

Supplementary Announcement

9 June 2022

On the 3rd of June 2022, RocketBoots Limited ("RocketBoots", the "Company", ASX:ROC) announced that it had been accepted to the Amazon Web Services (AWS) Partner Network (APN), a global program which recognises organizations that have proven technical expertise and demonstrated customer experience.

The relationship provides RocketBoots with the opportunity to be introduced to the US AWS accounts teams and approach the Company's target markets. RocketBoots has been working with AWS executives on a roll out of its sales function people and collateral to its target audience in the United States. RocketBoots considered this validation as an important milestone and expects that the agreement may result in a significant change in the scale of RocketBoots' activities. However, RocketBoots stresses that it does not anticipate any immediate increase in revenue as a result of its involvement in the AWS APN, and notes that any potential financial effect of this cooperation is too soon to quantify. Notwithstanding, the attention given to the Company by Amazon is notable in its own right.

The Chief Executive Officer of the Company will be travelling to North America for the next three months and this relationship with AWS will help to create awareness of the Beehive software and build new opportunities for the business.

Material items:

Term of agreement: 12 months with annual renewal option

Termination: Either party may, by giving at least 30 days' notice

Significance of the contract:

- Accelerates market verification activities before significant investments are made in international markets
- When our AWS architecture is being reviewed by potential customers, our ability to collaborate with the AWS accounts team and give the customer piece of mind is anticipated to reduce due diligence cycles, speeding up proposal sign offs
- As AWS has a large international brand audience, publishing co-branded marketing collateral e.g. case studies and success stories on the AWS site would increase awareness of the Beehive software and RocketBoots as a company
- Provides a pathway to market and sell in collaboration with the AWS accounts teams
