### **About Southern Palladium:**

**Southern Palladium Limited (ASX:SPD, JSE:SDL) is a dual-listed PGM company developing the advanced Bengwenyama PGM project, particularly rich in palladium/rhodium, in South Africa. The project is located on the Eastern Limb of the Bushveld Complex, which contains more than 70% of the world's known PGM Resources. With its 70% stake in the project, the Company's focus will target the delivery of an established 2Moz Ore Reserve at Bengwenyama through geophysical mapping, a two-phase diamond drill program, technical studies and submitting a mining right application.**

**A major development opportunity in the global PGM market, previous exploration at Bengwenyama has already delivered a JORC 2012-compliant Inferred Mineral Resource of 18.8Moz within two reefs – UG2 and Merensky. In addition, an assessment by mining industry consultants CSA Global assessed the total resource potential of Bengwenyama at between 33.9Moz and 52.4Moz. The Company is led by an experienced on-ground management team including some of South Africa's most high-profile mining industry executives.**
