

Notice under Section 708A(5)(e) of the Corporations Act 2001 (Cth)

On 21 April 2022, NeuRizer Ltd ("NRZ" or the "Company") issued 24,612,404 fully paid ordinary shares in accordance with the terms of its Subscription Agreement with Energy Exploration Capital Partners, LLC, which was announced to the market on 17 December 2021.

Accordingly the Company gives notice under section 708A(5)(e) of the *Corporations Act 2001* (Cth) (the "Corporations Act") that:

1. the abovementioned ordinary shares were issued without disclosure to investors under Part 6D.2 of the *Corporations Act*;
2. as at the date of this notice the Company has complied with:
 - (a) the provisions of Chapter 2M of the *Corporations Act* as they apply to the Company; and
 - (b) section 674 of the *Corporations Act*; and
3. As at the date of this notice there is no "excluded information" (as defined in subsection 708A(7) of the *Corporations Act*) which is required to be disclosed by the Company.

The Board of NeuRizer authorised this announcement to be given to the ASX.

NeuRizer (NRZ) is the company responsible for progressing the NeuRizer Urea Project (NRUP). NRUP is a nationally significant project that will deliver low-cost, high-quality nitrogen-based fertiliser ensuring a secure supply for local and export agriculture markets. Located in South Australia, 550 kilometres north of Adelaide, the NRUP will initially produce 1Mtpa of urea fertiliser with potential to increase to 2Mtpa.

NRZ is a certified carbon neutral organisation having been awarded Climate Active certification in March 2022 and is a signatory to the United Nations Global Compact. The NRUP is carbon neutral by design, and the decarbonisation pathway for the NRUP is embedded in the Front-End Engineering and Design (FEED) process to ensure that the NRUP achieves zero carbon operations from first operations in 2025.

The NRUP will significantly increase Australia's sovereign manufacturing capability for fertiliser supporting Australian agricultural food production. The NRUP will strengthen supply chain resilience that will benefit Australian farmers and, to a lesser extent, the industrial sector where urea is used as a supply input (eg. diesel additive (AdBlue), industrial resins, etc.) by reducing the nation's reliance on imports.

The NRUP will be one of the biggest infrastructure projects of its type in Australia, providing long term economic development and employment opportunities (2,250⁺ construction jobs plus 1,200⁺ ongoing positions) for the communities of the Upper Spencer Gulf region, northern Flinders Ranges and South Australia.

The NRUP will be the only fully integrated urea production facility in Australia, with all inputs (gas, power and CO₂) for low carbon urea production on-site, meaning NRZ will control both supply and price of these major cost inputs, regardless of prevailing market conditions and supply chain dynamics.
