ASX RELEASE

Initial GSA Order

DroneShield Limited (ASX:DRO) ("DroneShield" or the "Company") is pleased to advise it has received its initial order via a GSA schedule from a US Government law enforcement and public safety agency.

GSA Schedule (U.S. General Services Administration, or also referred to as Multiple Award Schedule (MAS) and Federal Supply Schedule) is a United States long-term government-wide contract with commercial firms providing federal, state, and local government buyers access to more than 11 million commercial supplies (products) and services.

DroneShield products are available for U.S. State, local, and tribal governments through GSA Multiple Award Schedule under Special Item Number (SIN) 334290, or alternatively via GSA's Cooperative Purchasing Program.

The order total is for approximately \$530,000, and includes multiple DroneShield RfOne™ long-range Unmanned Aerial System (UAS) direction finder sensors, RadarZero™ small form-factor radar, DroneSentry-C2™ command-and-control system and accessories.

Matt McCrann, CEO of DroneShield LLC (DroneShield U.S. subsidiary), commented, "State, local and tribal governments have a growing need for drone detection solutions. Often the procurement process presents complexity for Government end users to field the capabilities needed across their organisations. Our availability on the GSA Schedule provides an easy-to-use contract vehicle for them to acquire this capability and field effective counterdrone solutions. With DroneShield solutions now on GSA, Government agencies have the confidence of receiving tried and proven products at competitive pricing."

Oleg Vornik, DroneShield CEO, added, "We welcome onboard our first customer through GSA, and anticipate for this to be one of numerous U.S. deployments. Purchasing via GSA is also a great indicator of increasing maturity and scale of the C-UAS market, whereby the acquisitions move from experimental budgets to streamlined large acquisition processes."
