

19 JULY 2022

Investor Webinar

Sunstone Metals Ltd (ASX: STM) will host a live investor webinar today at 10:30am (AWST) / 12.30pm (AEST).

Managing Director Malcolm Norris will outline the growing dimensions of Sunstone's discoveries, one in the north of Ecuador and the other in the south, and how the Company is preparing for a maiden JORC resource later this year.

Participants must register to join the webinar via the following link: <https://www.bigmarker.com/read-corporate/Sunstone-Metals-Two-global-scale-gold-copper-porphyry-discoveries>

Participants who would like to submit questions in the webcast can ask via the 'Q&A' tab. It is recommended that you log on at least 5 minutes prior to the commencement of the webinar.

About Sunstone Metals

Sunstone has an advanced portfolio of exploration and development projects in Ecuador and Scandinavia. The portfolio comprises:

1. **The Bramaderos Gold-Copper Project** where Sunstone owns an 87.5% interest with TSXV listed Cornerstone Capital Resources holding 12.5% (see ASX announcement dated 10th April 2017, 28th August 2019, and 7 January 2020). The Bramaderos gold-copper project is located in Loja province, southern Ecuador, and is highly prospective for the discovery of large porphyry gold-copper systems, and high-grade epithermal gold systems. Historical exploration results from drilling at Bramaderos together with recent exploration by Sunstone and joint venture partner Cornerstone Capital Resources (TSXV:CGP) indicate multiple fertile mineralised systems with significant discovery potential.
2. **The El Palmar Copper-Gold Project** where Sunstone holds 70% of the highly prospective 800ha El Palmar gold-copper porphyry project in Ecuador. Sunstone can acquire 100% through a Staged Acquisition Agreement. A Letter of Intent to acquire the nearby Verde Chico Project through a Staged Acquisition Agreement has also been signed. The El Palmar and Verde Chico gold-copper projects are located in Imbabura province, northern Ecuador, within the same geological belt that includes the giant Alpala, Tandayama-America and Llurimagua porphyry copper-gold and copper-molybdenum deposits.
