Stability Phase

In light of COVID-19 pandemic impact on music industry, the focus was to grow the membership and visitor bases in order to have a dedicated base to transition to a paid or advertising model once usage levels became high enough and consistent.

As visitor numbers rose, there was a clear segmentation between those visiting on site versus visiting Jaxsta Pro (See slide 9).

Focus shifts to conversion from free to paid

The split of Jaxsta Pro into Core and Plus has separated the visitors into distinct buckets whose use of the service differs between the two, as well as from those on the general website. See slide 9 for the audience stats by tier.

Jaxsta Pro and Data Solutions Key Activities

DATA

⇒ During the last half year we have signed additional data sources, to ensure the completeness and accuracy of the database is at a level that coverage tests be it on a data solution or on an individual Jaxsta Pro page is the best in the industry.

⇒ Key additions like Distrokid and Soundcloud (Repost) allow us to deliver better results in more coverage tests. Soundcloud ingestion is now complete and Distrokid is underway, significantly increasing the coverage as the growth of self publishing continues to change the industry.

ROADMAP

⇒ Continuous feedback on enhancing current or adding new features by our existing members and outside parties are feeding a prioritised development roadmap that is customer focused.

⇒ Our team has grown to address changes at a faster pace, mixing platform enhancements with new feature releases in a faster cadence.
