## eMite: Actionable Insights in Real Time

eMite is our Customer Experience Analytics solution that combines advanced analytics, data correlation, KPI management and threshold alerting into a single, out-of-the-box browser-based solution.

Provides actionable insights that bring both real-time and historical data to life.

eMite onboards data from many processes and systems then visualises it in an easily configurable interface.

Our SaaS cloud-based / on-premise solution now has more than 200 active customers, generating \$12.3 million in annualised recurring revenue (ARR) for eMite as at 30 June 2022, along with upfront setup fee revenue.

When we had to make the change to a remote agent workforce in the middle of the pandemic, we were completely overwhelmed. eMite's team helped us get up and running with complete contact center reporting in no-time, which helped me and my team focus on agent training and staffing right away.
