## Description of Target Market – TMD key indicators

Consumer Attributes	TMD Indicator	Product description including key attributes
<b>Consumer's investment objective</b>	<b>TMD Indicator</b>	<b>Product description including key attributes</b>
<b>Capital Growth</b> The consumer seeks to invest in a product designed to generate income and capital return. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.		The Fund is suitable for a client that is looking to achieve maximum total returns by investing in global fixed interest securities, and who seeks to preserve capital through prudent investment management.  The Fund seeks to provide a regular income stream by way of quarterly distributions.  Accordingly, the Fund aims to offer maximum total returns, capital preservation, and regular income.  Investment in the Fund does not, however, guarantee a profit or protect against loss.
<b>Capital Preservation</b> The consumer seeks to invest in a product to reduce volatility and minimise loss in a market down-turn. The consumer prefers exposure to defensive assets (such as cash or fixed income securities) that are generally lower in risk and less volatile than growth investments.		
<b>Capital Guaranteed</b> The consumer seeks a guarantee or protection against capital loss whilst still seeking the potential for capital growth (typically gained through a derivative arrangement). The consumer would likely understand the complexities, conditions and risks that are associated with such products.		
<b>Income Generation</b> The consumer seeks to invest in a product designed to generate material, regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (typically, high dividend-yielding equities, fixed income securities and money market instruments).
