## Financial performance

- Pay advances grew by 153% YoY driven by both new customer acquisition and continued usage by existing customers.
- Active users grew by 52% YoY to 185,075 and up 7% on Q4 FY22 (173,398).
- Beforepay income increased by 154% YoY to \$6.46m during Q1 FY23 and up 23% on Q4 FY22 (\$5.26m).
- Net transaction loss % improved to 1.6%, down 36% YoY and down 11% on Q4 FY22 driven by ongoing refinements to the risk model, customer limit management and higher recoveries during Q1 FY23. Management expects that this number will increase in Q2 FY23 in line with seasonal increases.
- Direct service costs as a percentage of pay advances reduced to 0.3% in Q1 FY23 (previously 0.4% in Q4 FY22).
- Net transaction margin % (of pay advance) increased 15% to 2.3% compared to 2.0% in Q4 FY22 and 0.3% of pay advances in Q1 FY22 driven primarily by lower net transaction losses as well as timing effects in revenue recognition.
- Total operating expenses (excluding one off and/or significant items) were \$5.57m in Q1 FY23, which declined 6.9% from \$5.98m in Q4 FY22. Within these numbers, advertising and marketing expense attributable to customer acquisition was \$1.84m in Q1 FY23 or 32% lower than Q4 FY22, (\$2.71m) primarily driven by the reduction of above-the-line advertising spend. Employee, general and administration and other costs were \$3.73m in Q1 FY23 or 13.4% higher than Q4

<sup>2</sup> Cash position as at 30 September 2022 represents all statutory cash and cash equivalents (including held by third parties).

FY22 (\$3.29m) related primarily to higher one-off employment and recruitment costs, annual staff incentive bonus and termination costs during the quarter.

- EBITDA loss (excluding one-off and/or significant items) was (\$2.34m), a 28% improvement on the EBITDA loss of (\$3.24m) in Q4 FY22.

## Outlook

- Consistent with previous years, management expects that defaults will see a seasonal increase in Q2 FY23.
- This will likely lead to a reduction in NTM in both percentage and absolute terms in Q2 FY23, as well as the potential for a larger EBITDA loss in that quarter.
- October month-to-date new user numbers and pay advance numbers have been consistent with the prior quarter.

## Balance sheet

- Reported cash on hand as at Q1 FY23 was \$21.9m compared to \$28.4m at Q4 FY22, reflecting the growth in customer pay advances during the quarter. Cash utilisation of \$6.5m during the quarter comprised cash from operating activities (\$10.5m), cash from investment activities (\$0.2m) less cash from financing activities (\$4.2m).
- As at Q1 FY23, Beforepay had drawn \$25.3m under its third-party debt facility, up from \$20.7m in Q4 FY22 to fund the net growth in pay advances during the quarter of \$4.6m. The third-party debt facility has a capacity which increases to \$45m by December 2023 and expires in January 2024.
- Beforepay had a total equity position of \$30.2m as at Q1 FY23. This compares to \$32.7m at Q4 FY22.
- Beforepay retains a highly capital efficient model with an average pay advance duration<sup>3</sup> of approximately 25 days. As a result, the third-party funding cost of the average pay advance<sup>4</sup> is c. 0.64% of the amount advanced, based on a 25-day loan duration. A 1% increase in interest rate would increase this to approximately 0.69%.

## Growth strategy

- During Q1 FY23, Beforepay announced the launch of its new Tax Refund Advance product, distributed through a partnership with H&R Block. This is currently in pilot phase, with a target of national launch for the 2023 tax season. We have the technology capability to undertake further business to business partnerships in the future.
- Beforepay launched Open Banking on 21 September 2022. This allows the company to serve users from a new set of banks and is currently contributing approximately 200 new users per week.
- Beforepay's growth strategy through new customer acquisition and customer retention remains unchanged. The momentum of growth in both revenue and user numbers combined with an improvement in net transaction margin demonstrate that the Company is successfully executing on its strategy.

<sup>3</sup> The average time required across all pay advances in a period to fully repay the pay advance. Pay advances which default and remain unsettled are removed.

<sup>4</sup> The total dollar value of pay advances in a period divided by the number of pay advances in that period.

- The Company remains focused on continuing to grow without adding significant cost to the current operating expense base.
- Beforepay will continue to explore new growth opportunities, however, maintains a current focus on its path to profitability by managing costs and delivering on growth in its current products and geographies.
