## Investment Commentary

Pre-tax NTA decreased by 7.47 cents during May to \$1.5191, a return of -4.69% in what continues to be a difficult and uncertain investment environment. Negative contributions continued to outpace positive contributions during the month with falls in core Portfolio holdings: Janison Education Group Limited, BCI Minerals Limited, Aurelia Metals Limited and 3P Learning Limited. Our tactical ETF position continues to perform well in a falling market, providing a small positive contribution to the Portfolio along with several modest contributions from Countplus Limited, Service Stream Limited and Macmahon Holdings Limited. We continue to take advantage of market weakness by adding to our positions in Countplus Limited and Capitol Health Limited in addition to a newly initiated industrial company where we have an increasingly high level of conviction and expect it to become a core holding. During the month Updater Inc. completed a US\$215 million credit investment with Vista Equity Partners, with the deal providing a materially improved funding runway (given the recent pausing of its NASDAQ IPO) to execute its growth plans, including the implementation of the Transcom/Homesafe Alliance contract. We continue to selectively trim and exit lower conviction positions to recycle capital into higher conviction holdings that are trading at a material discount to their intrinsic worth, some of which we expect may become takeover targets in the absence of a strong share price appreciation from current levels. We remain of the view that the immediate outlook for equity markets continues to be highly uncertain, while the outcomes for interest rate policy targets aimed at achieving a neutral setting also remain unclear. That said, we are beginning to see pockets of extreme value that will, in the fullness of time reward our patience and fortitude and we are selectively taking advantage of these opportunities as they arise. Cash increased month on month from \$16.1m (11.84% weighting) to \$18.8m (14.51% weighting) noting our ETF position, after realising ~29% of the position, was valued at ~\$2.3m (~1.75% weighting) at month end.
