**Northvolt awards battery materials contract to Worley**

Northvolt AB has awarded Worley a services contract for a new battery chemicals facility which is a major component within its battery gigafactory in Skelleftea, Sweden. The award extends Worley's strategic partnership with Northvolt to support delivery of future battery material projects.

Under the services contract, Worley will provide engineering, procurement, and construction management (EPCm) services for the new battery chemicals facility. The facility will manufacture cathode active material (CAM) which will be used in the manufacture of lithium-ion batteries.

The services will be executed by Worley's London and Global Integrated Delivery (GID) offices with site teams located in Skelleftea, Sweden.

"This contract award further strengthens our relationship with Northvolt as we support the next stage of its battery gigafactory expansion to deliver lithium-ion batteries," said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O'Leary, Group Company Secretary.
