

Global X Uranium ETF Index adds Alligator Energy

Key Highlights

- Alligator Energy confirms that it has now been added to the Solactive Global Uranium and Nuclear Components Total Return Index (**SOLURANT Index**)
<https://www.solactive.com/indices/?se=1&index=DE000SLA4825>
- The **Global X Uranium ETF (NYSE:URA)** tracks the SOLURANT Index and consequently Alligator Energy will be added to the ETF
- The Global X Uranium ETF is the largest Exchange Traded Fund in the uranium sector with net assets of approximately US\$1.16 billion as of 1 February 2022

Alligator Energy Limited (ASX: AGE, 'Alligator' or 'the Company') is pleased to advise the market that after the 'price mismatch' error in the July 2021 rebalancing of the SOLURANT Index (refer ASX Announcement – 6 August 2021) it is now able to confirm inclusion in one of the most important uranium and nuclear industry indexes globally. The Global X Uranium ETF states on their website that they “*seek to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the Solactive Global Uranium & Nuclear Components Total Return Index*”. Further detail on the Global X Uranium ETF daily weighting selection can be found on their website under the 'Fund Objective'.

Greg Hall, Alligator CEO said,

“It is most pleasing to now be able to confirm inclusion in the SOLURANT Index, which underlies the Global X Uranium ETF – a fund which has net assets of US\$1.15 billion. Inclusion in the Global X Uranium ETF brings a significant fund to the register, and we anticipate this will increase liquidity of the stock and introduce the Company to new investors in global markets”.

This announcement has been authorised for release by the Board.
