Issuer: Macquarie Investment Management Australia Limited ABN 55 092 552 611 AFSL No. 238321

#### Important note

This Target Market Determination (**TMD**) sets out the target market for the Fund, along with the distribution conditions, the review triggers and certain other information. It forms part of Macquarie Investment Management Australia Limited's design and distribution framework.

This document is not a product disclosure statement and is not a summary of the Fund's features or terms. This document does not take into account the investment objectives, financial situation or needs of any person. In deciding whether to acquire or continue to hold an investment in the Fund, a consumer should consider the Fund's product disclosure statement, available on our website at **macquarieim.com/pds** or by contacting us on 1800 814 523. This information is intended for recipients in Australia only.

Important terms used in this TMD are defined in the 'TMD Definitions' available at macquarieim.com/TMD. Capitalised terms have the meaning given to them in the Fund's product disclosure statement, unless otherwise defined. References to the Act are to the Corporations Act 2001 (Cth).

Other than Macquarie Bank Limited (**MBL**), none of the entities noted in this document is an authorised deposit-taking institution for the purposes of the Banking Act 1959 (Cth). The obligations of these entities do not represent deposits or other liabilities of MBL. MBL does not guarantee or otherwise provide assurance in respect of the obligations of these entities, unless noted otherwise.

## TARGET MARKET SUMMARY

The Fund is designed for consumers who:

- are seeking capital growth
- are intending to use the Fund as a satellite within a portfolio
- have a medium to long-term investment timeframe
- have a high or very high risk/return profile, and
- require the ability to have daily access to capital.

In certain limited circumstances described in the 'Description of Fund including key attributes' column in the table below, the Fund is designed for consumers who:

- are seeking capital preservation and regular income, and
- are intending to use the Fund as a core component within a portfolio.

## TMD indicator key

The consumer attributes for which the Fund is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

In target market Potentially in target market Not considered in target market

#### Investment products and diversification

Some consumers may intend to hold a product as part of a diversified portfolio (typically with an intended product use of 'satellite'/small allocation or 'core component'). In such circumstances, the appropriateness of the product should be assessed in relation to the relevant portion of the portfolio, rather than in relation to the consumer's portfolio as a whole. For example, a consumer may wish to construct a conservative portfolio with a 'satellite'/small allocation to growth assets. In this case, a product with a high or very high risk/return profile may be consistent with the consumer's objectives for that allocation, notwithstanding that the overall risk/return profile of the consumer is low or medium. In making this assessment, distributors should consider all features of a product (including its key attributes) and the size of any proposed allocation to the product (as a proportion of the consumer's overall portfolio).
