ASX MEDIA RELEASE

Results of rights issue

SYDNEY, Australia, 15 December 2021: Uscom Limited (ASX code: UCM) (the **Company** or **Uscom**) is pleased to advise that the non-renounceable rights issue closed on Friday, 10 December 2021. Applications were received for 39,627,942 new shares out of the total entitlements of 46,977,297. The new shares will be issued at \$0.11 per share to raise \$4,359,073.

The following Uscom directors subscribed for their full entitlements:

Assoc.Prof Phillips - 9,660,761 shares (\$1,062,684)

Mr Meng - 9,930,765 shares (\$1,092,384)

The directors will consider placing the shortfall of 7,349,355 shares to investors over the next three months.

This announcement was authorised by Uscom Executive Chairman, Rob Phillips.

About Uscom

Uscom Limited (UCM): An ASX listed innovative medical technology company specialising in development and marketing of premium non-invasive cardiovascular and pulmonary medical devices. Uscom has a mission to demonstrate leadership in science and create noninvasive devices that assist clinicians improve clinical outcomes. Uscom has three practice leading suites of devices in the field of cardiac, vascular and pulmonary monitoring; the **USCOM 1A** advanced haemodynamic monitor, Uscom **BP+** central blood pressure monitor, and the Uscom **SpiroSonic** digital ultrasonic spirometers. Uscom devices are premium resolution, noninvasive devices which deploy innovative and practice leading technologies approved or submitted for FDA, CE, CFDA and TGA regulatory approval and marketing into global distribution networks. **The USCOM 1A:** A simple to use, cost-effective and non-invasive advanced haemodynamic monitor that measures cardiovascular function, detects irregularities and is used to guide treatment. The **USCOM 1A** device has major applications in Paediatrics, Emergency, Intensive Care Medicine and Anaesthesia, and is the device of choice for management of adult and paediatric sepsis, hypertension, heart failure and for the guidance of fluid, inotropes and vasoactive cardiovascular therapy.

The Uscom BP+: A supra-systolic oscillometric central blood pressure monitor which measures blood pressure and blood pressure waveforms at the heart, as well as in the arm, information only previously available using invasive cardiac catheterisation. The Uscom **BP+** replaces conventional and more widespread sub-systolic blood pressure monitors, and is the emerging standard of care measurement in hypertension, heart failure and vascular health. The Uscom **BP+** provides a highly accurate and repeatable measurement of central and brachial blood pressure and pulse pressure waveforms using a familiar upper arm cuff. The **BP+** is simple to use and requires no complex training with applications in hypertension and pre-eclampsia, heart failure, intensive care, general practice and home care. The Uscom **BP+** is supported by the proprietary **BP+ Reporter**, an innovative stand alone software solution that provides a digital platform to archive patient examinations and images, trend measure progress over time, analyse pulse pressure waves and generate summary reports.

Uscom SpiroSonic digital multi-path ultrasonic spirometers: High fidelity, digital, pulmonary function testing devices based on multi path ultrasound technology. The **SpiroSonic** spirometers, **FLO**, **SMART**, and **AIR**, require no calibration, are durable, simple to disinfect, and are simple, inexpensive and accurate to use providing research quality pulmonary function testing in hand held devices that can be used in research,

clinical and home care environments. The devices can be coupled with mobileSpiroSonic APP and proprietary **SpiroSonic** software, **SpiroReporter**, with wireless interfacing to provide remote tele-monitoring of pulmonary disease. The devices are specialised for assessment of asthma, COPD, sleep disordered breathing, industrial lung disease and COVID monitoring for pulmonary fibrosis.

VENTITEST: Digital ultrasonic ventilator calibration solution is a new system for calibrating ventilators. All ventilators and respiratory support devices require calibration to maintain the accuracy with which they measure the pressure, flow and volume of air they deliver. **VENTITEST** and **VENTITEST-S**, based on advanced SpiroSonic technology provides a calibration solution that provides for simple and accurate calibration, archiving, analysis and reporting and optimal ventilation performance.
