ASX Release

Sydney, Australia – 31st March 2022

Launch of Law Enforcement VR Training Solution

xReality Group Limited (ASX:XRG) (xReality) is pleased to announce the launch of Operator LE, Virtual Reality Training Solution for the global Law Enforcement market.

Operator LE allows Police and Law Enforcement Officers (LEO's) to train operational tactics and procedures within a portable, virtual reality environment. Complimenting existing training methods, the virtual reality system allows Officers to train more often, leading to increased preparedness across a broad range of scenarios.

Operator LE training scenarios focus on de-escalation, use-of-force, domestic disputes, traffic stops and other tactical drills, with a continually growing library.

System training accessories include Glock, Taser and OC Spray allowing officers to safely train use-of-force scenarios. The After Action Review System allows trainers to debrief trainees from any angle including trainee, suspect, or third person view.

The system uses the same underlying platform as the defence focused Operator OP-1 Virtual Reality Tactical Trainer, developed by XRG and officially launched February 24th 2022, as previously announced.

Users can train together in a warehouse scale training facility, or remotely in individual training spaces such as within a police station.

XRG CEO Wayne Jones said, "The Law Enforcement training tools are a natural extension of the Military training products. The company has tailored the products to address the current Australian demand with localised vehicles, uniforms and equipment with the XRG Operator LE equipment being easily adaptable to bespoke weapons and for use by law enforcement agencies around the world."

Live commercial opportunities are in progress, including tenders to be submitted to Australian State Police Forces over the coming weeks, the details of which are commercial in confidence.

More information on the product is available at www.operatorsimulation.com
