

Microba appoints ex Amgen executive as Senior Vice President of Therapeutics

- **Appointment of Professor Trent Munro as Senior Vice President of Therapeutics.**
- **Professor Munro has over 25 years' research and development experience, including with multinational biopharmaceutical company Amgen based in California, United States.**
- **Professor Munro has recently held several leadership roles in Australia including Director of the National Biologics Facility (NBF), Program Director of the CEPI funded Rapid Response Vaccine pipeline and Director of the ARC Centre for Biopharmaceutical Innovation (CBI).**

Microba Life Sciences Limited (ASX: MAP) ("Microba" or the "Company") is pleased to announce Professor Trent Munro will be joining the Company as Senior Vice President of Therapeutics. Professor Munro has over 25 years' research and development experience, including with multinational biopharmaceutical company Amgen.

Commenting on the appointment, Chief Executive Officer Dr Luke Reid said, "As the Company enters into clinical trials, Professor Munro brings significant pharmaceutical and US drug development experience to advance our therapeutic programs and establish partnerships with large pharmaceutical companies."

Professor Trent Munro commences employment with Microba today, Wednesday, April 6, and will be leading the Company's therapeutic strategy to progress its valuable drug development programs and pharma partnering engagements.

About Prof Trent Munro

Professor Munro was based in California with Amgen for over six years, including in the role of Executive Director leading a global team. During this time, he played key roles in the translation of molecules from research, through clinical trials, regulatory approval, and global licensure. This included a diverse range of programs spanning novel biologics, small molecules, nucleic acid-based, cell-based and gene-based therapies across multiple therapeutic areas.

In the last two years Professor Munro has held several leadership roles in Australia including Director of the National Biologics Facility (NBF), Program Director of the CEPI funded Rapid Response Vaccine pipeline, Director of the ARC Centre for Biopharmaceutical Innovation (CBI) and Senior Group Leader at the Australian Institute for Bioengineering and Nanotechnology (AIBN) at the University of Queensland.

Professor Munro completed postdoctoral studies in cell biology and developmental genetics at Harvard Medical School and the University of Cambridge and has a PhD in Protein Biochemistry from the University of Queensland.

This announcement has been authorised for release by the Board.
