Note: Some totals may not sum due to rounding.

(1) Accounting standards require that underlying funds be held at the valuations provided by their third-party administrators and auditors. This results in an immediate valuation uplift for funds purchased in the secondary market at discounts to this value. The Adjusted NTA adjusts the value of funds purchased in the secondary market using the lower of their reported valuations and the Warana's estimated projected recovery cash flows discounted at 10% p.a.

(2) Four private equity funds: Fortress Investment Fund IV, Fortress Investment Fund IV (Coinvestment), Fortress Investment Fund V and Fortress Florida Coinvestment Fund

Portfolio Update and Commentary

- NTA return for the month was -1.4% and -3.2% on an Adjusted NTA basis (both adjusted for the A\$0.0410 per unit distribution with ex-date 20 July 2022). The negative movements largely reflect FX movements. At the investment portfolio level, both NTAs incorporate the release of the Q2 2022 NAV of the Warana funds. Against a backdrop of challenging market conditions, inflation and further rate hikes, we added extra conservatism in our liquidity assumptions included in the Adjusted NTA.
- The Warana 2021 Fund continues to cautiously deploy capital with targeted return of 20%. As of the Q2 2022 balance sheet, the 2021 Fund has settled over 30 trades and invested in over 65 investments, at discounts in excess of 30% of the aggregated Manager Value.
- At the corporate level, there was a lot of activity during the month, including an EGM that took place on 29 July to approve a number of initiatives, including a 1 for 10 unit consolidation. It is intended that the on market buy-back will also launch shortly. Details of these initiatives can be found on the Trust's website (www.thealternativeinvestmenttrust.com) or the AIQ-specific page on the ASX website.

About the Responsible Entity of AIQ

One Investment Group is an independent funds management business specializing in providing Responsible Entity, Trustee, Custody and Administration services. It operates multiple licensed entities to act as responsible entity and trustee for in excess of 300 registered and unregistered managed investment schemes. The total value of assets under administration by the group is in excess of \$35 billion across a wide range of underlying asset classes.

About the Investment Manager of AIQ

Warana Capital Pty Limited focuses on managing portfolios invested in third party funds and has core expertise in acquiring and managing funds acquired in the secondary market. The underlying funds and assets acquired are generally illiquid with uncertain holding periods to ultimate recovery. Warana has significant experience acquiring these funds at sufficient discounts to deliver absolute and annualised returns notwithstanding the time period and recovery uncertainty.

Distribution Policy

Subject to sufficient cash reserves, AIQ intends to distribute 5% per annum of the Trust's NTA, paid in semi-annual instalments. As at the end of the 2021 tax year, the Trust has in excess of A\$400m in accumulated tax losses and in excess of A\$20m in accumulated capital losses. Under certain circumstances and provided relevant legislative conditions are satisfied, these losses may be able to be applied against future taxable income to reduce the amount of taxable income and therefore the amount of any income distribution. Unitholders may reinvest distributions by purchasing additional units through the Trust's Distribution Reinvestment Plan ('DRP'). Participation in the Plan is optional and is open to all eligible unitholders. Further information is included in the published DRP.

AIQ Valuation

The monthly NTA of AIQ is released by the 14th of each month and is available from AIQ's website and the ASX. The NTA is unaudited and is calculated by aggregating the fair values provided by the underlying fund managers and their third-party administrators ('Manager Value'). Unaudited valuations are generally provided to AIQ monthly /quarterly and the underlying funds are audited annually. The investment funds are largely illiquid and Warana believes that:

- it will likely take several years to fully receive liquidation proceeds; and
- if sold today, many holdings would be realised at discounts to their prevailing Manager Value.

AIQ also makes investments in funds via the secondary market at a discount to the Manager Value. AIQ's advisors have concluded that accounting principles require that these positions be written up to the Manager Value once the trade has settled. Thus, AIQ applies the Manager Value to all funds (including look-through funds) in calculating its NTA. It generally takes 6-8 weeks to receive the Manager Values from the underlying funds, which causes a similar lag in the inclusion in the AIQ NTA.

When funds are acquired in the secondary market, they are often done so at a price that reflects Warana's expectation that ultimate recovery will be lower than the Manager Value and that recovery will take several years (hence the purchase discount to Manager Value). As an additional resource for Unitholders, AIQ has included an Adjusted NTA calculated by AIQ's Investment Manager to adjust for underlying funds that have been acquired in the secondary market ('Secondary Funds') at discounts to the Manager Value. It is intended as an additional indicative valuation resource given the re-valuation of Secondary Funds to Manager Value creates an immediate and significant valuation uplift. The Adjusted NTA is equal to the lower of the Manager Value and Warana's estimate of the projected recovery cash flows discounted at a 10% p.a. rate. The Adjusted NTA is indicative only and there is no assurance the value will be achieved - unitholders should take care in relying on this metric as it is not produced or reviewed by a third party to AIQ. Neither Warana nor the Responsible Entity make any express or implied warranty as to the completeness or accuracy of any projections, market outlooks or estimates used in estimating the Adjusted NTA. The Adjusted NTA is estimated using third-party information and other assumptions which may prove inaccurate.

Historical NTA & Adj. NTA Performance				
(See notes below)	NTA		Adjusted NTA	
	Diluted	Undiluted	Diluted	Undiluted
1 Month	-1.4%	-1.0%	-3.3%	-3.2%
3 Months	4.8%	7.8%	0.4%	0.8%
6 Months	7.0%	9.9%	-0.3%	0.1%
YTD	16.7%	19.2%	8.1%	8.1%
Since Inv. Strategy Restart (p.a.)	16.3%	15.1%	8.4%	7.3%
Since IM Appointment (p.a.)	14.1%	13.6%	6.9%	6.4%

Note: The Trust has conducted several capital raises to build scale since the commencement of its investment strategy on 12 February 2018, including rights issues, unit placements and offers a distribution reinvestment plan. As a result of the new units issued at discounts to the NTA in some of these events, the NTA was diluted. Returns under the "Diluted" columns for each relevant time period show the movement including the impact of the dilution. Returns under the "Undiluted" columns for each relevant time period show the movement adjusted for the impact of the dilution. "Since Inv. Strategy Restart (p.a)" returns are annualised returns since the investment strategy commencement. "Since IM Appointment (p.a)" returns are annualised returns since Warana Capital was appointed as Investment Manager of AIQ on 9 October 2017. The first produced an Adjusted NTA for the period ending 31 October 2019. Adjusted NTA performance relative to periods before this date utilise the regular NTA. Past performance is not indicative of future performance.
