tax reform or other new legislation (such as royalties);
- (c) interest rates and inflation rates;
- (d) currency fluctuations;
- (e) changes in investor sentiment toward particular market sectors in Australia and/or overseas (such as the exploration industry or iron ore sector within that industry);
- (f) the demand for, and supply of, capital; and
- (g) terrorism or other hostilities.

The market price of the Shares can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular, which influences are beyond the Company's control and which are unrelated to the Company's performance. Neither the Company nor the Directors warrant the future performance of the Company or the Shares and subsequently any return on an investment in the Company.

Shareholders who decide to sell their Shares after the Company is admitted to the ASX may not receive the entire amount of their original investment.

Volatility in Global Credit and Investment Markets

Global credit, commodity and investment markets have recently experienced a high degree of uncertainty and volatility. The factors which have led to this situation have been outside the control of the Company and may continue for some time resulting in continued volatility and uncertainty in world stock markets (including the ASX). This may impact the price at which the Shares trade regardless of operating performance and affect the Company's ability to raise additional equity and/or debt to achieve its objectives, if required.

Government and Legal Risk

The introduction of new legislation or amendments to existing legislation by governments (including introduction of tax reform), developments in existing common law or the respective interpretation of the legal requirements in any of the legal jurisdictions which govern the Company's operations or contractual obligations, could impact adversely on the assets, operations and ultimately the financial performance of the Company and its Shares. The same adverse impact is possible by the introduction of new government policy or amendments to existing government policy, including without limitation government policy or amendments addressing mitigating adverse climate change effects.

Unforeseen Expenditure Risk

Expenditure may need to be incurred that has not been considered in this Prospectus. Although the Company is not aware of any such additional expenditure requirements, if such expenditure is subsequently incurred, this may adversely affect the expenditure proposals and activities of the Company, as the Company may be required to reduce the scope of its operations and scale-back its exploration programmes. This could have a material adverse effect on the Company's activities and the value of the Shares.

5.2 Continuous disclosure and inspection of documents

The Company is a 'disclosing entity' (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, accordingly, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or value of the securities in the Company.

This Prospectus is a 'transaction specific prospectus'. In general terms, a 'transaction specific prospectus' is only required to contain information in relation to the effect of the issue of securities on the Company and the rights attaching to securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information, and in particular the Investor Presentation, in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made all enquiries as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 12 months before the issue of this Prospectus which required the Company to notify ASX about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete. The Company, as a disclosing entity under the Corporations Act states that:

- (a) It is subject to regular reporting and disclosure obligations;
- (b) Copies of documents lodged with ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of ASIC;
- (c) It will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:
 - (i) The annual financial report most recently lodged by the Company with ASIC;
 - (ii) Disclosure documents given by the Company to ASX in accordance with Listing Rules as referred to in section 674(1) of the Corporations Act after the lodgement of the annual financial report referred to in paragraph (i) and before the lodgement of this Prospectus with ASIC. 5.3 Rights of the New Shares

The following is a summary of the more significant rights attaching to New Shares being offered under this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice. Full details of the rights and liabilities attaching to Shares are set out in the Company's constitution, a copy of which is available for inspection at the Company's registered address.

(a) Share capital

Subject to the constitution:

- (i) all matters relating to the issue of shares shall be under the control of the Directors who may issue, allot or otherwise dispose of the same to such person or persons on such terms and conditions and with such rights and privileges attached and at such times as the Directors may think fit; and
- (ii) any resolution passed in accordance with the constitution for the alteration of capital, the Directors may issue new shares with or without any special conditions, preferences or priority either as to dividends or capital or both with any other special rights or advantages. In the absence of any special conditions or rights, such new shares when issued shall be held upon the same conditions as if they had been ordinary shares in the original capital, and shall be subject to the provisions of the constitution that relate to ordinary shares in the Company.

(b) Voting rights

Subject to the constitution and to any rights or restrictions attached to any class or classes of Shares, at a general meeting:

- (i) each Shareholder entitled to vote may vote in person or by proxy, representative or attorney;
- (ii) on a show of hands, every Shareholder present has one vote; and
- (iii) on a poll, every Shareholder present has one vote for each share held by the Shareholder entitling the Shareholder to vote, except for partly paid shares, each of which confers on a poll only the fraction of one vote which the amount paid (not credited) bears to the total amounts paid or payable (excluding amounts credited) on the share. An amount paid in advance of a call is disregarded for this purpose.

(c) General meetings

Shareholders are entitled to receive written notice of and attend and vote at general meetings of the Company. Annual general meetings of the Company are held in accordance with the Corporations Act.

(d) Dividend rights

Subject to the Corporations Act, the Company's profits which the Directors determine to distribute by way of dividends are divisible amongst the holders of Shares in proportion to the amounts paid (excluding any amount paid or credited as paid in advance of a call) on the Shares at the date of declaration of the dividend.

(e) Transfer of Shares

Generally, all Shares are freely transferable subject to the procedural requirements of the constitution and to the provisions of the Corporations Act, Listing Rules and ASX Settlement and Transfer Corporation Pty Limited (**ASTC**) Settlement Rules. If, when permitted to do so, the Directors refuse to register a transfer of shares, the Company

must give notice of the refusal and the precise reasons for such action within 5 business days after the date on which the transfer was lodged by the Company.

(f) **Winding-up**

Subject to the rights of holders of Shares issued on special terms and conditions, on a winding up of the Company, the liquidator, with the sanction of a special resolution of the Company, may:

- (i) divide in specie among the contributories of the Company any part of the surplus assets (being those assets of the Company which, upon the winding up of the Company, remain after payment of debts and liabilities of the Company and the costs of winding up); and
- (ii) may vest any part of the surplus assets in trustees on such trusts for the benefit of the contributories or any of them as the liquidator shall think fit.

(g) **Variation of rights**

At present, the Company only has ordinary Shares on issue and has no current plans to create further classes of Shares. The rights and restrictions attaching to a class of the Company's Shares shall not at any time, be varied without:

- (i) the consent in writing of the holders of 75% of the issued shares of that class; or
- (ii) the sanction of a special resolution passed at a separate meeting of holders of the shares of that class.

(h) **Number of Directors**

The constitution provides that the Company may from time to time by resolution at a meeting increase or reduce the number of Directors. Currently, the number of Directors must not be less than 3 or more than 9.

5.4 **Underwriting arrangements**

On 5 July 2021, Carpentaria entered into the Underwriting Agreement under which Shaw and Partners has agreed to manage the Rights Issue (and fully underwrite the Rights Issue of approximately \$35.6 million).

5.6 **Placement**

Immediately prior to the Rights Issue, the Company has agreed to a Placement of New Shares to raise approximately an additional \$2,000,000 and to a Conditional Placement, which (if approved by shareholders) will raise approximately an additional \$6,150,000.

The issue price under the Placement and the Conditional Placement is the same price of 15 cents (\$0.15) per New Share as under the Rights Issue.
