About Living Cell Technologies

Living Cell Technologies Limited (LCT) is an Australasian biotechnology company that has focused on discovering and developing novel treatments for debilitating conditions such as diabetes and Parkinson's disease.

LCT has outlicensed DIABECCELL (alginate coated capsule containing neonatal porcine pancreatic cells) to Diatranz Otsuka Limited to continue the development of a cell therapy for type 1 diabetes in return for a royalty arrangement.

LCT is evaluating the next step in the development of NTCELL (alginate coated capsule containing clusters of neonatal porcine choroid plexus cells) after completing phase 2a and 2b clinical studies in Parkinson's Disease. In a Phase IIB trial of NTCELL, there was not a statistically significant difference between the groups who received NTCELL and the placebo group at the 26-week study endpoint. However, at 24 months post-implant a clinically relevant effect was observed (<-6.45 points from baseline) in two of the three treatment groups.

LCT continues to seek new product project opportunities and also interactions that leverage its financial assets.

LCT is listed on the Australian (ASX: LCT) and US (OTCQX: LVCLY) stock exchanges. The company is incorporated in Australia, with its operations based in New Zealand.
