

## FirstWave to launch Phase II CyberCision Platform

**FirstWave Cloud Technology Limited** (ASX: FCT) (FirstWave), the global cybersecurity company, advises it will launch its Phase II CyberCision platform at 9:30am (AEST) on Wednesday 1 June in an online webinar.

Building on the successful Phase I launch of CyberCision last October, the most transformational technology upgrade in FirstWave's history, the Phase II launch delivers new features and functionality including Frictionless Email Security, Premium Automatic Detection & Response (ADR), and the CyberCision Mobile App.

With a focus on improving service quality and reducing onboarding friction, FirstWave continues to provide best-in-class cybersecurity technologies. Through the CyberCision platform, FirstWave provides Partners, which include some of the world's largest Telcos and managed service providers (MSPs), with the tools to protect their increasingly vulnerable business customers from cyber-attack, and the ability to rapidly deploy and scale security services. For end users, CyberCision now delivers an app in the palm of their hand to understand and manage their security posture.

For the virtual launch event, FirstWave's Managing Director, Danny Maher will be joined by Chief Technology Officer Simon Ryan, and Chief Revenue Officer Craig Nelson to share details of the Phase II CyberCision platform.

### Virtual event details

### About FirstWave:

FirstWave is a global cybersecurity technology company formed in 2004. FirstWave's globally unique CyberCision platform provides best-in-class cybersecurity technologies, enabling FirstWave's Partners, including some of the world's largest telcos and managed service providers (MSPs), to protect their customers from cyber-attack, while rapidly growing cybersecurity services revenues at scale. In January 2022, FirstWave acquired Opmantek Limited (Opmantek), a leading provider of enterprise-grade network management, automation and IT audit software, with 150,000 organisations using their software across 178 countries and enterprise clients including Microsoft, Telmex, Claro, NextLink and NASA. Integrating CyberCision with Opmantek's flagship Network Management Information System (NMIS) and Open-Audit product enables FirstWave to provide a comprehensive end-to-end solution for network discovery, management and cybersecurity for its Partners globally.
