Private equity is a new asset class for Pinnacle which provides attractive economics. Realisation of profits are weighted towards the end of each Fund's life through the realisation of performance fees

Fee structure and key drivers of profitability

- FUM and performance are the key drivers of revenue and profitability
 - Management fees are paid on committed capital
 - Performance fees, or 'carry', are paid once capital has been returned to investors as underlying assets are realized
- Five V Fund IV fees consistent with market practice for private equity:
 - 2.0% management fee (on committed capital)
 - 20% performance fees (on asset realizations)
 - Lower fees for co-investments
- Investment returns on any balance sheet capital deployed by Five V in co-investments

Realisation of profits

- Earnings are significantly weighted towards the end of the life of each fund due to realization of performance fees
- Pinnacle will recognize management fees on committed capital and performance fees on crystallization, together with returns on the \$75m available for co-investment
- The average fund life is seven years
- Pinnacle will participate in performance fees on Fund III (closed in 2019, with the first asset recently realized), Fund IV, which has recently closed, VC Fund I and future funds
- NPAT contribution arising from performance fees is expected to be 'lumpy'

Financial impact

- Pinnacle anticipates limited profit contribution to Pinnacle in FY22 from the investment
- Investment in Five V Capital and the capital raising is expected to be broadly neutral to EPS before the realization of performance fees

APPENDIX B

Key risks

This section discusses some of the specific risks associated with an investment in Pinnacle. There are also a number of general risks, such as global economic conditions, share price fluctuations and force majeure events which are relevant to any investment in securities. These risks may individually or in combination have a material adverse impact on Pinnacle's business, operating and financial performance.

The risk factors set out below are not exhaustive, and many of them are outside the control of Pinnacle and its directors. There is no guarantee or assurance that the importance of different risks will not change or other risks will not emerge. Prospective investors should consider publicly available information on Pinnacle, examine the full content of this presentation (including any assumptions underlying prospective financial information) and consult their financial, tax and other professional advisers before making an investment decision.

Investment specific risk factors

<p>Completion risk</p>	<p>It is possible that the proposed investment in Five V Capital (the “Investment”) may not successfully complete, in which case Pinnacle may not deploy the funds in the near future as it may not be successful in identifying or completing any other material growth opportunities.</p> <p>Conditions precedent for the Investment include certain executives of Five V Capital entering into new employment agreements.</p> <p>If completion of the Investment is delayed, Pinnacle may incur additional costs and it may take longer than anticipated for Pinnacle to realise the benefits of the Investment.</p> <p>If the Investment does not proceed, Pinnacle will consider alternative uses for some of the funds, including the return of some of the proceeds to shareholders, debt reduction, working capital or alternative investment opportunities.</p> <p>Any failure to complete on the current terms (or at all), or delay in completing the Investment could adversely affect Pinnacle's operational and financial performance and the price of its shares.</p>
<p>Dilution</p>	<p>Pinnacle shareholders will be diluted by the issue of New Shares under the Placement if they do not participate in the Placement. Furthermore, if eligible shareholders do not participate in the SPP, their percentage shareholding in Pinnacle will be diluted to a greater extent than would otherwise be the case, and they will not be exposed to future increases or decreases in Pinnacle's share price in respect of the shares which would have been issued to them had they participated in the SPP.</p>
<p>Reliance on information provided and due diligence risk</p>	<p>Pinnacle undertook a due diligence process in respect of the proposed Investment, which relied in part on the review of certain financial, legal and other information provided by Five V Capital. Despite making reasonable efforts, Pinnacle cannot verify the accuracy, reliability or completeness of all the information which was provided to it.</p> <p>If any such information provided to, and relied upon by, Pinnacle in the due diligence process and in its preparation of this presentation proves to be incorrect, incomplete or misleading, there is a risk that the actual financial position and performance of Five V Capital may be materially different to the expectations reflected in this presentation. This could adversely affect the financial position, performance and/or share price of Pinnacle.</p> <p>It is also possible that the analysis undertaken by Pinnacle during the due diligence process, and the best estimate assumptions made by Pinnacle and its advisers, draw conclusions and forecasts which are inaccurate or which are not realised in due course (whether because of flawed methodology, misinterpretation of economic or other circumstances or otherwise).</p> <p>Investors should also note that there is no assurance that the due diligence conducted was conclusive, or that all material issues and risks in respect of the Investment have been identified and avoided or managed appropriately.</p>

Investment specific risk factors (continued)

Legal risk

The Investment will involve Pinnacle entering into a number of transaction documents, including the Subscription and Implementation Agreement and the Shareholders' Deed. While the documents contain some representations and warranties in favour of Pinnacle, there is always a risk that the documents do not contain adequate protection for potential liabilities or risks in relation to Five V Capital's business or other costs, potentially exposing Pinnacle to the risk of future costs or disputes arising in relation to the Investment.

There is therefore the risk of potential loss arising from breaches of the representations and warranties or that such losses are subject to exclusions in the transaction documents that may result in a material adverse impact on the Pinnacle carrying value of its Investment in Five V Capital.

Underwriting risk

Pinnacle has entered into an agreement with the Joint Lead Managers in respect of the Placement, key terms of which are summarised at Appendix D (Summary of Placement Agreement). The Joint Lead Manager's obligation to underwrite the Placement is subject to certain customary conditions precedent. In addition, if certain events occur, some of which are beyond Pinnacle's control, the Joint Lead Managers may terminate the Placement Agreement. If the Placement Agreement is terminated, Pinnacle will not be entitled to terminate the Investment. In these circumstances, Pinnacle would use alternative funding to pay the Investment price or otherwise utilize existing cash reserves of the Company that were proposed to be used for other purposes.

Specific risks related to the Investment into Five V Capital

Reliance on Key Staff

Common with Pinnacle and its current Affiliates, the ability of Five V Capital to continue to attract and retain high quality management ("**Key Staff**") is critical to their operating and financial performance. Competition for management expertise is high. There is a risk that a loss of Key Staff may have a materially adverse effect on the short term operations and financial performance of Five V Capital. Investors should also note that there is no assurance that Five V Capital will continue to retain and attract Key Staff as required.

Liquidity risk

Private equity investments are held for a number of years and are typically illiquid. Exits of investments typically require a number of months to prepare and execute. There is the risk that, at the time of wanting to exit its investments, Five V Capital is not able to find a purchaser or other exit for its investment or not able to find a purchaser or achieve an exit at a valuation in line with the market. This could lead to prolonged periods before returns on investments are realised and irregular timing in the receipt of sale proceeds, which could have an adverse impact on Five V Capital's financial and operating performance and, in turn, the return on the Investment and Pinnacle's share price.

Performance fees

Performance fees are typically a significant component of revenue for private equity firms. Performance fees are subject to performance, and there is no guarantee that Five V Capital will achieve, or continue to achieve, performance that enables it to receive performance fees.

Execution of growth strategy

After completion of the Investment, there is no guarantee that Five V Capital's growth strategy will be executed successfully. There is also a risk that a successful execution of growth strategies may take longer, be more complex or cost more than expected, encounter unexpected challenges or issues, divert management attention or that the anticipated benefits of executing the strategy may be less than estimated. Any failure to execute growth strategies may have an adverse impact on the financial performance, operation and position of Five V Capital, and the future price of Pinnacle shares.

Specific risks related to the Investment into Five V Capital (continued)**Risks related to Five V Capital's future fund raising**

Five V Capital has approximately A\$1.1 billion of FUM. Five V Capital derives a significant proportion of its earnings from fees and charges based on the level of FUM.

As Five V Capital exits its positions in its portfolio companies, proceeds are returned to Five V Capital's investors. This means that Five V Capital is required to continue fund raising to maintain, or increase, its total FUM.

The level of FUM raised is impacted by a number of different factors, including (amongst other things) Five V Capital's track record of performance, capabilities of Five V Capital's investment professionals, its fee structure, demand for private capital / private equity investments and broader macroeconomic conditions. Therefore, Five V Capital faces the risk that changes in domestic and / or global investment market conditions, as well as the performance of the private equity asset class or Five V Capital (both in absolute terms and relative to alternatives in the market) could lead to a decline in FUM, which will adversely impact the amount that Five V Capital earns in fees and charges. Deterioration in investment market conditions could also lead to reduced consumer interest and adversely affect the ability to attract new investors in the financial products and services offered by Five V Capital. Additionally, it is possible that as funds run off, new fund raising does not take place (or does not succeed), which reduces the level of Five V Capital's FUM. Some funds could reduce in size or be terminated. Similarly, the unitholders of a fund may have the right to remove the investment manager, responsible entity or trustee.

As Five V Capital's management fees are based on a percentage of FUM, a decline in FUM could have an adverse impact on their financial and operating performance and, in turn, the share price of Pinnacle.

Company specific risk factors**Investment strategy risk**

The Pinnacle Group's ("Group") results and financial outlook are influenced by prevailing equity market conditions, interest rate and credit market conditions and to a lesser extent, by broader macroeconomic factors, economic trends and investor sentiment. There is no guarantee that Pinnacle's Affiliates will outperform their respective benchmarks, meet their investment objectives, or continue to retain and attract experienced and high performing key personnel who are critical to the financial success and future performance of Pinnacle and its Affiliates. In addition, Pinnacle may have seed capital, and / or its Affiliates may have co-investing strategies which may be lost by poor fund or asset performance. Past performance is not a reliable indication of future performance.

Maintaining and Growing FUM

A key part of Pinnacle's strategy is assisting its Affiliates to maintain and grow FUM. There is no guarantee that Pinnacle's strategies (or that of its Affiliates) to grow FUM will be successful, or that Pinnacle's Affiliates will be successful in maintaining existing FUM. Pinnacle's Affiliates ability to maintain and grow FUM may be impacted by a number of factors outside of the control of Pinnacle including (amongst other things), sustained periods of underperformance relative to key benchmarks, individual preferences of that Affiliate's clients and adverse market conditions.

Company specific risk factors (continued)

Competition	The industry in which Pinnacle operates is very competitive. There are a number of market participants that compete vigorously for client investments and the provision of wealth management services and investment opportunities, and there is increasing commoditisation of financial services and products. These competitive market conditions may adversely impact on the earnings and assets of Pinnacle and its share price.
Brands and reputation	A significant and prolonged decline in key brand value or adverse effects on the reputation of Pinnacle and/or its Affiliates could contribute to reduced inflows of investment funds and assets, damage to client strategies and may impact adversely upon Pinnacle's future profitability, financial position and share price. Matters which may give rise to adverse reputational consequences for Pinnacle and/or its Affiliates include compliance issues, fraudulent behaviour and adverse media publicity.
Operational and compliance risks	Pinnacle may, from time to time, be exposed to operational risks including, but not limited to, risks arising from process error, fraud, system failure or inadequacy, failure of security and physical protection systems and pricing errors. In addition, Pinnacle may be exposed to compliance risks as it is subject to strict regulatory and compliance arrangements under the Corporations Act and ASIC policy as well as other laws, regulatory policies and guidance (including relating to anti-money laundering, anti-bribery and corruption, and counter terrorism financing). Operational and compliance risks have the potential to adversely affect Pinnacle's financial performance, position, reputation as well as its ability to operate.
Economic, political and regulatory risk	Factors including, but not limited to, domestic and international political changes, interest rates, exchange rates, inflation levels, commodity prices, industrial disruption, environmental impacts, international competition, taxation changes, changes in employment levels, consumer and business spending, employment rates and labour costs may all have an adverse impact on Pinnacle's revenues, operating costs, profit margins and share price. Changes in laws, regulations and government policy may affect Pinnacle and the attractiveness of an investment in Pinnacle positively or negatively. The financial services sector is subject to extensive legislation, regulation and supervision by a number of regulatory bodies in multiple jurisdictions.
Limited ownership control in Affiliate model	As Pinnacle is a minority shareholder in its Affiliates, it may not independently, amongst other things, cast the majority of votes at a general meeting, change the composition of the board, determine the dividend policy, amend the constitution or change the strategic direction of any Affiliate. Accordingly, Pinnacle's effective control over Affiliates is limited. This also applies to the Investment into Five V.
Fund raising risk	Pinnacle expects that the proceeds of the Placement will provide it with sufficient capital to fund the Investment and support its growth plans. However, Pinnacle can give no assurances that its growth plans will in fact be met without future borrowings or future capital raising and if such borrowings and capital raising are required, that they can be obtained on terms favourable to Pinnacle or at all.
Non-audited financial information	This presentation may contain financial information that has not been subject to review or audit, and could be subject to revision following review by Pinnacle's external auditors. Investors should not rely on such information as if it were audited financial information.
Litigation	Pinnacle may, in the ordinary course of business, be involved in litigation and disputes with shareholders, Affiliates, employees, contractors and other counterparties. Any such dispute may be costly and adversely affect the operational and financial results of Pinnacle, as well as its share price.
Acquisition and investment strategy	From time to time Pinnacle makes investments in or acquires fund management businesses as part of its stated strategy. There is a risk that Pinnacle may not achieve expected returns from those acquisitions or investments, which may adversely affect Pinnacle's profitability.
Investment management fees	Pinnacle's revenues and profitability is directly linked to the fees that its Affiliates charge on the funds managed by that Affiliate. The funds management industry is highly competitive and there is no guarantee that the fees that Pinnacle's Affiliates achieve will be maintained or that the percentage of those fees to which Pinnacle is entitled will remain at current levels with respect to each individual Affiliate.

Company specific risk factors (continued)**Reliance on Key Staff**

Key to the strategy and operating and financial performance of Pinnacle and its Affiliates is the ability to attract and retain Key Staff with appropriate levels of funds management, operational and product distribution expertise. Competition for management expertise is high. There is a risk that a loss of Key Staff may have a materially adverse effect on the operations and financial performance of Pinnacle and its Affiliates. Investors should also note that there is no assurance that Pinnacle or its Affiliates will continue to retain and attract Key Staff as required.

Information Technology and cyber security risks

Pinnacle and its Affiliates, and the financial services industry in general, rely heavily on information technology to conduct an efficient and cost effective business. Therefore, any significant or sustained failure or inadequacy in Pinnacle or its Affiliates' core technology systems or cyber security could have a materially adverse effect on its operations in the short term, which in turn could undermine longer term confidence and impact Pinnacle's future profitability and financial position, as well as its share price.

Pinnacle may also be subject to cyber-attacks including unauthorised access to Pinnacle's information technology systems or data. Any successful cyber-attack could result in loss of information integrity or breaches of Pinnacle's obligations under applicable laws.

Security or privacy of data

The protection of customer, employee, third party and company data is critical to Pinnacle's operations. The legal and regulatory environment governing information security, privacy and data security is increasingly complex and demanding. Failures or breaches of data protection and systems security can cause reputational damage, regulatory impositions and financial loss.

Climate

Climate change may impact on overall economic growth and equity market conditions, with consequences for financial related assets. In addition, Pinnacle has a variety of investments in Affiliates whose profitability may directly or indirectly be affected by climate change. This could lead to an adverse impact on Pinnacle's business and operational position.

Insurance risk

While Pinnacle holds insurance policies for a number of liabilities, including professional negligence and directors and officers' insurance, not all liabilities may be covered and the level of insurance for liabilities that are covered may be insufficient. A significant underinsured or non-insured liability could have a material adverse effect on Pinnacle financial performance or position.

General risk factors**Price of Pinnacle's shares may fluctuate**

The trading price of Pinnacle's shares may fluctuate due to various factors, including general share market and economic conditions as well as the specific performance of Pinnacle. This may result in the market price for Pinnacle's shares being less or more than the price under the Placement or SPP. There is no guarantee of profitability, dividends, return of capital, or the price at which Pinnacle's shares will trade on the ASX. Factors that may affect the market price of shares include but are not limited to changes in government legislation and policies including taxation laws and fiscal and monetary policies (including in response to the impact of COVID-19), general movements in Australian and global equity markets, investor sentiment, Australian and international economic conditions, changes in employment level, changes in interest rates and the rate of inflation, global geo-political events, results of competitors, and investor perceptions. These factors are beyond the control of Pinnacle and its board. No assurances can be made that Pinnacle's market performance will not be adversely affected by any such market fluctuations or factors.

Taxation policy

Future changes in taxation law in Australia, including changes in interpretation or application of the law by the courts or taxation authorities in Australia, may impact the future tax liabilities of Pinnacle or may affect taxation treatment of an investment in Pinnacle shares, or the holding or disposal of those shares.

Accounting policy

Pinnacle prepares its general purpose financial statements in accordance with the Corporations Act. Australian Accounting Standards are not within the control of Pinnacle or its board and are subject to amendment from time to time, and any such changes may impact on Pinnacle's statement of financial position or statement of financial performance.

Force majeure events may occur

Events may occur within or outside Australia that could impact on global and Australian economies, the operations of Pinnacle and the price of the Pinnacle Shares, including acts of terrorism, international hostilities, floods, fires, earthquakes, pandemics (such as COVID-19), labour strikes, civil wars and other natural disasters.

Canada (British Columbia, Ontario and Quebec provinces)

This document constitutes an offering of Shares only in the Provinces of British Columbia, Ontario and Quebec (the "Provinces"), only to persons to whom Shares may be lawfully distributed in the Provinces, and only by persons permitted to sell such securities. This document is not a prospectus, an advertisement or a public offering of securities in the Provinces. This document may only be distributed in the Provinces to persons who are "accredited investors" within the meaning of National Instrument 45-106 – *Prospectus Exemptions*, of the Canadian Securities Administrators.

No securities commission or authority in the Provinces has reviewed or in any way passed upon this document, the merits of the Shares or the offering of the Shares and any representation to the contrary is an offence.

No prospectus has been, or will be, filed in the Provinces with respect to the offering of Shares or the resale of such securities. Any person in the Provinces lawfully participating in the offer will not receive the information, legal rights or protections that would be afforded had a prospectus been filed and receipted by the securities regulator in the applicable Province. Furthermore, any resale of the Shares in the Provinces must be made in accordance with applicable Canadian securities laws. While such resale restrictions generally do not apply to a first trade in a security of a foreign, non-Canadian reporting issuer that is made through an exchange or market outside Canada, Canadian purchasers should seek legal advice prior to any resale of the Shares.

The Company as well as its directors and officers may be located outside Canada and, as a result, it may not be possible for purchasers to effect service of process within Canada upon the Company or its directors or officers. All or a substantial portion of the assets of the Company and such persons may be located outside Canada and, as a result, it may not be possible to satisfy a judgment against the Company or such persons in Canada or to enforce a judgment obtained in Canadian courts against the Company or such persons outside Canada.

Any financial information contained in this document has been prepared in accordance with Australian Accounting Standards and also comply with International Financial Reporting Standards and interpretations issued by the International Accounting Standards Board. Unless stated otherwise, all dollar amounts contained in this document are in Australian dollars.

Statutory rights of action for damages and rescission. Securities legislation in certain Provinces may provide a purchaser with remedies for rescission or damages if an offering memorandum contains a misrepresentation, provided the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's Province. A purchaser may refer to any applicable provision of the securities legislation of the purchaser's Province for particulars of these rights or consult with a legal adviser.

Certain Canadian income tax considerations. Prospective purchasers of the Shares should consult their own tax adviser with respect to any taxes payable in connection with the acquisition, holding or disposition of the Shares as there are Canadian tax implications for investors in the Provinces.

Language of documents in Canada. Upon receipt of this document, each investor in Canada hereby confirms that it has expressly requested that all documents evidencing or relating in any way to the sale of the Shares (including for greater certainty any purchase confirmation or any notice) be drawn up in the English language only. *Par la réception de ce document, chaque investisseur canadien confirme par les présentes qu'il a expressément exigé que tous les documents faisant foi ou se rapportant de quelque manière que ce soit à la vente des valeurs mobilières décrites aux présentes (incluant, pour plus de certitude, toute confirmation d'achat ou tout avis) soient rédigés en anglais seulement.*
