Copalquin Mining District, Mexico

**Investor Presentation
September 2021**

Important Information

The release, publication or distribution of this presentation in certain jurisdictions may be restricted by law and therefore persons in such jurisdictions into which this presentation is released, published or distributed should inform themselves about and observe such restrictions.

DISCLAIMER

This presentation is for informational purposes only and does not constitute an offer to sell, or solicitation to purchase, any securities. Such Offer can be made only through proper subscription documentation and only to investors meeting strict suitability requirements. Any failure to comply with these restrictions may constitute a violation of applicable securities laws. In providing this presentation Mithril Resources Limited ACN 099 883 922 (“MTH”) has not considered the financial position or needs of the recipient. Persons needing advice should consult their stockbroker, bank manager, solicitor, attorney, accountant or other independent financial and legal advisors.

FORWARD LOOKING STATEMENTS

Various statements in this presentation constitute statements relating to intentions, future acts and events. Such statements are generally classified as “forward looking statements” and involve known and unknown risks, uncertainties and other important factors that could cause those future acts, events and circumstances to differ materially from what is presented or implicitly portrayed herein. Words such as “anticipates”, “expects”, “intends”, “plans”, “believes”, “seeks”, “estimates” and similar expressions are intended to identify forward-looking statements. MTH caution shareholders and prospective shareholders not to place undue reliance on these forward- looking statements, which reflect the view of MTH only as of the date of this presentation. The forward-looking statements made in this presentation relate only to events as of the date on which the statements are made.

COMPETENT PERSON

The information in this report that relates to sampling techniques and data, exploration results and geological interpretation has been compiled by Mr Hall Stewart who is Mithril’s Chief Geologist. Mr Stewart is a certified professional geologist of the American Institute of Professional Geologists. This is a Recognised Professional Organisation (RPO) under the Joint Ore Reserves Committee (JORC) Code.

Mr Stewart has sufficient experience of relevance to the styles of mineralisation and the types of deposits under consideration, and to the activities undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Stewart consents to the inclusion in this report of the matters based on information in the form and context in which it appears. The Australian Securities Exchange has not reviewed and does not accept responsibility for the accuracy or adequacy of this release.

ASX Releases with more details regarding information in this presentation:

- 11 Aug 2021 Mithril Extends High-Grade Gold Silver
- 28 Jul 2021 Quarterly activities and cashflow report
- 12 Jul 2021 MITHRIL DRILLS 80.3 G/T GOLD, 705 G/T SILVER OVER 8.26M
- 15 Jun 2021 MITHRIL DRILLS 74 G/T GOLD, 841 G/T SILVER OVER 6.8 METRES
- 24 May 2021 Drilling Plan Progress - Copalquin District Mexico
- 19 May 2021 Extensive Gold-Silver Confirmed El Refugio West
- 04 May 2021 High-Grades continue at El Refugio - Copalquin District

Company Statement

LONG TERM GOAL

- To become a highly profitable producer of gold and silver from high-grade resources

IN PROGRESS

- Discovery of a high-grade gold and silver deposit in our Copalquin District
- Located in prolific Sierra Madre Gold Silver Trend of Mexico – home to multiple tier 1 producers and explorers

NEXT 12 MONTHS

- Complete maiden JORC resource estimate for initial drill area at El Refugio
- Continue expansive drilling at El Refugio, engineering for underground access drift, metallurgy and engineering studies
- Progress district exploration

CDH-079 12.4m 7.6 g/t Au, 332 g/t Ag
from 86.6m

Investment Highlights

Tier 1 Location

- Sierra Madre Trend is home to multiple gold-silver producers and explorers - mature minerals industry

Entire Mining District

- Mithril's Copalquin District covers 70 km² with over 60 historic mines/workings

Path to Production

- Maiden resource estimate Q4 2021 - plans for high-grade gold and silver production from El Refugio

Within Excellent Infrastructure

- Copalquin is close to towns, airstrips, highways, power infrastructure and water supply

Mexico & Development Experienced Management

- Mithril's management has combined 50 years Mexico experience and has developed deposits in Mexico and globally

Share Price Performance

Mithril's Mexico Focus - Gold and Silver in the Sierra Madre

Exposure to both gold and silver.
Copalquin is a silver district with high gold grades

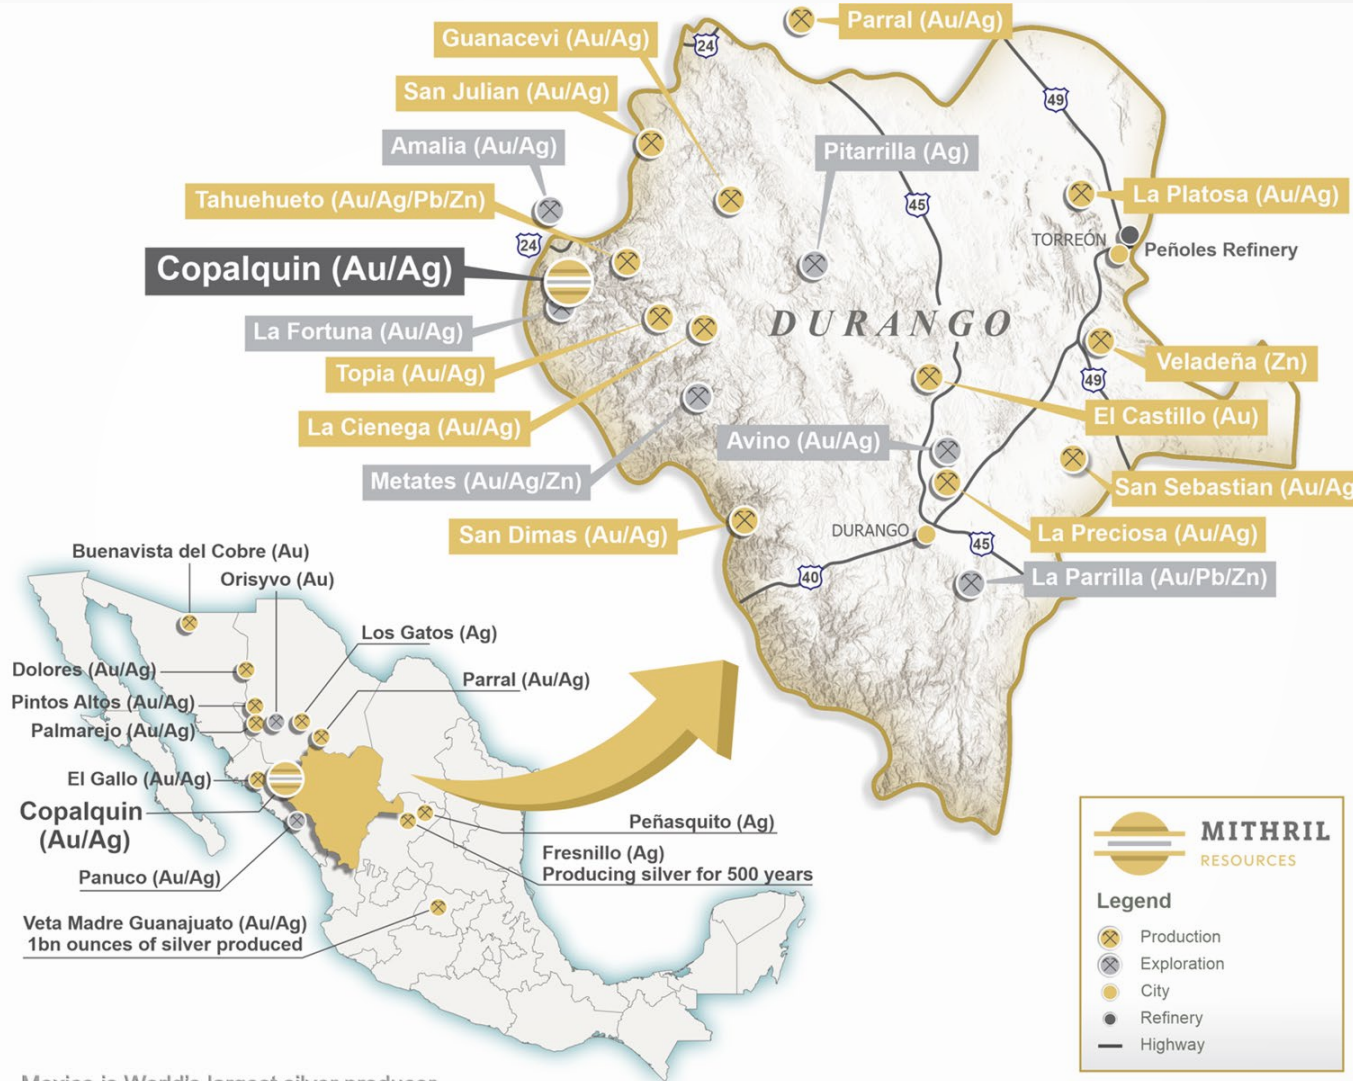

Low risk jurisdiction of Mexico
A rich mining history, numerous large cap global companies, gold silver trend with world class deposits

Large gold-silver resource potential
Dozens of historic mines and workings throughout the 70km² concession area

Management and board with extensive experience across multiple disciplines, significant ownership and a history of shareholder wealth creation

History of Copalquin District

DISCOVERY	<ul style="list-style-type: none"> • First mining took place in 1849 at El Refugio mine • By 1890s ore was processed at a 20 head stamp battery and cyanidation vats at La Maquina
PRODUCTION YEARS	<ul style="list-style-type: none"> • Copalquin District had several well-developed multilevel mines operating by late 1800s prior to Mexican revolution • Some production from La Soledad in 1930s and San Manuel in 1970s
MODERN EXPLORATION	<ul style="list-style-type: none"> • In 1990s Kennecott, Grupo Mexico & others reviewed the district • Bell Coast Capital Corp. drilled at El Cometa in late 1990s • UC Resources drilled at El Cometa, El Refugio and La Soledad in early 2000s
YEARS OF LEGAL IMPEDIMENT	<ul style="list-style-type: none"> • After TSX listed UC Resources ceased activities, option contract remained registered on concessions for several years while Mexican mining taxes accrued • This was a significant impediment for North American majors progressing their interest in the district
SUN MINERALS	<ul style="list-style-type: none"> • Acquired option to purchase 100% of Copalquin concessions in 2017 • Completed its due diligence and worked with the vendor and legal advisors to put concessions in good standing • Sun Minerals Pty Ltd acquired by Mithril in May 2020

ONE DUMP, EL REFUGIO MINE, MEXICO.

A GROUP AT COPALQUIN, MEXICO.

ENTRANCE TO UPPER TUNNEL, EL REFUGIO MINE.

PART OF COPALQUIN CAMP, MEXICO.

favorably impressed with Copalquin as a mineral region that he has located there, and engaged in mining on his own account.

Within the limits of the territory which may be denominated the Copalquin Mining Camp, and embracing the village of Limon, are located the three groups of mining properties owned by the Consolidated Copalquin Mines Company, Limited, or its principals in interest. These groups, the Copalquin, Limon and Soledad, comprising at present 14 different properties, lie within an area of 7 by 2 miles, and in close proximity to the Copalquin Creek and Limon River, which water the camp.

Development work by this company has been mainly confined to El Refugio Mine, although more or less prospect work has been done on some of its other properties, and on others there are old workings of considerable extent, made in former years by native owners in their search for and extraction of bonanza ores.

The Refugio property consists of 150,000 sq. meters, situated in the center of the group of mines owned by the company. It is joined by La Lena Mine, also belonging to the company, which, in turn, adjoins La Soledad Mine, which latter is the property of Mr. Remedios de

1897, the work of systematic development upon the Refugio Mine was begun by the company, and prosecuted up to the present time.

The mine is located 350 m. above the Copalquin Creek and 1,130 m. above sea level, and its plan of development is that of self-draining tunnels.

The workings of El Refugio consist of 534 ft. of tunnels, 139 ft. crosscuts, 746 ft. levels, 218 ft. drifts, 562 ft. winzes, and 400 ft. old drifts, etc., besides a large amount of irregular workings where rich pockets of ore have been taken out by previous owners. There is about 50,000 tons of ore in sight in this mine, which, according to exhaustive milling tests, show 12 1/4 oz. silver and 1 oz. gold per ton.

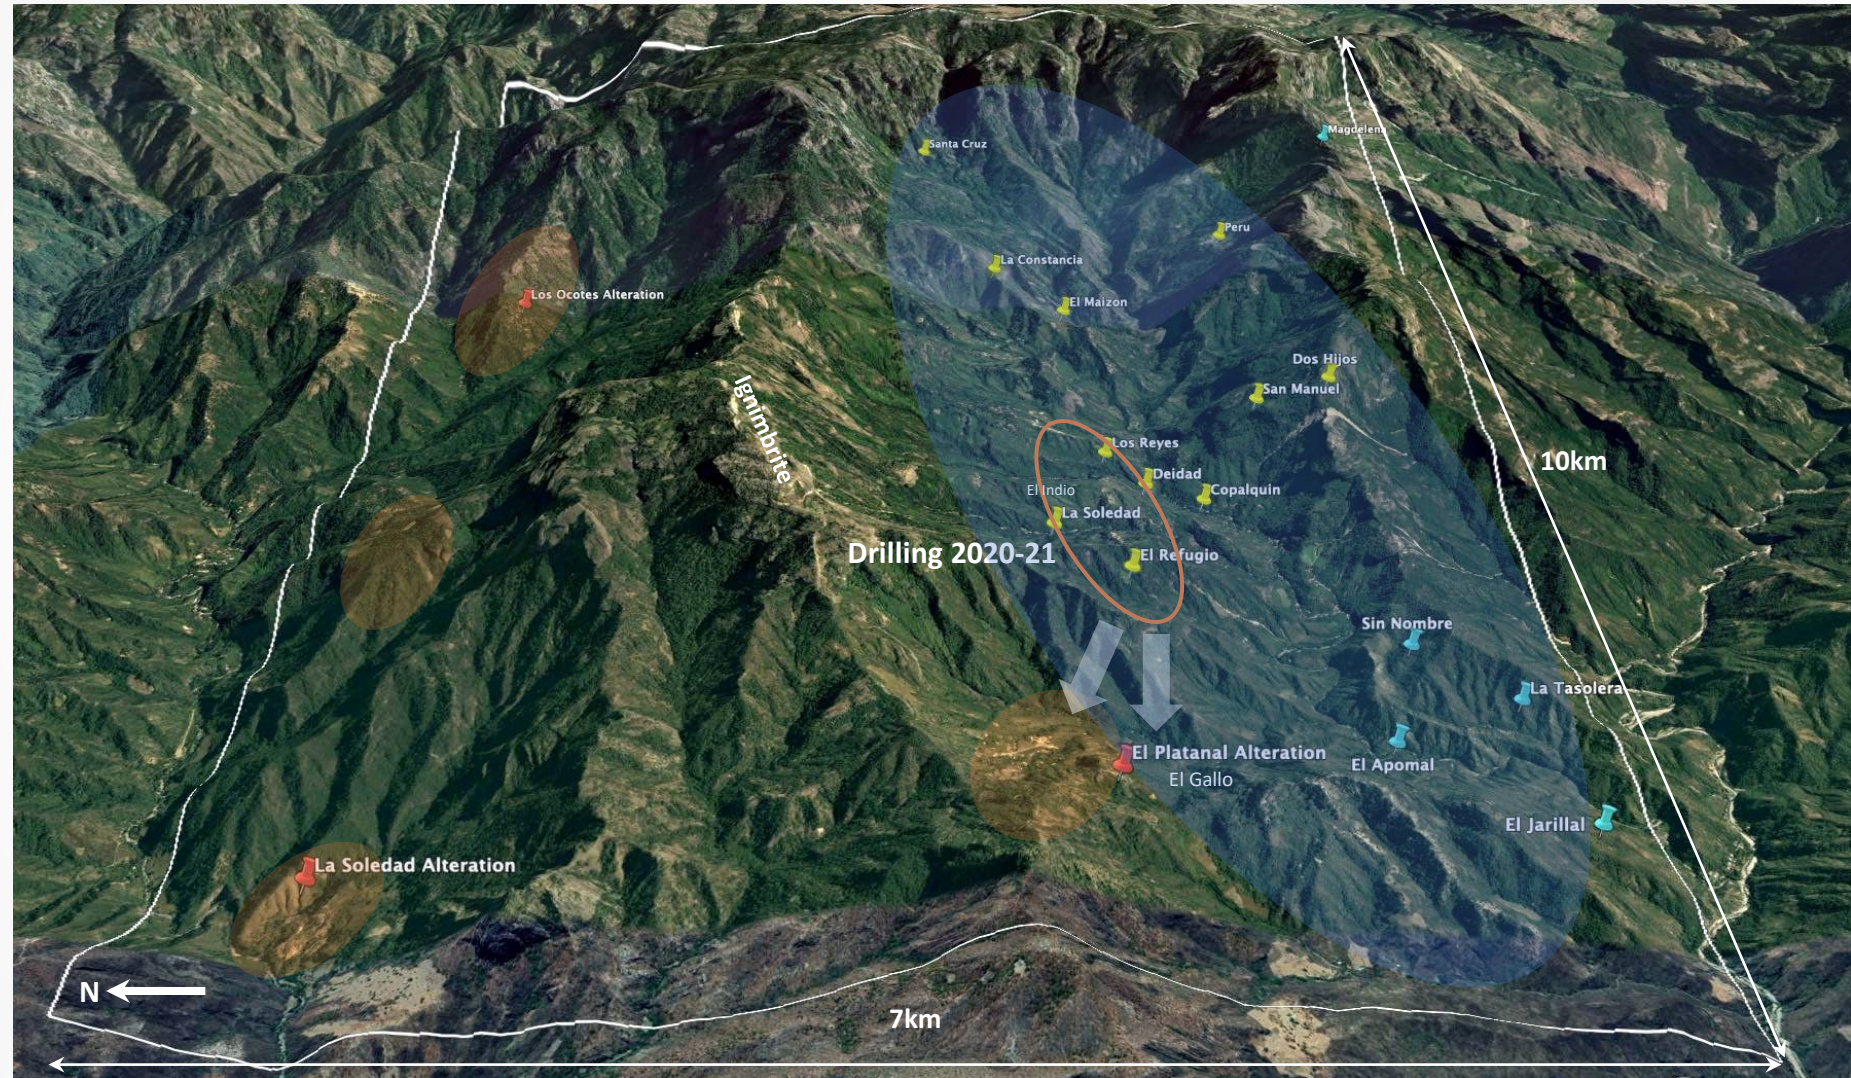

The process of treatment provided for is continuous, and consists in wet crushing, amalgamation in the batteries by means of chuck-block plates, and concentration of the pyrites and silver sulphides upon Frue vanners and Wilfley tables.

The plant now being installed comprises 20 stamps in four batteries, 2 crushers, 7 vanners, and Pelton water wheels. Its capacity will be about 75 tons per day. It was supplied complete by the Gates Iron Works, of Chicago, and is of the most modern and approved type in every detail.

*See "Engineering and Mining Journal," February 24th, 1900, page 225.

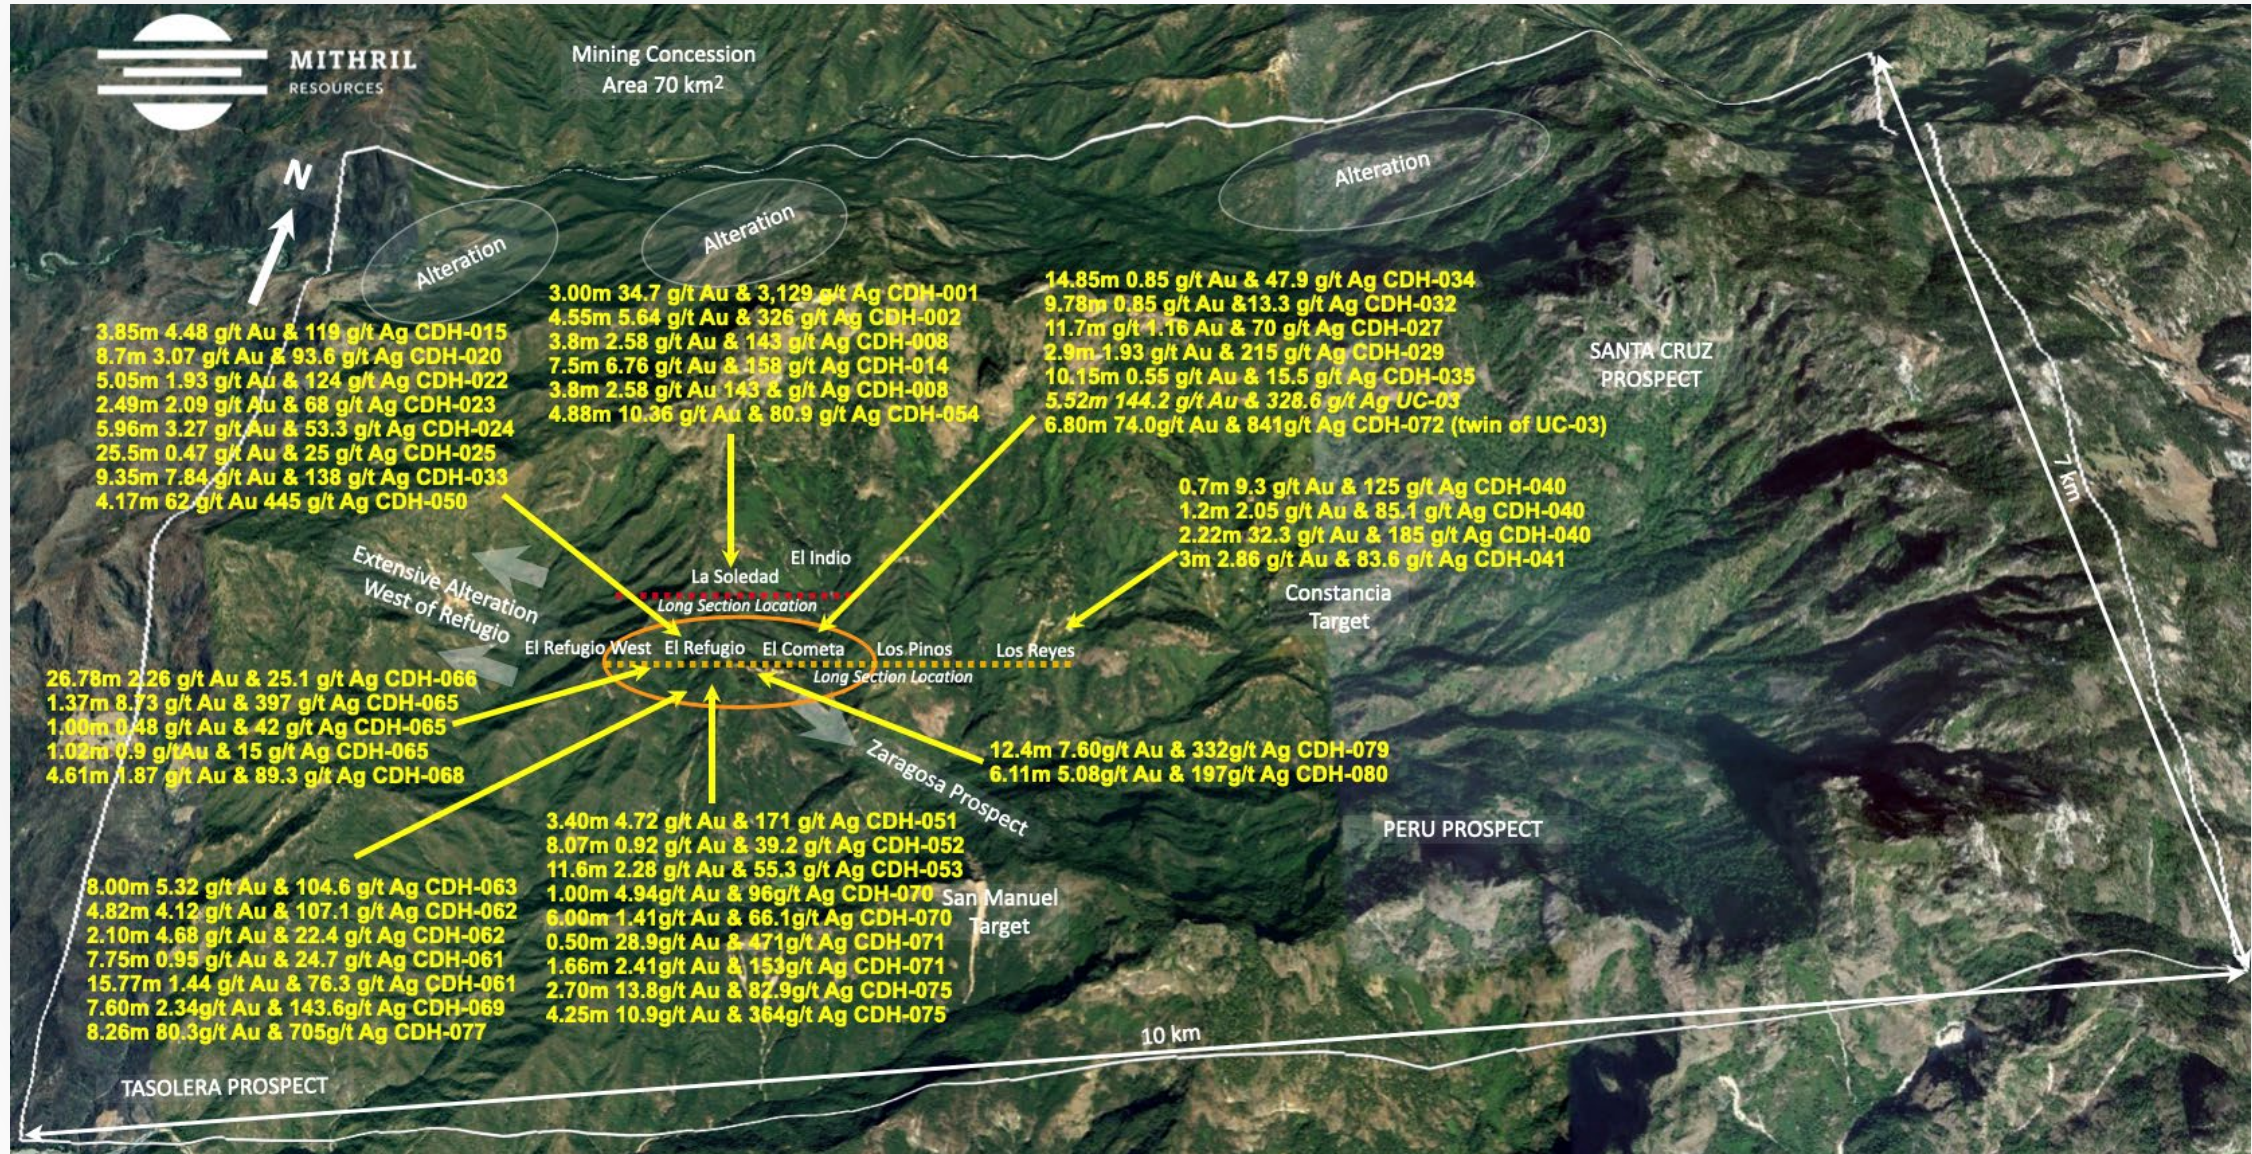

Large Upside for Gold and Silver in the Copalquin District

- Numerous historic mine clusters are found throughout the mineralised valley.
- Clusters of historic workings run for 8 km from east to west.
- Drilling has focused on La Soledad and El Refugio workings areas.
- In unexplored northern section are three alteration areas which require mapping and soil sampling investigation
- Large alteration area identified by UC Resources during their work, El Platanal Alteration, west of El Refugio
- Most of the known gold and silver mineralisation located in valley running east to west constrained by ignimbrite north and south
- Ignimbrite flareup provided heat source for mineralisation and has driven gold and silver mineralisation
- Intrusion of the granodiorite and faulting provided ground preparation sites for gold and silver mineralised fluids to enter

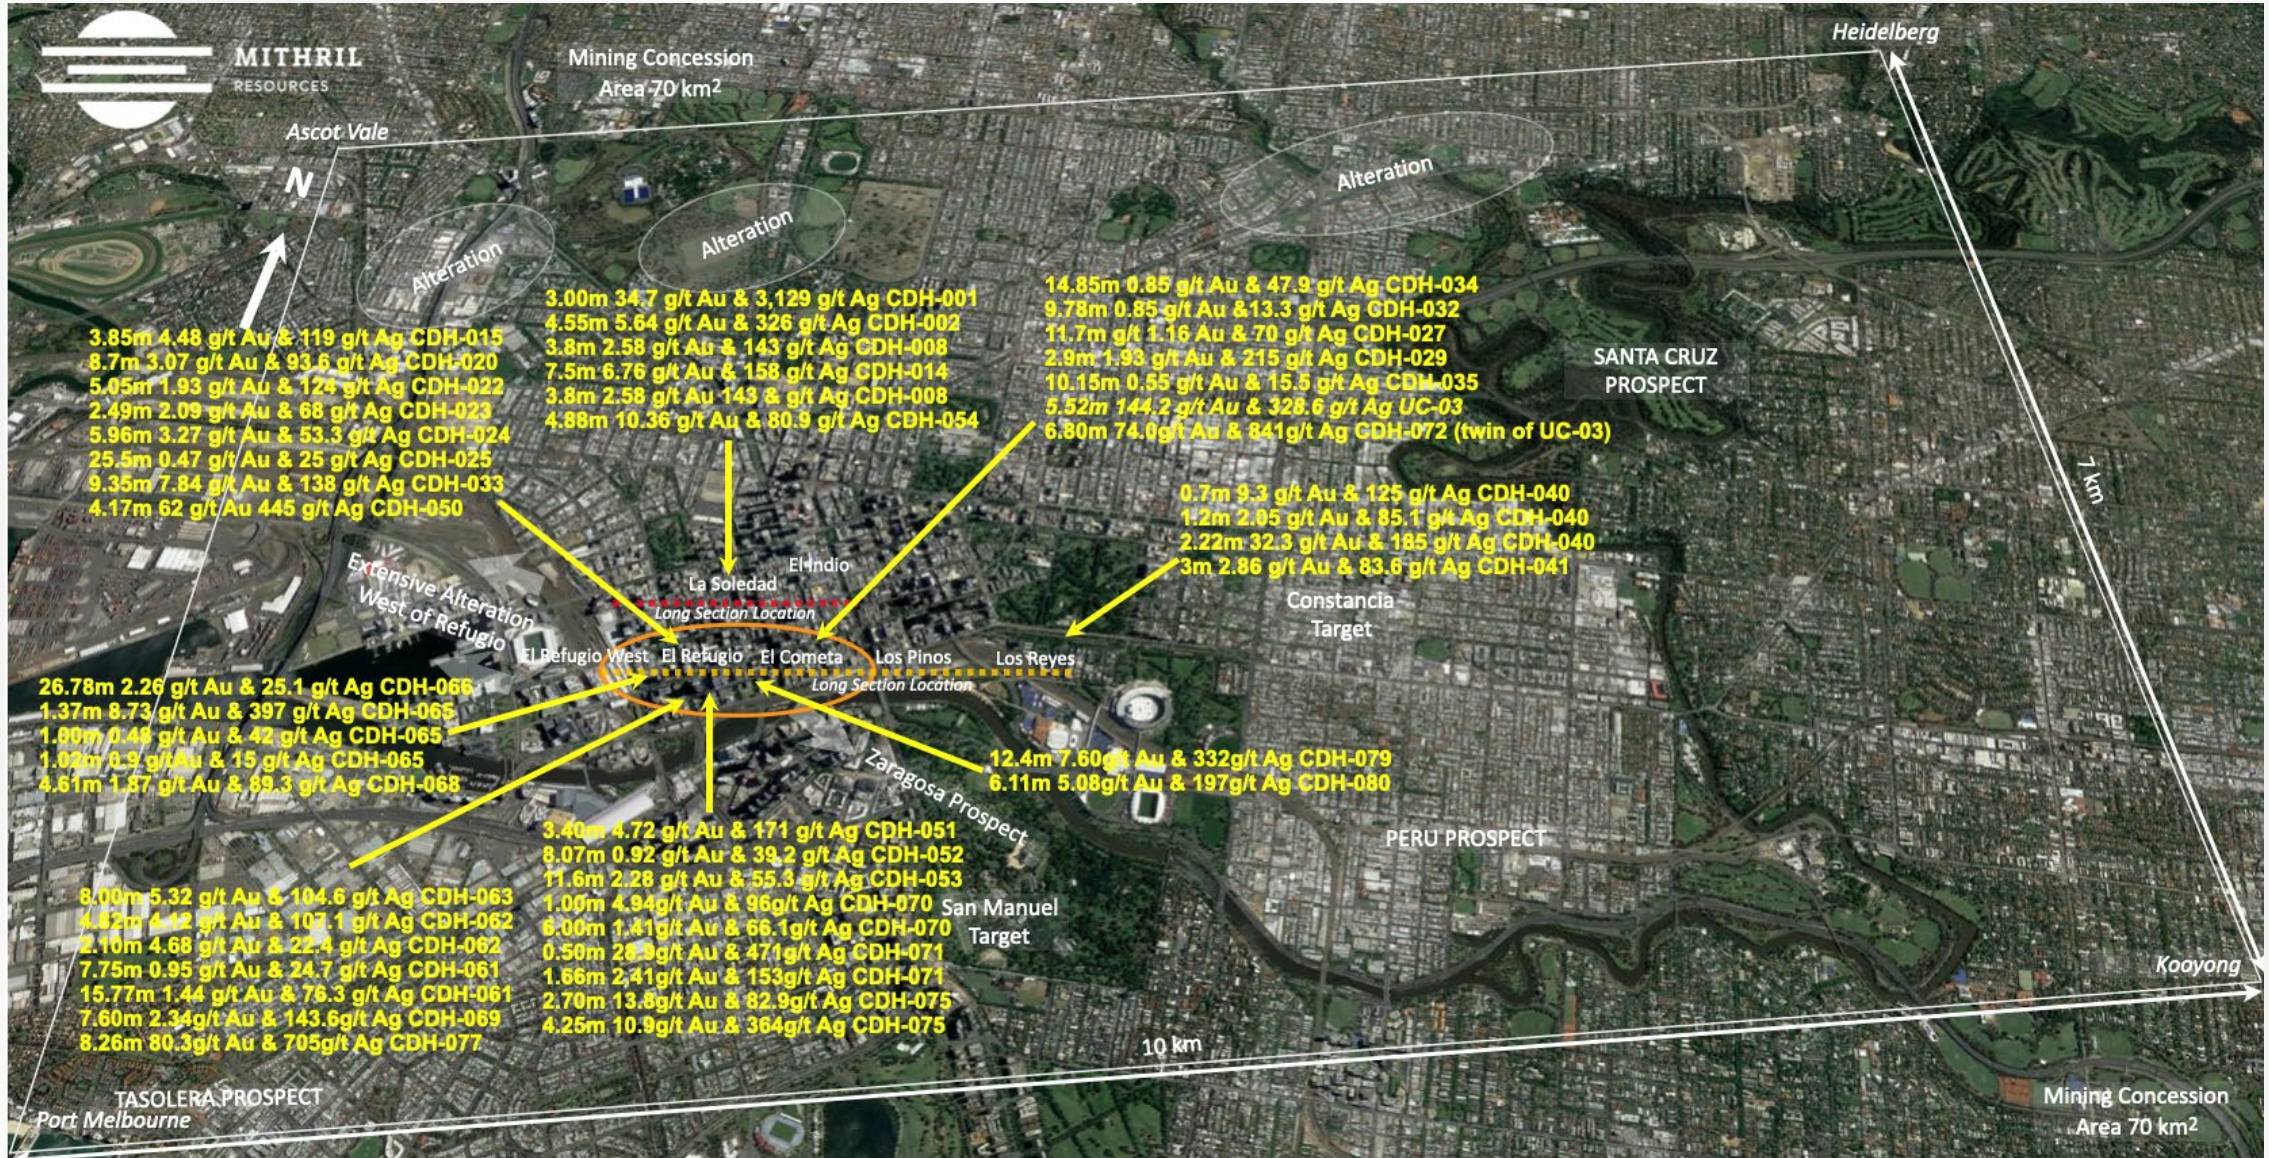

The 7,005 Ha concession area looking east.

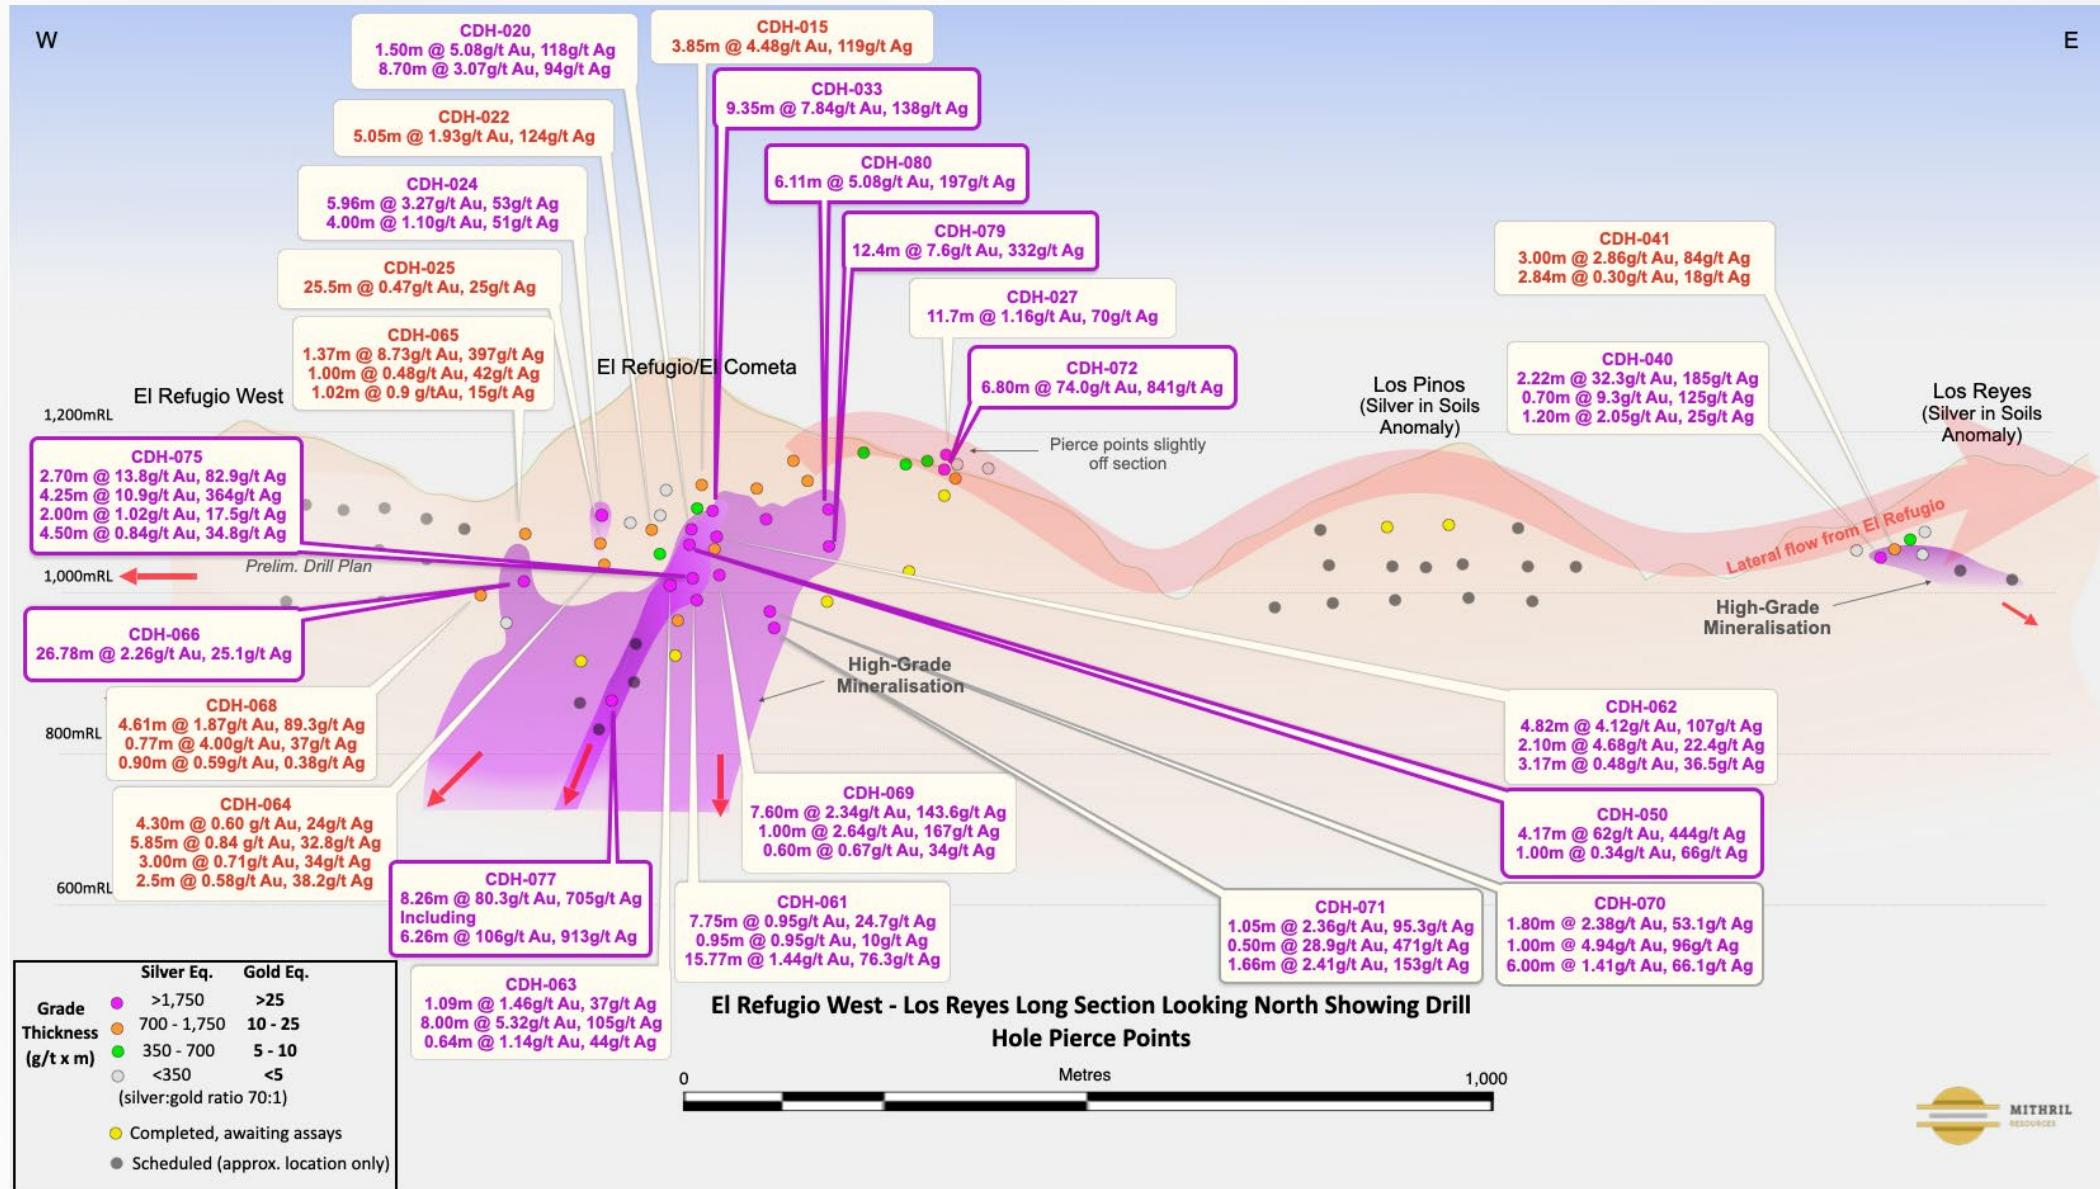

Copalquin District Drill Highlights – First Year of Drilling

Copalquin District Over Melbourne

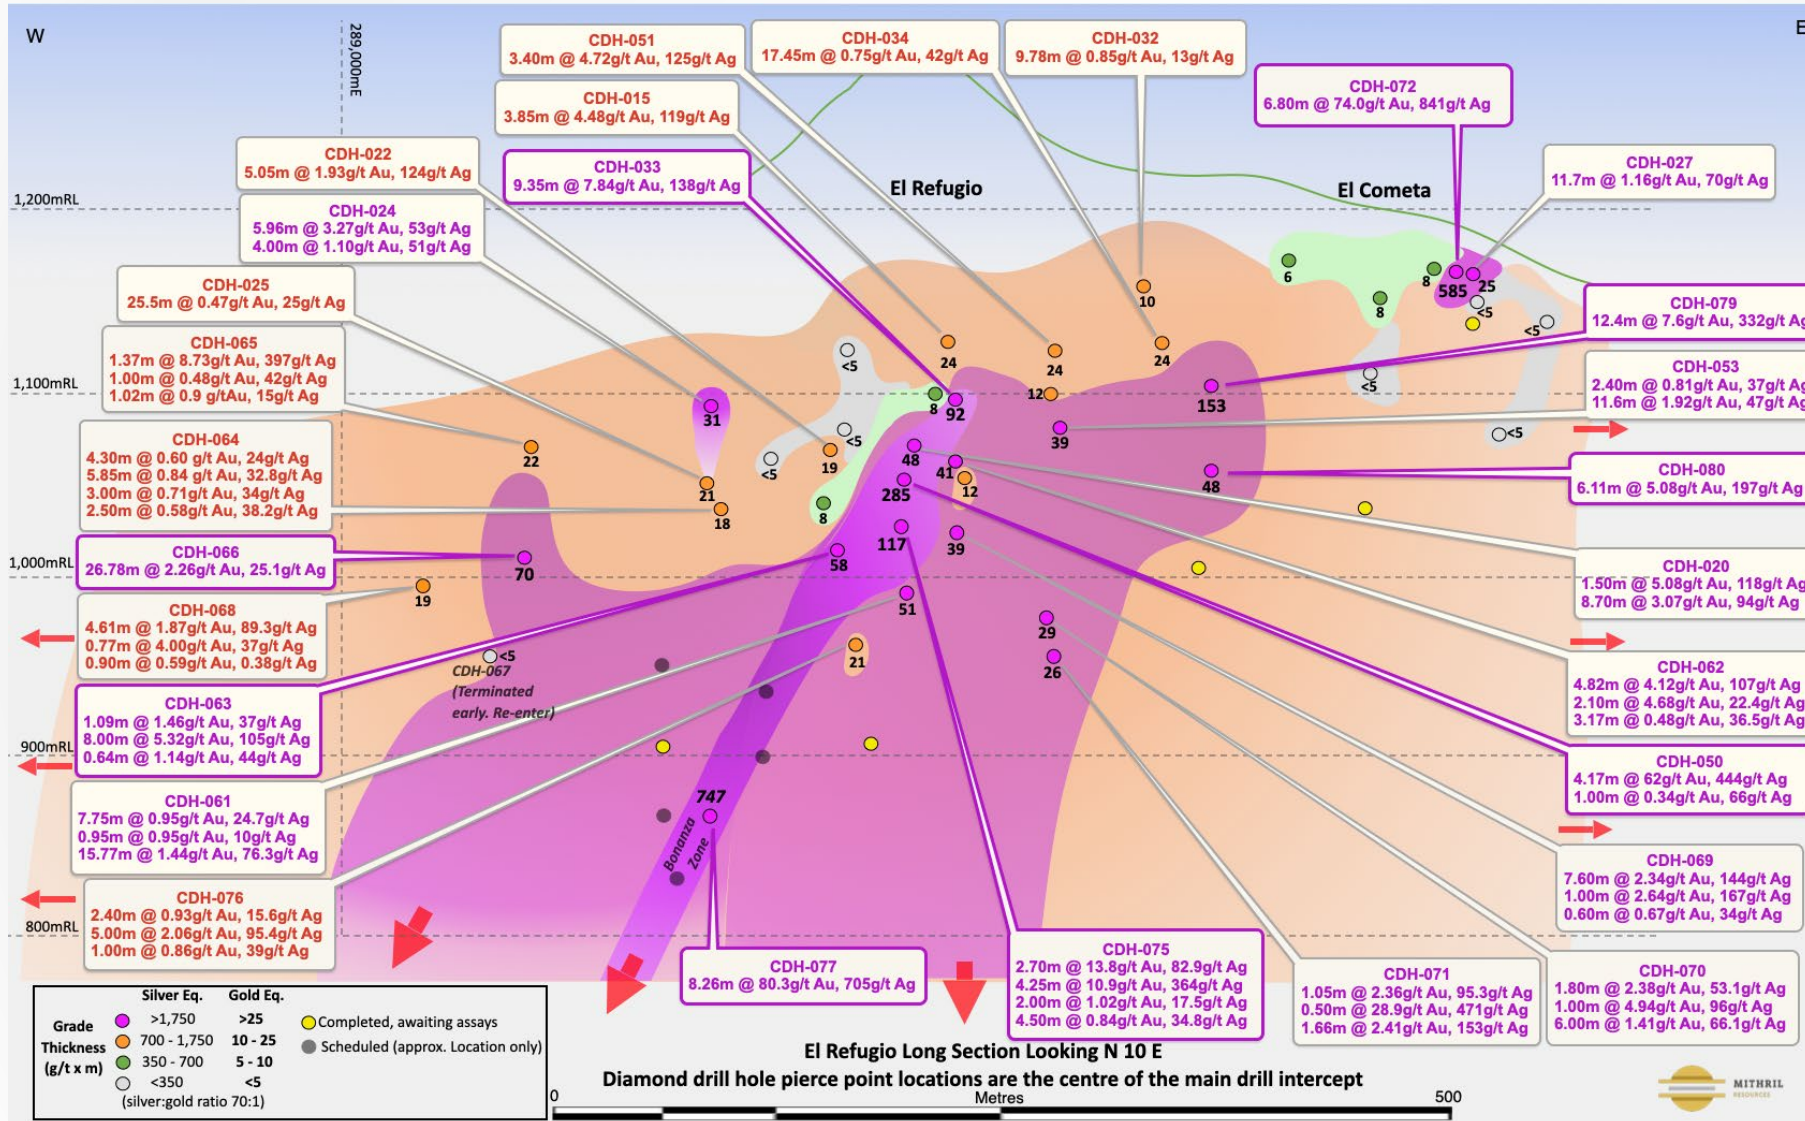

Schematic Long Section - El Refugio to Los Reyes

¹Gold Eq. = gold equivalent. Silver Eq. = silver equivalent. Calculated using 70 g/t Ag = 1 g/t Au, based on gold price of USD1,610/oz and silver price of USD23/oz

High Grade 'Clavo'- El Refugio

- Longitudinal section at El Refugio showing drill hole pierce points
- Grade domains show grade has increased with depth
- Over 600m wide & 350m deep
- High-grade 'clavo' established with widespread and continuous mineralization
- Every hole drilled at El Refugio has intercepted mineralization with reportable intercepts
- Underground mineable widths with high grade gold & silver

¹Gold Eq. = gold equivalent. Silver Eq. = silver equivalent. Calculated using 70 g/t Ag = 1 g/t Au, based on gold price of USD1,610/oz and silver price of USD23/oz

¹AuEq = gold equivalent. Calculated using 70 g/t Ag = 1 g/t Au, based on gold price of USD1,610/oz and silver price of USD23/oz

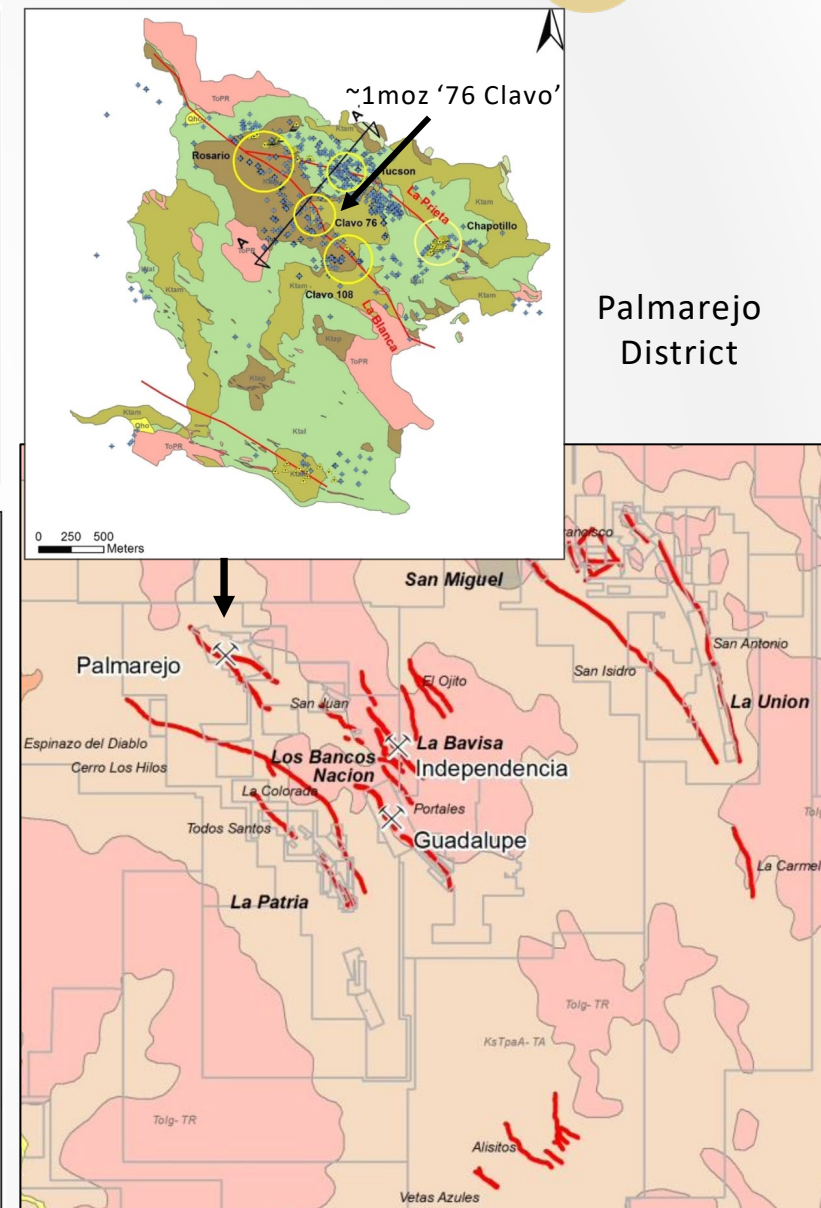

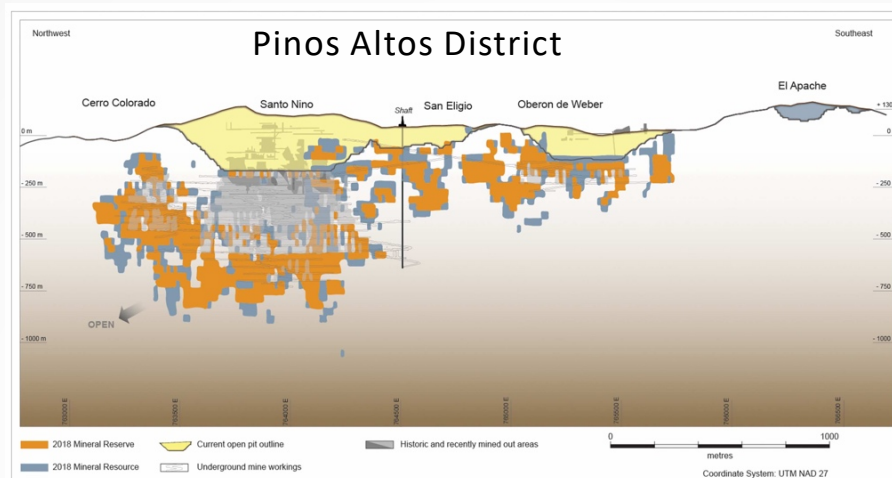

Comparison With Other Regional Epithermal Gold-Silver Districts

- Multiple mineralisation events typical of large epithermal gold and silver deposits such as Palmarejo, San Dimas and Pinos Altos districts
- These systems typically extend from near surface to over 700m deep
- Rhyolite dykes/domes proximal to mineralisation and widespread surface alteration
- At Palmarejo, systematic drilling discovered several ore shoots (clavos) along the structures
- The '76 Clavo' at Palmarejo was discovered with the 76th drill hole intercepting a reported 27.5m @ 35.5g/t AuEq = 976 g/t x m
- For comparison, MTH's drill hole CDH-077 intercepted 8.26m @ 90.4 g/t AuEq¹ = 747 g/t x m
- Palmarejo now consists of three producing mines. After 11 years there are still significant reserves and resources for gold and silver²

¹AuEq = gold equivalent. Calculated using 70 g/t Ag = 1 g/t Au, based on gold price of USD1,610/oz and silver price of USD23/oz

²From Coeur Mining's Website

Simple Mineralogy and Metallurgy

- Silver as Argentite/Acanthite sulphides
- Native gold 2mm to >10 microns
- Electrum gold-silver mineral
- Minor sulphides (no arsenic)
- Same mineralogy as Palmarejo
 - Low mass to a flotation concentrate
 - Cyanidation
- Core samples selected for test work

CDH-054 at 292.4m, La Soledad

CDH-050 at 234.8m, El Refugio

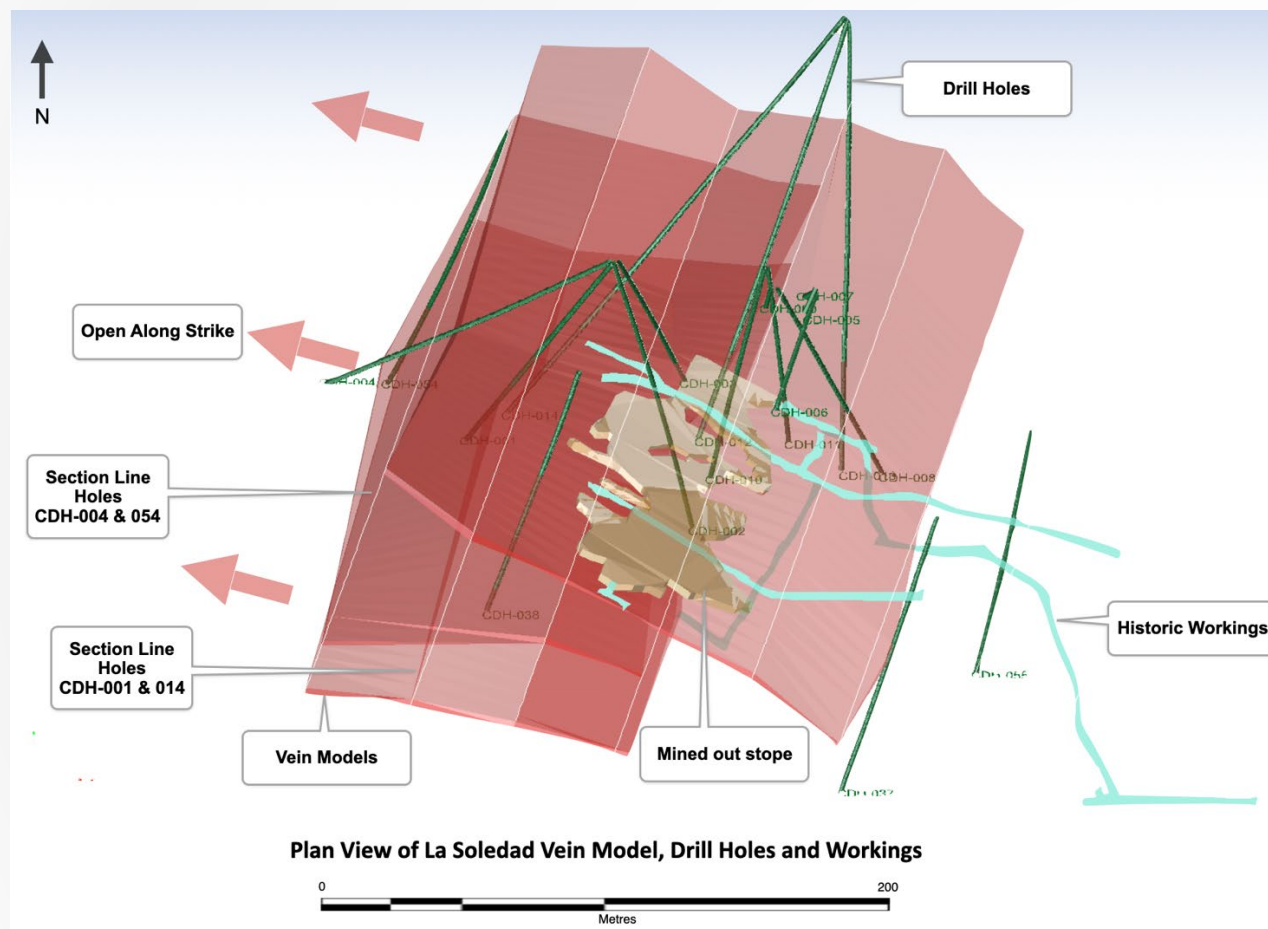

Simple processing for gold and silver recovery including:

- Milling
- Flotation
- Cyanidation
- Precipitation
- Electrowinning
- Doré

La Soledad - Vein Swarm

Drilling at the important La Soledad mine area, 400m north of El Refugio, has identified multiple veins with high-grade gold and silver beyond the historic mine workings

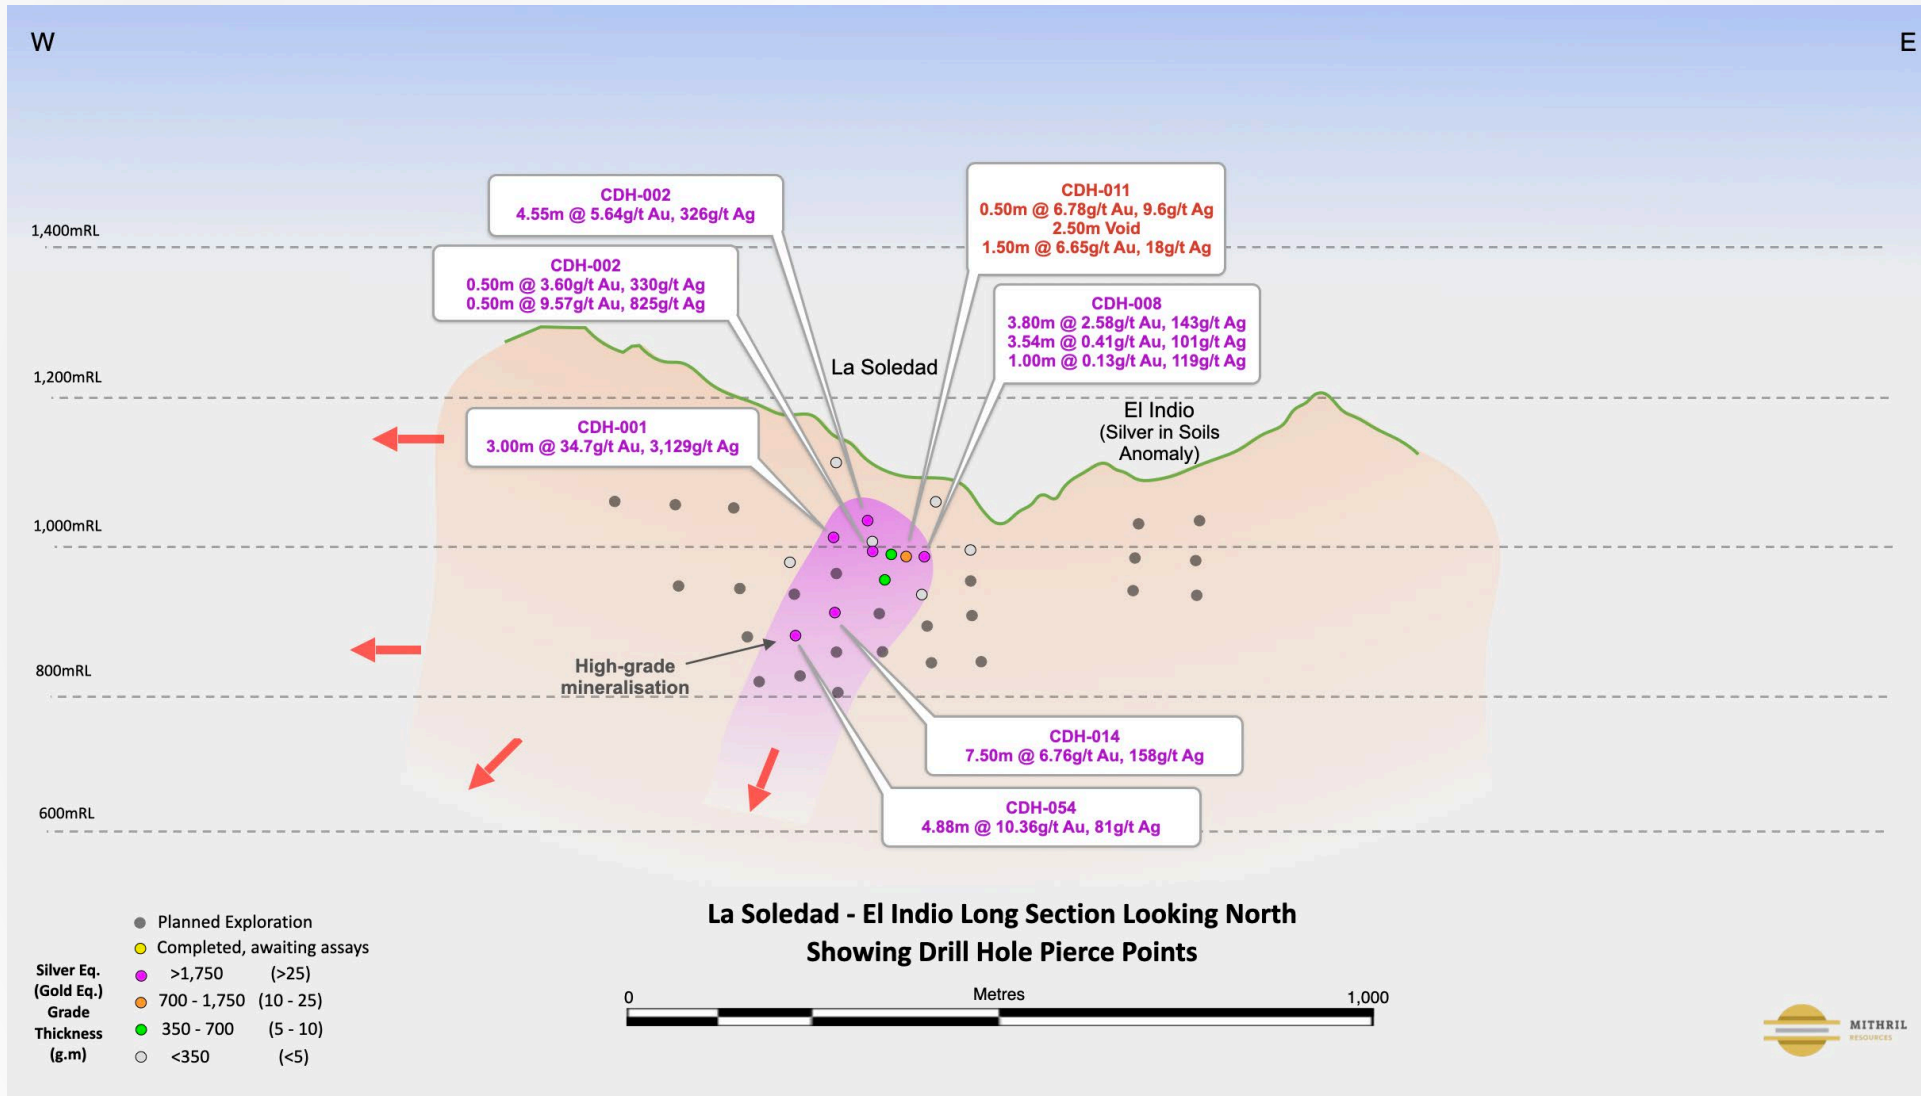

Highlight Drill Results for La Soledad

- **CDH-001** 3m @ 34.72 g/t gold and 3,129 g/t silver from 112m
- **CDH-002** 4.55m @ 5.64 g/t gold and 325 g/t silver from 91.95m plus 0.5m @ 9.27 g/t gold and 825.0 g/t silver from 141.2m
- **CDH-008** 3.8m @ 2.58 g/t gold and 142.6 g/t silver from 111.7m
- **CDH-011** 0.5m @ 6.78 g/t gold and 9.6 g/t silver from 108m, open workings from 108.5 to 111m, and 1.5m @ 6.65 g/t gold and 18.1 g/t silver from 111m
- **CDH-014** 7.5m @ 6.74g/t gold and 158.1 g/t silver from 253.8m
- **CDH-054** 4.88m @ 10.36g/t gold and 80.9 g/t silver from 288.25m
- Drilling planned for 2022 to develop this area just to the north of El Refugio

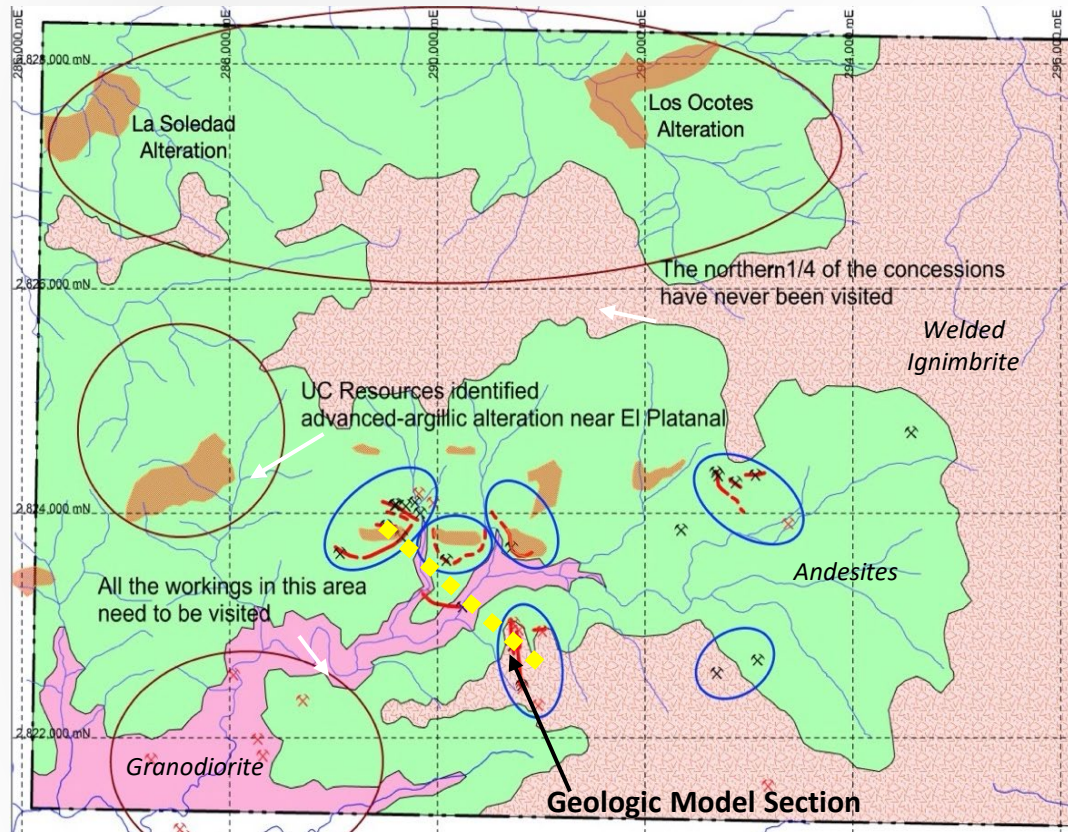

High Grade 'Clavo'– La Soledad

Further drilling required to test the gold-silver mineralisation at depth and along strike

Established Geologic Model – Successfully Guided Exploration

Copalquin District – Dozens of Au-Ag Historic Mines & Workings

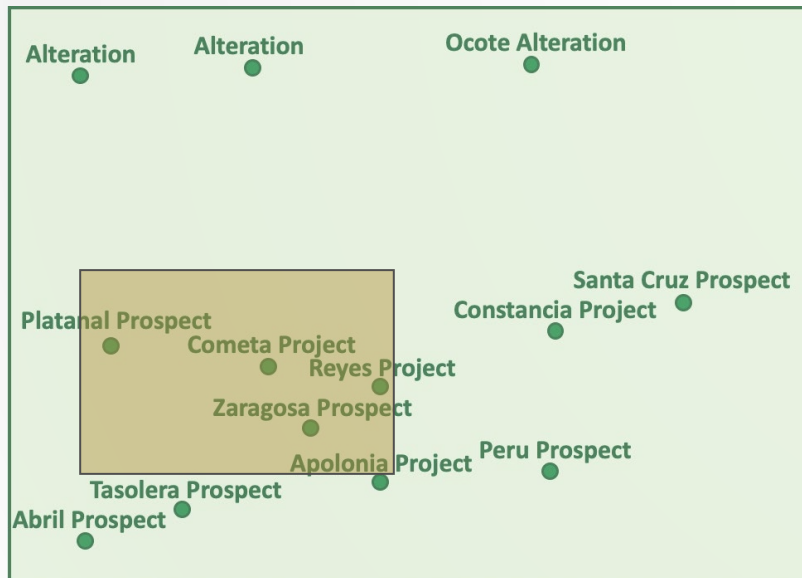

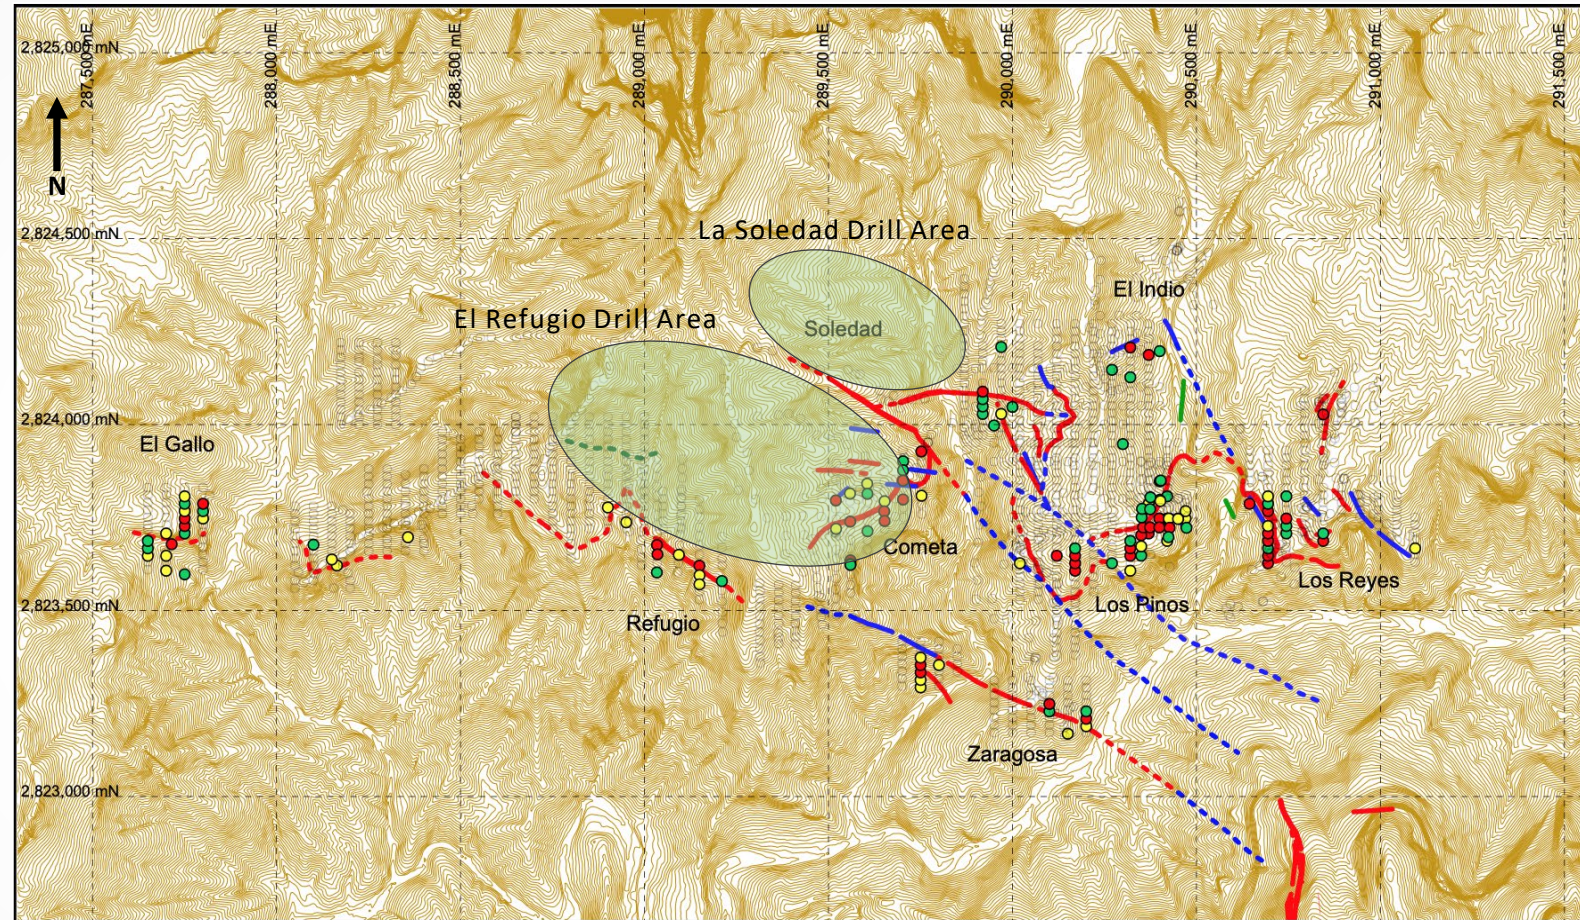

Geologic Model

- Epithermal model
- El Refugio established as major epithermal centre – grade thickness has increased with depth
- High-grade mineralization via a lateral to Los Reyes, distal to the epithermal centre

Drill Target Expansion - Soil Sampling Program

- Soil sampling is a successful drill target generation tool
- Drilling to extend west of El Refugio and La Soledad
- El Gallo with its historic workings to the west, is developing well as a future drill target area
- At El Indio and Zaragoza – there is surface alteration, vein outcrop, historic workings and strong silver geochemical anomalies

Concept Mine Development – El Refugio

Engineering study for an underground drift at El Refugio to take advantage of the topography and allow more efficient drilling of the deposit in all directions from the drift.

Board & Management– Experienced explorers and developers

JOHN SKEET
Managing Director & CEO

- Over 30 years' experience in gold-silver mine development - 16 years in Mexico
- Led the development of Ballarat East, Quartzite Gold in Georgia, and Palmarejo Silver Gold Mine in Mexico, prior Coeur 's takeover
- COO of Cerro Resources prior to its takeover by Primero Mining.
- Founded Sun Minerals in 2017 & acquired the option to purchase the Copalquin District Concessions in Mexico
- Honours degree in Applied Science (Met) and Fellow of AusIMM.

HALL STEWART
Chief Geologist

- Professional geologist with significant experience in the gold-silver trend of Mexico managing, developing, and exploring
- Located and recommended the multimillion-ounce Palmarejo to Bolnisi Gold and managed its regional exploration
- Managed exploration at Magistral, Ocampo, Tahuehueto
- Cofounded Puno Gold Corp. and Commonwealth Silver & Gold, which were both acquired by Canadian listed companies

GARRY THOMAS
Non-Executive Director

- Civil engineer with over 35 years' experience in civil construction, mine development and operations
- Implementation of mining operations in Australia, Indonesia, Laos, Russia, Africa, and Mexico
- Managed the construction and commissioning of over 20 CIL/CIP, flotation and heap leach plants as well as many plant upgrades including construction at Palmarejo, Mexico
- Founded/owned Internet Engineering which he sold to Sedgman Metals

STEPHEN LAYTON
Non-Executive Director

- Seasoned capital markets professional specialising in resources
- Over 35 years' experience in Equity Capital Markets in the UK and Australia
- Worked with various stockbroking firms and/or AFSL regulated Corporate Advisory firms
- Master Practitioner Member of the Stockbrokers and Financial Advisors Association – MSAFAA
- NED of EQ Resources Limited.

ADRIEN WING
Company Secretary

- Practiced in audit and corporate advisory divisions of a chartered accounting firm
- Worked with a number of public companies listed on the ASX as a corporate/accounting consultant and company secretary
- Was NED of Mithril, driving its rejuvenation with the Sun Minerals acquisition
- Currently director of Red Sky Energy, High Grade Metals and New Age Exploration

Key Take Away Points

High-Grade Gold and Silver

- Copalquin is a silver district with high-grade gold

District Scale

- Dozens of gold and silver mines/workings throughout the district
- Compares favourably to other established districts in region – Palmarejo, Pinos Altos, San Dimas

Pathway to Gold and Silver Production

- El Refugio discovery - maiden resource estimate Q4 2021
- Preliminary engineering studies and metallurgical work Q4 2021
