

On the 7th of June 2022, RocketBoots Limited ("RocketBoots", the "Company", ASX:ROC) made an announcement with respect to the NVIDIA Metropolis Partner Program, a program designed to nurture and bring to market a new generation of applications and solutions that make the world's most important spaces and operations safer and more efficient with advancements in AI vision.

NVIDIA's recent marketing included featuring RocketBoots on their website and in social media posts. Due to NVIDIA's significant global audience, the Board of RocketBoots is of the view that these recent developments and the anticipated future engagement with NVIDIA is likely to result in a significant increase in the global awareness of Beehive software and RocketBoots as a company in the international market. Introductions to system integrator sales and delivery partners from Nvidia's network have already begun.

RocketBoots considered this validation as an important milestone and expects that the agreement may result in a significant change in the scale of RocketBoots' activities. However, RocketBoots stresses that it does not anticipate any immediate increase in revenue as a result of its involvement in the NVIDIA Metropolis Partner Program, and notes that any potential financial effect of this cooperation is too soon to quantify. Notwithstanding, the attention given to the Company by NVIDIA is notable in its own right.

As noted in its previous announcement, the Metropolis Partner Program is for a period of two years and may be terminated on immediate notice by either party.

Significance of the NVIDIA Metropolis Partner Program

- The NVIDIA Metropolis Partner Program provides RocketBoots with early access to NVIDIA technology updates and technology advisory, thereby ensuring that RocketBoots can deliver the most up-to-date and advanced technology to its customers.
- As a new entrant in many of our target markets, the case study NVIDIA published provides a recognition that boosts customers confidence in our Beehive software internationally
- The case study also references Beehive for workforce management in retail banking which increases software and company awareness in our target markets at time when the Company is targeting sales in North America and the UK

ASX Announcement

09 June 2022

- Introductions to system integrator sales and delivery partners are important to RocketBoots international expansion plans and have already begun
- Title of NVIDIA article: RocketBoots uses AI to improve their automated workforce management solution
