Company commentary

Company performance for the month was 2.8%, underperforming the benchmark which returned 3.1%. The key contributors and detractors are detailed under the Portfolio Commentary section below.

On 30 August 2021 the Company announced its [FY2021 full year results](#). The highlights of the results were as follows:

- FY21 net profit after tax of \$75.1m
- Final dividend of 4.0 cents per share (franked as to 100%), taking the annual dividend yield including the FY21 interim dividend to 5.2% (6.7% including franking)
- Company performance over FY2021 of +21.1%
- Major initiative to address the share price discount to the NTA via a proposal to undertake a scheme of arrangement (Scheme) that will enable shareholders to exchange their shares in the Company for units in Antipodes Global Shares (Quoted Managed Fund) (ASX:AGX1), an existing actively managed ETF for which Antipodes Partners Limited is investment manager. For more information on AGX1, please visit the [fund's website](#).

Market commentary

Global equities were positive in August (+3.1%) led by Financials, Information Technology, Utilities and the Communication Services sectors, while Materials, Energy and Consumer Discretionary underperformed. US equities (+3.5%) outperformed amidst economic re-opening and the continuation of accommodative stimulus policy from the US Federal Reserve, despite hawkish tones and the prospect of tapering. The wind down of the American Rescue Plan continues, while US Senate Democrats passed \$550b in new spending with the Infrastructure Bill. European equities had a positive month (+2.1%) with continued reopening.

Asian equities were positive (+3.2%) with Chinese equities stable (+0.8%) as the government continued but de-escalated their regulatory crackdown. Japan (+3.7%) was strong despite further lockdowns due to a spike in COVID-19 cases and some political instability. India had a very strong August (+11.6%).

Elsewhere, Brent Crude (-7.4% in USD) was weak after making recent highs with global economic peak growth fears, while Gold was flat and the US Dollar (DXY +0.5%) was neutral.

Portfolio commentary

Key contributors included:

- Software/Internet - Developed Markets cluster, including Facebook through the higher monetisation potential of newly announced advertising features in Instagram Shop, and Microsoft after announcing price increases on its more than 300m paid seats in Office 365.
- Software/Internet - Asia/EM cluster, including JD.com after announcing strong results highlighting user growth and broader long term margin improvement. Domestic regulation targeting forced exclusivity practices improved sentiment on hopes it could broaden availability of brands on the platform. Meituan also reported strong results with user growth above expectations and improving margins driven by delivery efficiency.
- Trip.com, in the Consumer Cyclical - Asia/EM cluster, after recovering from a sharp sell off as it became evident that China was able to quickly contain the recent COVID-19 outbreak of the delta variant.
- EDF, in the Infrastructure/Property - Developed Markets cluster, which benefitted from strength in gas prices.
- Siemens, in the Industrials cluster, after strong quarterly results, led by the automation business, saw an increase in full year guidance.

Key detractors included:

- Consumer Defensive - Asia/EM cluster, notably Wuliangye which underperformed amidst a sell off with other premium consumer goods in China, and Ping An Insurance after a reduction in its agent force raised concerns that the weakness in new business will continue into the second half of the year.
- Shorts, which can act as a headwind in upward moving markets.

Company features

- Aims to achieve absolute returns in excess of the benchmark over the investment cycle (typically 3-5 years).
- In the absence of finding individual securities that meet minimum risk-return criteria, cash may be held.
- Equity shorts and currency positions used to take advantage of attractive risk-return opportunities, offset specific long portfolio risks and provide some protection from negative tail risk. Derivatives may also be used to amplify high conviction ideas.
- Typical net equity exposure of 50% to 100%; maximum allowable gross exposure limit of 150% of NAV.
