

H2X completes first production release of the Warrego Hydrogen Pick-Up Truck

- Pure Hydrogen investee company H2X has completed initial production for the Warrego Hydrogen Pick-Up Truck
- The Warrego is believed to be the first Hydrogen Fuel Cell 4WD Pick Up Truck
- The Warrego is now undergoing rigorous vehicle compliance testing in accordance with EU validation and verification standards
- Video of the Warrego in its current status is now available

Sydney, 27 September 2022: Australian clean energy company Pure Hydrogen Corporation Limited (ASX: PH2 or 'Pure Hydrogen') is pleased to advise that hydrogen fuel cell EV manufacturer, H2X Global, has confirmed the initial production release of its Warrego All Wheel Drive Pick-Up.

With operations in the Netherlands and Sale, Victoria, H2X is an investee company of Pure Hydrogen which has a 23% shareholding in the business (see ASX Announcement 5 November 2021).

The pickup is now undergoing final validation and verification testing procedures in the Netherlands as it heads towards formal certification in Europe and global markets. Australian certification testing will be commenced soon.

H2X Global CEO and founder, Brendan Norman, said the completion of the first Warrego pickup was a milestone of success for the company.

"It is extremely satisfying that our team now have the Warrego running through the final stages its engineering, safety and on road verification program," Mr Norman said.

"It is true that we have had some frustrating delays over the past nine months due to supply chain complications however, we are now well on track with our roll out plans," he added.

"We are very pleased with the H2X management team's ability to navigate a number of operational challenges to bring the Warrego to initial production", Pure Hydrogen managing director Scott Brown said. "Pure Hydrogen has provided material operational and strategic support to H2X since its initial investment in November 2021, and we look forward to providing further updates as the group continues to execute on its go-to market strategy."

H2X Global have released video of the Warrego as it moves towards European Homologation and Certification testing, which can be viewed on the Company's website under the news section.

The Warrego is H2X Global's first application to demonstrate the company's vehicle production capabilities.

The Warrego Pickup features a full version of the H2X powertrain purpose-built for light vehicles and features a supercapacitor-based hybrid fuel system.

The first-release Warrego features a 60-kw fuel cell connected to a hybrid battery/supercapacitor electric drive system. This is connected to a 700-bar type 4 hydrogen tank system constructed of an advanced polymer and Carbon Fibre base which offers exceptional safety levels with very long standards of operation.

While this will allow the car to work at the lower 350 bar compression, it has the capability to run at much higher compression rates which will double the range per tank.

Once approved by vehicle regulators in the Netherlands, the Warrego will be made available to retail customers over the coming months in line with the availability of hydrogen. Over the medium term, H2X plans to maintain production in Europe and Australia at its facility in Sale, Victoria.

About H2X Global

H2X Global is an Australian automotive and power unit company focused on absolute sustainability. The company is focused on harnessing the most efficient and effective technologies, with the onus on capturing free and renewable energy sources. A specialisation in hydrogen is the basis of H2X's growth, however with a strong platform as a maker of electrically powered vehicles, the company has a versatile approach to finding the right vehicle for the right task. H2X Global has operations in Australia, Malaysia, India, and throughout Europe.

About Pure Hydrogen

Pure Hydrogen Corporation Limited
Call 02 9955 4008 or visit purehydrogen.com.au

Pure Hydrogen is a focused clean energy company seeking to become the leader in the development of Hydrogen and Energy Projects through the use of cutting-edge technology processes. It plans to supply hydrogen fuel to both Australian customers and regional Asia Pacific markets, through the production of Green, Emerald and Turquoise Hydrogen. Concurrently, the Company is developing natural gas projects in Australia and Botswana. Strategically, Pure Hydrogen will also prioritise incubation for early-stage companies or projects within the clean energy sector, with the aim of realising profits from those investments.
