ASX ANNOUNCEMENT

**ACTIVITY REPORT AND APPENDIX 4C FOR THE QUARTER ENDED 30
SEPTEMBER 2021**

Global cybersecurity technology company, FirstWave Cloud Technology Limited (ASX:FCT) (**FirstWave** or **Company**), provides its activity report and Appendix 4C for the first quarter of FY22 ended 30 September 2021.

Business Update

- FirstWave Executive Chair John Grant stepped into the role of Interim CEO following the resignation of former CEO Neil Pollock in early July.
- John undertook a preliminary review of the Company's processes, product roadmap and financial plan prior to updating shareholders at the Q4 Update on 27 July 2021, indicating that the strategic rationale for the Company's ultimate success remains intact, its platform and services remain world-class, there had been a lack of organisational focus and that certain elements of the platform and core services created 'friction' for services providers and end users that needed to be removed to allow rapid and simple adoption.
- He further indicated that the Company would prioritise removal of the 'friction' in its software and pause actively selling the core product portfolio until this was completed, while directing its sales activities to 'point' solutions such as WebProtectDNS, Advanced Detection and Response (ADR) and multi-tenant Palo Alto firewall and lower operating costs to counter an expected dampening of growth in revenue.
- The Product Management and Software Development teams efforts were directed to remove the 'friction' in the software, onboarding a new technology Watchguard End Point to the platform and preparing for a major software release in Q2.
- The Platform and Customer Support teams were consolidated into Sydney to remove inefficiency in the support processes.
- 17 FTEs departed the business in the quarter (excluding the CEO, who the Company plans to replace), resulting in \$174K of one-off payments for termination settlements and accrued leave. These departures result in a \$188k reduction in monthly costs, with the full benefit to be felt from 1 October 2021.
- Other cost saving activities were implemented during the quarter and included the continued reduction in Amazon Web Services (AWS) costs and the pausing of Sydney head office rent while a smaller office within the same building is configured. When complete, this move will save approximately \$25k per month in rental costs.
- First sales of the ADR product were recorded in the quarter, with one international and one domestic customer signing up to the new service, as well as potential customers being identified for sales in Q2 and a significant number of prospects for WebProtectDNS working towards service launches.

Financial Highlights

- Strong cash position of \$6.86m as per Item 5.1 of the accompanying Appendix 4C.
- Total Annualised Recurring Revenue (TARR)* presented in the FY21 Q4 announcement at \$9.32m comprising of domestic ARR of \$6.31m and international ARR of \$3.01m is revised below at the FY22 AUD:USD FX rate: 0.75 (FY21: 0.65) and after an audit adjustment on domestic revenue resulting in a reduction of \$9.2k per month;

Revised FY21 Q4 TARR of \$8.82m comprising:

- DARR of \$6.21m
- IARR of \$2.61m

At the end of Q1 TARR has fallen QoQ by 21% to \$6.95m comprising:

- DARR \$6.04m
- IARR \$0.91m

The reduction in IARR relates to the revision of the treatment in contracts with CSquared and Telum as disclosed in the market announcement on 19 October 2021, and the reduction in DARR relates to a number of small cancellations as a result of a detailed review of inactive customers and aging debtors untaken as part of the FY21 audit.

- Continued focus on expense management that has resulted in over \$2.5m in annualised cost reductions being achieved by the end of Q1.

** TARR is exit monthly recurring revenue x 12*

Cash Flow Highlights:

- Net cash used in the quarter was \$3.10m which included:
 - \$2.60m cash receipts from customers,
 - \$0.76m received from sub underwriter options, and
 - various one-off costs such as the \$0.17m termination payments noted above, and \$0.55m in insurance premiums paid in advance for FY22.
- Operating activities for the quarter resulted in \$3.03m cash outflow including;
 - Cash receipts of \$2.60m from customers which is considerably higher than the prior year's quarterly collections and reflects the continued unwinding of the Telstra prepayment and improved collections processes,
 - \$1.42m in Administration and Corporate costs that included the \$0.55m insurance costs noted above,
 - Staff costs of \$2.98m that are higher than previous quarters due to the one-off termination payments noted above, the ceasing of salary sacrifice arrangements (equating to approximately \$100k per month) and a companywide increment to match industrywide increases,
 - It is also noted that Q1 does not have any cash receipts for FY21 R&D income which is estimated at \$1.28m and is forecast to be received in FY22 Q3. Smoothed across the year this cash inflow from FY21 R&D would be approximately \$0.32m per quarter.

- Investing activities reported that the business capitalised \$0.76m in product development costs during the quarter, which is lower than previous periods but in line with the reduction in the size of the development team, and
- Financing activities reported \$0.76m in receipts from sub-underwriter options and represented the final payments to be received under the sub-underwriter options agreement from the May 2020 capital raise.

As detailed in Item 6.1 of the accompanying Appendix 4C, the Company paid \$69.4k in relation to Directors' fees and associated superannuation.

The company has scheduled an update on FY22 Q1 performance via Teleconference at 9.00am (AEDT) Thursday, 21 October 2021. The presentation for this update will be uploaded to the ASX website prior to the teleconference.

All numbers in this quarterly cash flow report and accompanying commentary for the quarter ended 30 September 2021 are unaudited.
