8.6 If Item 8.5 is less than 2 quarters, please provide answers to the following questions:

- Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: No, calculating available funding based on a single quarter of operations in a broadacre farming business is going to give volatile results due to the timing of when revenue and expenses fall across the year.

The quarter ending December has had significant input costs attached to sowing and establishing the upcoming winter crop in addition to revenue from the harvest of cotton in June.

The quarter ending March will have revenue from the harvest and sale of the winter crop.

2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: There are currently no plans to raise further cash to fund its operations due to positive expectations for the winter harvest.

3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: The entity expects to be able to operate without limitation on the basis of supporting cash flow with the sale of the winter harvest starting in late December and continued sales of livestock at premium prices.
