### ABOUT LEAF RESOURCES

Leaf is positioning itself to become a leading global supplier of natural and renewable pine chemicals. It has developed a proprietary process to naturally extract pine chemicals by employing the trees own solvent chemicals to extract rosin and terpenes. These products are commonly used in industrial manufacturing and are a key input to everyday end products. These products include adhesives, gum, inks, paint, car tyres and perfume.

Leaf is currently reinstating and upgrading its first plant and is expected to be in production in early 2023.
