

RocketBoots Partners with AWS

Announcement 3 June 2022

RocketBoots Limited ("RocketBoots", the "Company", ASX:ROC) is pleased to announce that it has been accepted to the Amazon Web Services (AWS) Partner Network (APN), a global program which recognises organizations that have proven technical expertise and demonstrated customer experience.

This partnership provides RocketBoots with technical support and a pathway to:

- Market and sell in collaboration with AWS
- Publish co-branded marketing collateral e.g. case studies and success stories on the AWS site

RocketBoots uses AWS to deliver Beehive, a hybrid cloud-edge software solution providing continuous, accurate on-the-ground data to support evidence based risk and change management across a network of business locations. Beehive leverages multiple distinct AWS services in a "serverless" architecture, freeing our team to focus on unique Beehive IP developments in machine learning, simulation and secure edge deployment technologies.

Either party can terminate the agreement on immediate notice

End of Announcement

Authorised for release by the Board of RocketBoots Limited

About RocketBoots

An ASX listed company, RocketBoots takes a first principles approach to solving fundamental business problems — applying the power of mathematics, computer science and machine learning to create compelling, disruptive software.

RocketBoots portfolio of software helps its retail banking and retail customers:

- Optimise workforce management across physical and digital channels
- Cut property capital investment and operating costs
- Deliver better customer experiences
- Stem fraud and loss
