

# RocketBoots Partners with NVIDIA

Announcement 7 June 2022

RocketBoots Limited ("RocketBoots", the "Company", ASX:ROC) is pleased to announce that it has been accepted to the NVIDIA Metropolis Partner Program, a program designed to nurture and bring to market a new generation of applications and solutions that make the world's most important spaces and operations safer and more efficient with advancements in AI vision.

NVIDIA is valued at \$650B by market capitalisation. RocketBoots uses NVIDIA's high performance computing platform to deliver advanced computer vision capabilities to Beehive, a software solution providing continuous, accurate on-the-ground data to support evidence-based risk and change management across a network of business locations.

This partnership provides RocketBoots with early access to NVIDIA technology updates and a pathway to market and sell in collaboration with NVIDIA. As a part of this activity NVIDIA is publishing a RocketBoots success story to coincide with the latest release of their TAO framework, used to simplify and accelerate the creation of custom, production-ready AI models to power AI applications. <https://developer.nvidia.com/tao-toolkit>

Either party can terminate the agreement on immediate notice.

## End of Announcement

Authorised for release by the Board of RocketBoots Limited
