BENGALLA

Solid Operating Performance Underpins a successful year

Successful completion of investment in the planned midlife maintenance shutdown of the dragline in the 1st half of the financial year.

Transferred the EX5500 excavator from New Acland providing additional capacity to the operation.

Strong coal market conditions supported maximising coal processing through the CHPP.

A disciplined focus on expenditure has kept Bengalla in the first quartile on the global seaborne cost curve.

NEW ACLAND

Strong performance in light of reduced production and approvals uncertainty

Production down 39% as existing mining area is exhausted and the site begins safely transitioning into care and maintenance in the coming months.

Focus moving from production to rehabilitation works whilst maintaining site readiness for Stage 3 operations.

Land Court hearing for Stage 3 approvals is scheduled for November 2021.

The Company remains positive about the future of Stage 3 that will support jobs and provide a critical investment into the local community.

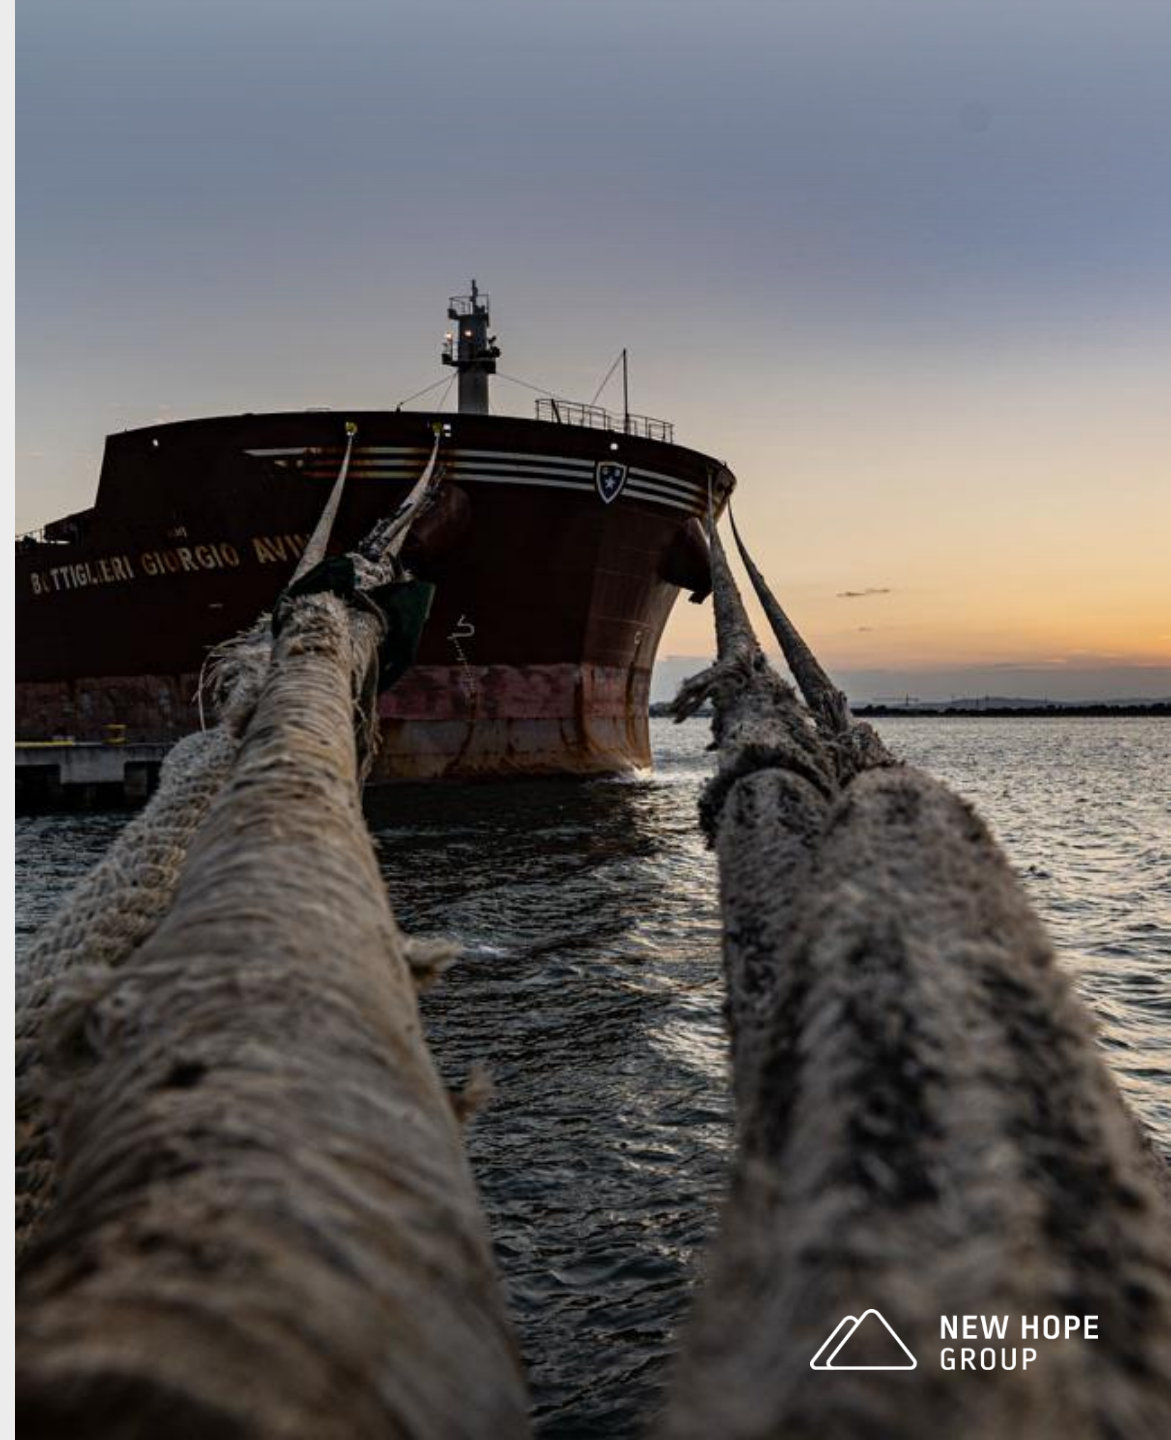

QUEENSLAND BULK HANDLING

Embracing new throughput opportunities

Continues to support existing coal customers and ready to receive New Acland Stage 3 tonnage once approvals granted.

Engaging with new customers for both coal and other commodities to ensure throughput is maximised.

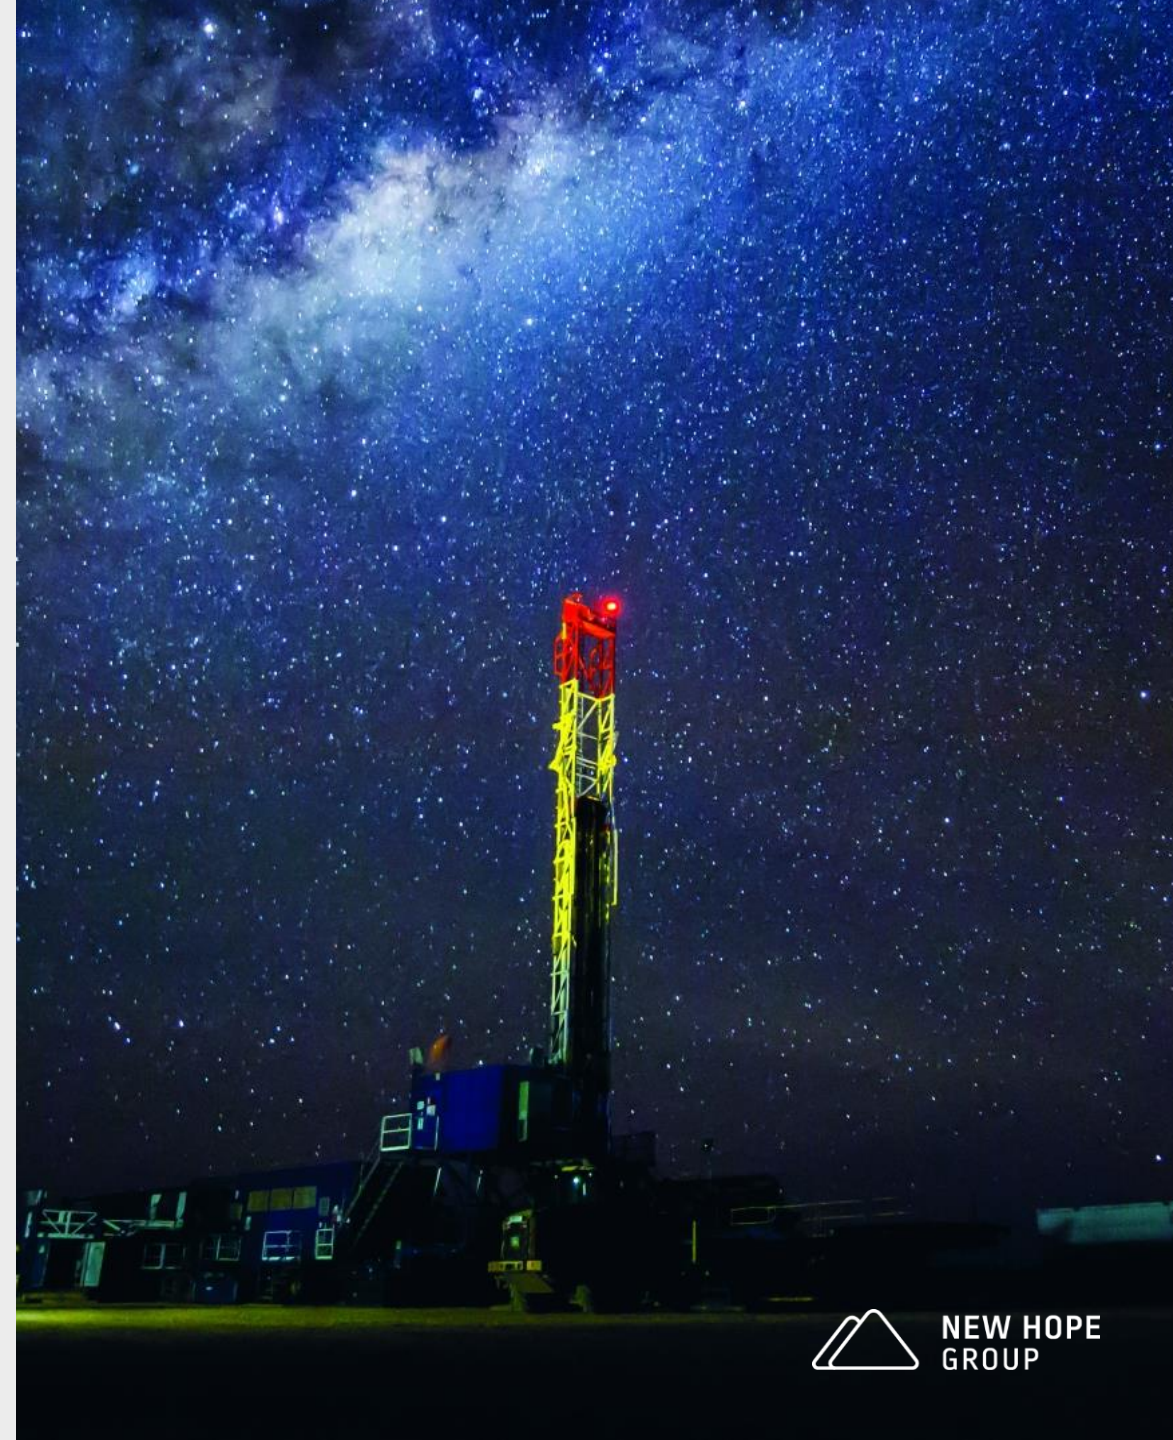

BRIDGEPORT

Consistent Sales and Increased Realised Prices

Oil prices recovered strongly during the year, increasing 62% over the reporting period.

Oil production totalled 313K barrels which was an 8% reduction from the prior reporting period. This represents natural decline in production wells.

There were 11 successful critical workovers completed, within budget and on schedule. This enabled high uptime on all wells. There were also three successful gas wells drilled during the reporting period.

WEST MORETON

Rehabilitation focus at all sites

The cattle grazing trial at the Oakleigh West rehabilitation area was completed in November 2020.

The trial was a great success demonstrating the ability of our rehabilitated land to support grazing, post-mining.

Significant rehabilitation works have been undertaken since the completion of mining at Jeebropilly with approximately 360Ha of land shaped and seeded – pictured above right.

The rehabilitation project at the Normanton Pit area was completed in July 2021. The area is displaying excellent pasture growth as shown in the picture below right.

The focus now shifts to monitoring and maintenance of the rehabilitated areas.

PASTORAL OPERATIONS

Integrated sites to expand the Group's agricultural operations

Cattle prices increased by 40% during the year.

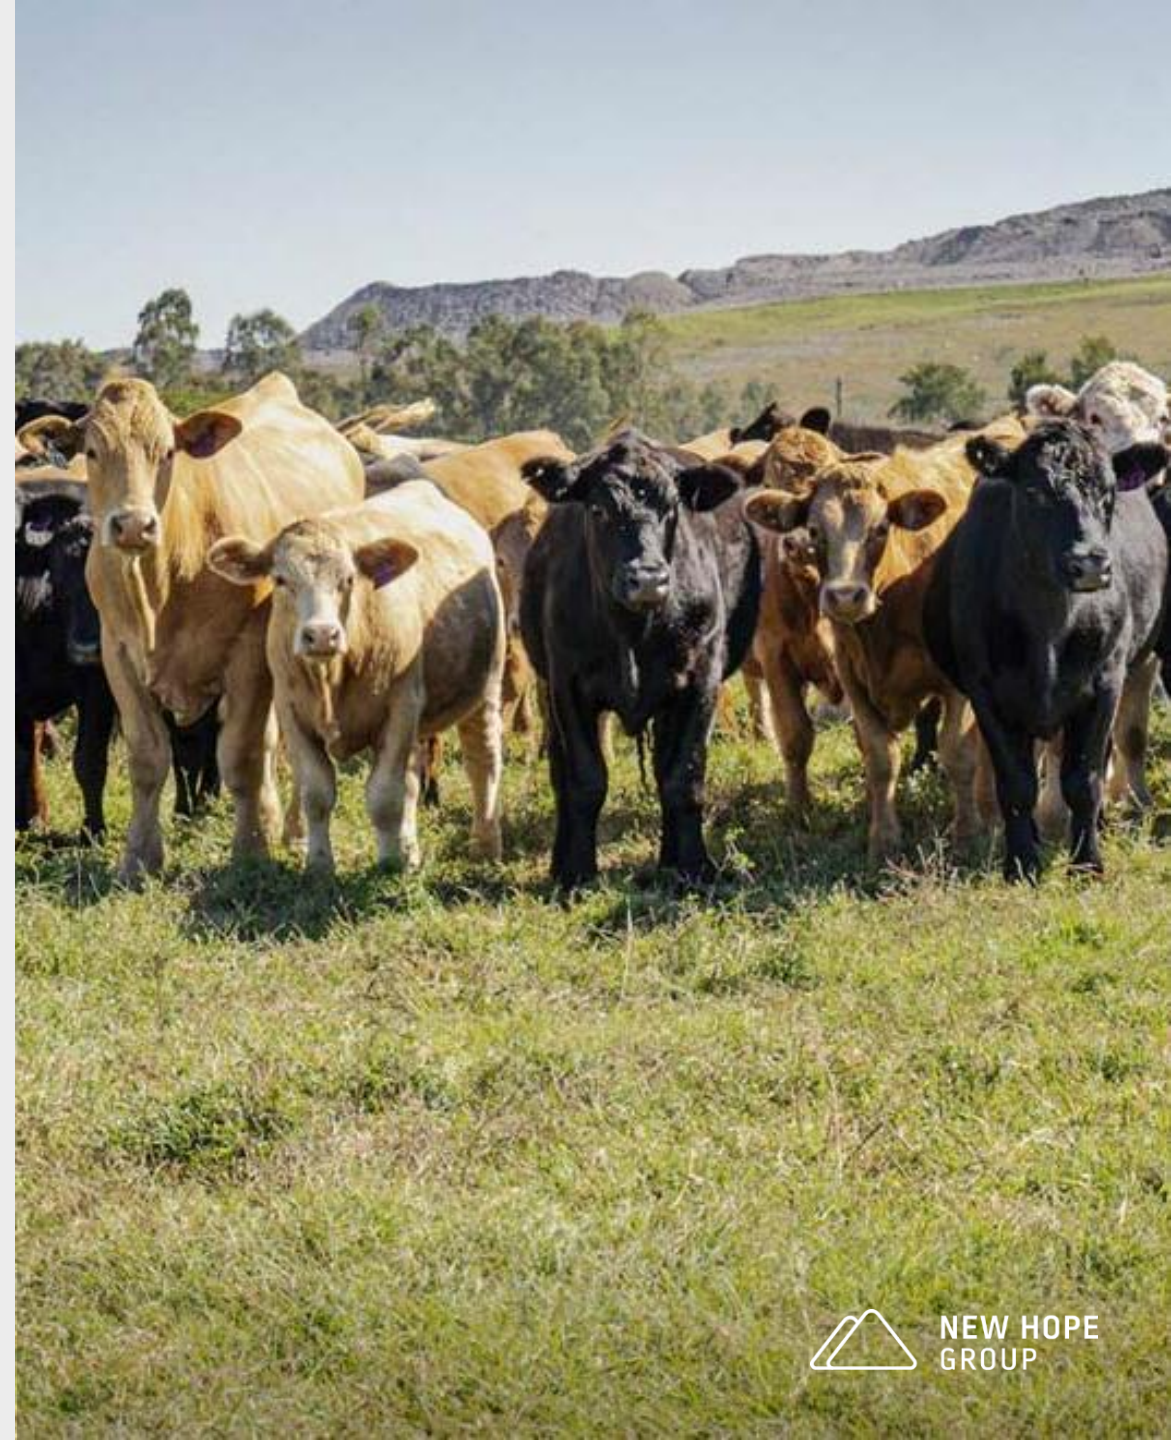

Bengalla Agricultural Company (BAC) successfully fattened and sold 1,200 Acland Pastoral Company (APC) bred weaners.

A further 960 APC bred weaners have been transported to BAC for fattening.

Company looking to strengthen the livestock program following the successful breeding cycle in FY 2021.

Good winter rains in 2020 led to strong crop yields in early 2021.

Investment in new farming equipment that will increase efficiencies and save costs for planting and harvesting.
